DESCRIPTION AND HISTORY.

Georgetown College is situated on Georgetown Heights, two and one-half miles distant from the Capitol, overlooking the City of Washington and the Potomac River, and commanding one of the noblest views in the world. The site is singularly healthful.

This College was the first Catholic institution of higher learning founded in the United States, and was established through the efforts of the Rev. John Carroll, afterward the first Archbishop of Baltimore. Its foundation has hitherto been referred to the year 1789; but in fact the earliest building was begun during the year 1788 ; students, however, were not received before 1791. Upon the reorganization of the Society of Jesus in Maryland, in 1805, the Georgetown Academy, as it was then called, was transferred to the Fathers of that Society, under whose control and direction the University still remains. The College was chartered as a University, by act of Congress, March 1st, 1815, and two years later the power thus acquired of conferring degrees was first exercised. In the year 1833, by an especial decree, the Holy See empowered Georgetown University to grant degrees in Philosophy and Theology. In 1843 an Astronomical Observatory was erected and fully equipped. The College of Medicine was opened in 1851 and the College of Law in 1870. The present magnificent main building of the College was begun in 1878. Since its erection, the College buildings, exclusive of the departments of Medicine and Law, present an aggregate frontage of about eight hundred feet. They are surrounded by grounds comprising seventy-eight acres, a large part of which is occupied by the "Walks," whose sylvan beauty has made them famous.

STUDIES.

The course of studies at Georgetown is that generally pursued in colleges of the Society of Jesus. The classes of the Collegiate Department are four in number, corresponding to the Freshman, Sophomore, Junior, and Senior years, but known in our own traditional terminology as the Schools of First Grammar, Poetry, Rhetoric, and Philosophy. The Preparatory Department also consists of four classes, though of these the first two are so arranged as to be completed in a single year by students possessed of capacity or industry above the average.

The plan of studies is based on the conviction that a complete liberal education should aim at developing all the powers of the mind, and should cultivate no one faculty to an exaggerated degree at the expense of the others. During the early part of the preparatory course, the student's attention is principally devoted to acquiring an accurate knowledge of his native tongue and of elementary Mathematics, with all the branches ordinarily taught to children from twelve to fifteen years of age. At the same time the rudiments of the Latin language are mastered, and the study of grammar is thus made from the beginning comparative and analytical. By means of constant oral and written exercises, the methods of teaching are rendered thoroughly practical. In the second year, Greek is begun, followed, in the third year, by French, or German.

As the pupil advances, his judgment is exercised more and more, while less attention is given to mere memory work. When, after at least three years of preparation, he reaches the college course, properly so called, he is supposed to be able to read with some facility Latin, Greek and French, and perhaps German; to be thoroughly familiar with the grammars of these languages; in a word, to have the tools of literary work in some degree under his control. He then devotes himself for a year more particularly to the cultivation of his literary taste and powers by reading and imitating the best models of ancient and modern literature. The following year is given in great part to the training of the imagination; the nature of poetry is explained, the technicalities of verse-making are mastered and practiced, and the great poets are carefully studied. Then comes the year of Rhetoric, during which the student's critical powers are exercised and developed, poets and prose writers are scientifically analyzed, the principles of oratory are carefully examined, and the speeches of the world's greatest orators are read and discussed. The last year of the course serves especially to discipline the reasoning faculties by the study of Logic, Metaphysics, and Ethics, and by higher studies in Mathematics and Natural Sciences. During this year great attention is given to Metaphysics, a thorough mastery of which is regarded as of the utmost importance, since it serves to arrange systematically all the student's knowledge and to furnish the key to all true science.

While this literary and Philosophical training has been going on, the course of mathematics has been steadily continued, and Natural Science, in its various branches, has been taken up as soon as the development of the mind would admit of its being pursued in a systematic and really scientific way. Whatever is important in Natural Science is made a part of the curriculum, and is taught with a philosophical analysis intended to guard the student against that confounding of mere information with learning which is the danger of modern education. Physics, Mechanics, Geology, General and Analytical Chemistry, all form important parts of the regular obligatory series of studies.

This course is calculated to develop and train all the powers of the mind, rendering it capable of understanding and appreciating all branches of learning. It serves as a foundation for special training in any branch that the student, with his mind mature and trained, may decide to take up.

The successful completion of this course is rewarded with the degree of Bachelor of Arts.

When this point is reached, the University offers her graduates special training in several branches, at their option. The schools of Medicine and Law have long been established, and, during the past two years, the Postgraduate schools of Philosophy, Literature, and Science have been revived and greatly extended. In these, several courses lead to the degree of Master of Arts. It is desired to add as soon as possible, to the departments already existing, a School of Engineering.

But in the undergraduate department, the same course is obligatory upon all; to render it in any considerable degree elective would be to defeat its very end and aim. Hence, elective studies are few and merely incidental to established lines of work. From this prescribed course exemptions will not be granted.

No provision is made for an exclusively English or Commercial Course, and only students who intend to follow the full classical curriculum will be admitted.

A special class is organized for the benefit of older students who, being well versed in the ordinary English branches, desire to advance more rapidly in the classic languages.

LECTURES, ETC.

The students of the more advanced classes, accompanied by one of their Professors, are sometimes permitted to attend the lectures of the Smithsonian Institution, special lectures in the Law Department, the debates in Congress, or the pleadings before the Supreme Court, when interesting and instructive subjects are under discussion.

RELIGIOUS INSTRUCTION.

Religious instruction is considered of the first importance in education.

Catechism forms one of the regular class recitations, and weekly catechetical lectures are attended by all. The prize for Christian Doctrine is awarded to the author of the best paper upon the matter of these lectures. Further instruction is given to such as have need of it, or are preparing for the Sacraments. For the development of piety there are two Sodalities, which meet weekly. All Catholic students are expected to approach the Sacraments at least once a month.

DEGREES.

The degree of Bachelor of Arts is conferred upon students who have made the regular course and have passed satisfactory examinations in the English branches of study, the Latin and Greek Classics, French or German, Mathematics, including Differential and Integral Calculus, Chemistry, Physics, Mechanics, and Rational Philosophy.

The degree of Master of Arts, in course, is conferred upon Bachelors of Arts who have followed, for at least one year, the prescribed number of Postgraduate courses of study, and have passed satisfactory examinations therein.

The candidate for the degree of Bachelor or Master of Arts is required to compose an essay on some literary, scientific, or moral subject, which, if accepted by the Faculty, must be left in the archives of the College.

Honorary degrees are conferred, at the discretion of the Faculty, upon those who unite proficiency in the Classics with eminence in Literature, Science, or the Professions.

SESSIONS AND HOLIDAYS.

The Academic year is divided into two terms:

The first term begins usually on the second Thursday in September and ends on the last day of January. The second term begins on the 2d of February and ends with the annual commencement on the third or fourth Tuesday of June.

The Christmas recess begins on the 23d of December and ends on the 2d of January. The Easter recess extends from Wednesday in Holy Week until the Wednesday after Easter, exclusive.

Students who overstay the time specified will be deprived of the privilege of returning home at the next recess. Hence parents and guardians are urged to observe the limits set for the recesses that occur during the year.

No schools are taught on Wednesday and Saturday afternoons, nor on days of general religious or national observance.

The classes begin at 8.45 A. M., and continue until 12. They are resumed at 3 and continue until 5 P. M.

EXAMINATIONS.

A General Examination in all classes is held toward the close of each term.

Promotions ordinarily take place at the beginning of the first term. They will be made, however, at any time during the year, when warranted by the progress of the student.

AWARDS AND REPORTS.

The prizes, at the Annual Distribution in June, are awarded to those who, by their class exercises during the year and the excellence of their examinations, attain the required number of marks. As marks are not made up to absentees, parents who permit their sons to remain at home beyond the period allotted for vacation or recess cannot expect to see them hold distinguished places in their classes.

Besides the Annual Distribution of Awards, the Faculty and students are assembled at the beginning of every month, when the marks and the standing of the students in their respective classes for the preceding month are publicly proclaimed, and testimonials awarded to those who have attained the prescribed degree of excellence.

A quarterly report of the standing in class, the progress and general conduct of each student is sent to his parents or guardians.

REQUIREMENTS FOR MATRICULATION.

Students may enter at any time during the session, and, on examination, will be assigned to the class for which their prior attainments have fitted them.

Satisfactory testimonials of good conduct will be required from those who come from other institutions.

Candidates for admission to advanced classes must pass a satisfactory examination upon all the subjects previously studied by the class which they propose to enter.

From certain preparatory schools of established reputation students are admitted to the School of First Grammar, or Freshman Class, without examination, upon the Principal's certificate that they have completed the required amount of work and are prepared to enter College.

In all other cases, for admission to this class, a successful examination is required in the following subjects, or their equivalent:

LATIN.—The entire Latin Grammar, including a knowledge of all regular syntactical constructions, and of the outlines of Prosody. Translation into Latin at sight of complex English sentences, entailing the application of rules for *Oratio Obliqua* and for conditional sentences. Nepos' Lives, to end of life of Alcibiades, also the life of Atticus. Phædrus' Fables, two books. Cicero's Selected Letters, five hundred lines. Cæsar's Commentaries, two books. Ovid's Metamorphoses, one thousand lines. An equivalent from the Elegies, or from Virgil's Bucolics or Georgics, will be admitted instead of a portion of the Metamorphoses.

GREEK GRAMMAR.—Etymology, complete (including all irregular and defective forms), and the outlines of Syntax. Translation into Greek of simple English sentences. Xenophon's Anabasis, Books I and II. Lucian's Dialogues (Græca Minora).

N. B.—In the discussion of the classic authors, both Greek and Latin, the candidate must be prepared to give a thorough grammatical analysis of every word and phrase.

ENGLISH.—An English composition will be required evidencing thorough mastery of the grammar and some proficiency in descriptive and narrative writing.

HISTORY.—A general outline of History, both ancient and modern.

MATHEMATICS.—Arithmetic, entire. Algebra to end of Quadratics. Geometry, Plane and Solid. (Wentworth's Complete Algebra, and Wentworth's Geometry, or works of equal grade.)

MODERN LANGUAGES.—The elements of French or German grammar and some proficiency in translation and analysis.

Course of Studies

PRESCRIBED FOR THE

DEGREE OF BACHELOR OF ARTS.

SCHOOL OF FIRST GRAMMAR.

Freshman.

Latin.—Sallust; Cicero—De Senectute, De Amicitia, Epistolae; Virgil—Eclogues, the Æneid; Yenni's Latin Grammar completed; Syntax reviewed; exceptions, idioms, figurative construction; Latin Composition, Casserly—Prosody; Exercises in Metrical Composition; Sight rendering from various Latin authors; Practice in speaking Latin.

Greek.—Xenophon—Hellenica; Homer—Iliad; Yenni's Greek Grammar, completed; Themes.

English.—Burke's Lingard's History of England; Fiske's Antiquities (Grecian); Meiklejohn's "The English Language," Parts III., IV.; Laws of Versification; Connolly's English Reader; Declamation; Compositions in Prose and Verse; De Harbe's Full Catechism, completed.

Mathematics. — Wentworth's Complete Algebra, finished.

French.—Dufour—French Grammar, Manuel de Prononciation; French Reader, completed.

German.—Schmitz's German Grammar; Evans' Otto's German Reader.

SCHOOL OF POETRY.

SOPHOMORE.

LATIN.—1*st Term.*—Virgil—The Æneid; Livy; Horace's Ars Poetica; Casserly—Prosody; Lectures on Poetry; Du Cygne's Ars Rhetorica.

2*d Term.*—Cicero's Orations; Horace's Odes and Epodes; Lectures on Poetry; Compositions in Prose and Verse; Du Cygne's Ars Rhetorica.

Both Terms.—Sight reading from various Latin authors; Practice in speaking Latin.

GREEK.—*Both Terms.*—Homer—the Iliad; the Olynthiacs of Demosthenes; Yenni's Greek Grammar; Greek Prosody; Themes.

ENGLISH.—Lectures based on Brooke's English Literature; Coppens' Rhetoric; Analysis—Hales' Longer English Poems; Johnston's History of the United States; Fiske's Antiquities (Roman); Declamation; Compositions in Prose and Verse; Doctrinal Exposition of Religion; Church History—lectures by the professor.

MATHEMATICS.—Wentworth's Trigonometry and Surveying; Analytical Geometry.

SCIENCE.—Chemistry—Remsen's Introduction to the Study of Chemistry; Remsen's Organic Chemistry; Remsen's Laboratory Manual; Laboratory Practice under direction of professor.

SCHOOL OF RHETORIC.

JUNIOR.

LATIN.—1*st Term.*—Cicero's Orations; Quintilian; Horace's Satires and Epistles; Lectures on Rhetoric; Du Cygne's Ars Rhetorica.

2d Term.—Cicero's Orations; Tacitus' Agricola and Germania; Juvenal; Lectures on Rhetoric; Compositions in Prose and Verse.

Both Terms.—Sight reading from various Latin authors; Practice in speaking Latin.

GREEK.—Demosthenes on the Crown; The Œdipus Tyrannus of Sophocles; Themes.

ENGLISH.—Coppens' Rhetoric, completed; Lectures based on Brooke's English Literature, completed; Analysis—Hales' Longer English Poems; Story on the Constitution of the United States; Declamation; Compositions in Prose and Verse; Doctrinal Exposition of Religion, completed; Church History, completed—lectures by the professor.

MATHEMATICS.—Taylor's Differential and Integral Calculus.

SCIENCE.—Chemistry—Laboratory Course of Qualitative Analysis, under direction of professor; Tarr's Qualitative Analytical Chemistry; for advanced students, Quantitative Analysis.

SCHOOL OF PHILOSOPHY.

SENIOR.

RATIONAL PHILOSOPHY.—Russo's Logic and Metaphysics; Russo's Ethics and Natural Right. Public and Private Disputations; Papers for graduation and honors, six times in the year.

NATURAL SCIENCE.—Physics and Mechanics—Sheldon's Revision of Olmsted's College Philosophy; Thompson's Electricity and Magnetism; Laboratory Practice. Newcomb and Holden's Astronomy; Le Conte's Geology. Public lectures by the students; Papers for graduation and honors, six times in the year.

Declamation.

THE POSTGRADUATE COURSE.

The courses of higher studies for graduates, which have existed in Georgetown College at intervals for the past forty years or more, were revived in a more extended and varied form at the beginning of the scholastic year 1891-1892. During the year just passed, the number in attendance has greatly increased, and the results have been so gratifying as to justify the recognition of the graduate classes as a permanent department of University training.

OBJECT. The course is intended for those graduates who desire to continue and extend to the highest attainable degree their education in the Arts and Sciences, whether it be for the mere love of learning, or to qualify themselves as professors, or finally with a view to a more complete preparation for some one of the learned professions, by devoting themselves to liberal studies cognate to the career aimed at, but of a more elevated scientific character than can be attained in the ordinary professional schools of the country.

The courses, if pursued to the full extent recommended, are ample enough to tax the energies of any student. It would therefore be more satisfactory to devote an entire year to them before entering upon the study of Law or Medicine. Yet, it is possible to pursue the postgraduate branches simultaneously with the study of these professions in the schools of Georgetown University.

ADMISSION. All who are graduates of Georgetown College, or who present the diplomas of institutions of like standing, are admissible to this course.

STUDIES. An elenchus of topics in the various branches will be found subjoined. The class work is carried on by lectures, direction in reading, and practical guidance on the part of the professor, and by the repetitions and written papers of the student. All are required to follow the course in Rational Philosophy. The other courses are elective ; but at least three distinct subjects must be chosen, involving a minimum of eight hours' attendance at lectures per week. The laboratories will be open daily for eight hours.

In order to profit fully by the course in Literature, a reading acquaintance with either French or German is necessary, and both languages are desirable.

DEGREES. On those holding the degree of Bachelor of Arts, the degree of Master of Arts will be conferred after one year's study and satisfactory examinations in three courses. The theses, monographs, essays, etc., that constitute the examination papers will be assigned at progressive stages of the lectures. The requirements for other degrees are analogous to those for Master of Arts.

TIME. The yearly session opens on the first Monday of October, and closes on the third or fourth Tuesday of June.

ADVANTAGES. Students have the privilege of consulting their professors beyond the class hours. Under the direction of the respective lecturers, they are permitted the use of the Riggs Library, the Cabinet of Physics, the Physical and Chemical Laboratories of the College, and the scientific collections of the Coleman Museum.

PRIZES. A purse of twenty-five dollars is offered for competition in each of the courses when followed by more than one graduate, and another purse of the same amount to the student who gains the highest aggregate standing in all courses.

FEES AND EXPENSES. The charge for tuition is $60 for the entire course. The Master's Diploma is $10. Room, board, and washing need not exceed $300 for the year. Text-books will not ordinarily exceed $8 or $10. Hence, it will be seen that all expenses will come within $380.

FACULTY
OF THE POSTGRADUATE DEPARTMENT.

REV. J. HAVENS RICHARDS, S. J.,
President.

REV. THOMAS E. MURPHY, S. J.,
Vice-President, Prefect of Studies.

REV. MICHAEL H. O'BRIEN, S. J.,
Professor of Metaphysics and Ethics.

REV. JOSEPH M. WOODS, S. J.,
Professor of General Literature and Philology.

REV. ALPHONSE DUFOUR, S. J.,
Professor of French Literature.

REV. DANIEL J. MacGOLDRICK, S. J.,
Professor of History.

JAMES F. DAWSON, S. J.,
Professor of Mathematics and Physics.

J. BARRY SMITH, S. J.,
Professor of Chemistry.

REV. JAMES F. X. MULVANEY, S. J.,
Librarian.

REV. JOHN A. CHESTER, S. J.,
Treasurer.

I. COURSE OF METAPHYSICS AND ETHICS.

FOUR HOURS PER WEEK.

1. METAPHYSICS. A more particular and precise treatment of questions of the day depending upon Psychology.

2. NATURAL THEOLOGY. The Concept, Existence and Attributes of the Deity from the standpoint of reason, developed in refutation of current errors.

3. ETHICS. Conclusion of the Moral Philosophy begun in the undergraduate course.

The Right of Property. Socialism. Communism. Private Property and its Opponents. Capital.

The State: Its Origin, Object, Constitution, Nature, Limits. Church and State. Church and School. Functions of the Civil Power. Sociology.

Political Economy.

International Law. The *Jus Gentium* in General: in Times of Peace; in times of War. Treaties. Principles of Nationality. The Family of Nations.

II. COURSE OF LITERATURE.

TWO HOURS PER WEEK.

1. GENERAL LITERATURE. (a) Preliminaries. A Survey of Early Oriential Literatures. Greek—The Age of Pericles. Latin—The Age of Augustus. The Middle Ages. The Neo-Latinists. Italian—The Age of Leo X. Spanish—The Age of Philip II. German—The Classic and Romantic Schools. Russian—The Nineteenth Century.

(b) Some Christian Classics of the First Five Centuries. Greek—Clement of Alexandria, Eusebius, St. Gregory of Nazianzus, St. Bazil, St. John Chrysostom, Synesius. Latin—Minucius Felix, Tertullian, St. Hilary of Poitiers, St. Ambrose, Prudentius, St. Jerome, St. Augustine, St. Paulinus of Nola, Salvian, Sedulius, Boethius.

(c) Sketches of the Literatures of the East: Hebrew, Sanskrit, Zend, Assyrian, Egyptian, Persian, Arabic and Chinese.

2. ENGLISH LITERATURE. (a) Philology. The English of Chaucer, of Shakespeare, of Dryden and of Newman. The Grammar and Vocabulary of each Period, together with analytical reading of the best authors.

(b) History of Literature from Beowulf to the present decade. American Literature.

(c) Advanced Rhetoric. The application of principles to the various forms of composition in prose and verse, with a view to authorship. Criticism. Analysis of masterpieces.

3. FRENCH LITERATURE. (a) Philological Section. Formation of the Language. Its Development and Present State. *L'Académie.*

(b) Historical Section. French Literature from the *Chanson de Roland* to the last Conference of Monsabré.

(c) Practice of French in the Writing of Prose and Poetry, Conversation and Declamation. The purpose is to attain not only to an easy mastery of the language, but to its literary use.

III. COURSE OF HISTORY.

TWO HOURS PER WEEK.

1. (a) The Theory of Historical Writing. Investigation of methods pursued by popular English Historians.

(b) General Introduction to History. Monuments. Numismatics. Traditions. Chronicles. Annals. Classic History. Philosophic History.

(c) Principles of Chronology.

2. The Constitutional History of Greece, Rome, England and the United States.

IV. COURSES OF MATHEMATICS.

A. Three Hours per Week—Quaternions. B. Three Hours per Week—Determinants. Theory of Equations.

V. COURSES OF PHYSICS.

A. Three Hours per Week—Theory of Electricity. Theory of the Dynamo. B. Three Hours per Week for One Term—Thermodynamics.

VI. COURSES OF CHEMISTRY.

Lectures—Three Hours per Week. Laboratories open Eight Hours per day.

Laboratory Courses. (a) Quantitative Analysis, Gravimetric and Volumetric. (b) Physical Chemistry. (c) Determinative Mineralogy, including Blowpipe Analysis and the simpler processes of Furnace Assaying. (d) Synthesis and Analysis of Carbon Compounds.

Lectures. Chemical Philosophy. Hydrocarbons and their Derivatives.

SUPPLEMENTAL COURSES.

Series of lectures on subjects of general interest will be arranged as opportunities arise during the year.

PREPARATORY DEPARTMENT.

FACULTY AND OFFICERS.

REV. J. HAVENS RICHARDS, S. J.,
President.

REV. THOMAS E. MURPHY, S. J.,
Vice-President; Prefect of Studies and Discipline.

L. EUGENE RYAN, S. J.,
Lecturer on Christian Doctrine to the Classes of Rudiments; Head Prefect of Discipline, Junior Division.

FRANCIS J. McNIFF, S. J.,
Teacher of the Classes of Second Grammar and Second French.

PATRICK F. O GORMAN, S. J.,
Teacher of the Class of Third Grammar, Div. B,

GEORGE B. ROSE, S. J.,
Teacher of Third Grammar, Div. A, and First Arithmetic; Secretary to the Vice-President.

REV. ALPHONSE DUFOUR, S. J ,
Teacher of Special Classics.

CHARLES F. BRIDGES, S. J ,
Teacher of the Class of First Rudiments.

REV. WILLIAM J. RICHLEY, S. J.,
Teacher of the Class of Second Rudiments.

REV. EDWARD McTAMMANY, S. J.,
Teacher of the Class of Third French, Div. A.

REV. DANIEL J. MACGOLDRICK, S. J.,
Teacher of the Class of Third French, Div. B.

MICHAEL A. MESS, A. M.,
Teacher of German.

REV. JOSEPH J. PRENDERGAST, S.J.,
Teacher of Lower Algebra, Div. A.

WILLIAM J. COLLINS,
Teacher of Lower Algebra, Div. B.

CHARLES G. LYONS, S. J.,
Assistant Teacher and Assistant Prefect of Discipline.

PATRICK H. O'DONNELL, A. B.,
Teacher of the Class of Book-keeping.

PATRICK J. CARLON,
Teacher of the Second Class of Arithmetic.

THOMAS Q. GARVEY,
Teacher of Stenography; Secretary to the President.

REQUIREMENTS FOR ADMISSION TO THE PREPARATORY DEPARTMENT.

Boys will be received in this department who have reached the age of twelve years, and who are so far developed in mind, and so well acquainted with the elements of English, as to enable them to begin with profit the study of Latin. Arithmetic must be known to the end of Fractions.

COURSE OF STUDIES

IN THE

PREPARATORY SCHOOLS.

RUDIMENTS.

SECOND CLASS.

LATIN.—Yenni's Latin Grammar.

ENGLISH.—Weld and Quackenbos' English Grammar; Mitchell's Geography; Appleton's Fourth Reader; Sargeant's Etymology; Kerney's First Class Book of History; Gilmour's Bible and Church History; Catechism; Written Exercises; Declamation.

ARITHMETIC.—Wentworth's Common School Arithmetic as far as Percentage; Penmanship.

FIRST CLASS.

LATIN.—Yenni's Latin Grammar; Historia Sacra; Themes.

GREEK.—Yenni's Greek Grammar; Witticisms of Hierocles; Æsop's Fables; Themes.

ENGLISH.—Weld and Quackenbos' English Grammar; Connolly's English Reader; Sargeant's

Etymology; Mitchell's Geography; Kerney's First Class Book of History, completed; Gilmour's Bible and Church History, completed; Catechism, completed; Written Exercises; Declamation; Penmanship.

ARITHMETIC.—Wentworth's Common School Arithmetic, completed; Mayhew's Bookkeeping.

SCHOOL OF THIRD GRAMMAR.

LATIN.—Cicero's Selected Letters; Nepos; Phædrus; Scanning of Phædrus; Yenni's Latin Grammar; Latin Composition.

GREEK.—Yenni's Greek Grammar; Æsop's Fables, continued; Xenophon—The Anabasis; Themes.

ENGLISH.—Meiklejohn—The English Language, Part I.; Mitchell's Geography, completed; Fredet's Ancient History; Connolly's English Reader; Declamation; Compositions; De Harbe's Full Catechism.

ALGEBRA.—Wentworth's Complete Algebra to Logarithms.

FRENCH.—Dufour—French Grammar, Etymology; French Reader.

GERMAN.—Schmitz's German Grammar; Evans' Otto's Reader.

SCHOOL OF SECOND GRAMMAR.

LATIN.—Cicero's Selected Letters; Cæsar's Commentaries; Ovid's Elegies and Metamorphoses; Scanning of Ovid; Yenni's Grammar; Latin Composition; Casserly—Prosody.

GREEK.—Xenophon—The Cyropædia; Lucian's Dialogues (Græca Minora); Yenni's Greek Grammar; Themes.

ENGLISH.—Meiklejohn—The English Language, Parts I., II. ; Fredet's Modern History ; Fisk's Classical Antiquities (Ancient Geography and Mythology); Connolly's English Reader ; Declamation ; Composition ; De Harbe's Full Catechism.

ALGEBRA.—Wentworth's Geometry, Plane and Solid.

FRENCH.—Dufour—French Grammar, Seconde Partie, De la Syntaxe; French Reader, continued.

GERMAN.—Schmitz's German Grammar; Evans' Otto's Reader.

Terms.

REGULAR CHARGES.

Boarders:	Tuition, Board, Lodging, Washing, and Mending of Linen for the Scholastic Year	$325 00
	Medical Aid and Medicines	10 00
	Library Fee	2 00
		$337 00

$168.50 payable invariably in advance at the beginning of every half-year. A deposit must also be made, sufficient for pocket money and other incidental expenses. This need not exceed $20.

Half Boarders:	Tuition, yearly	$60 00
	Dinner at the College, yearly	50 00
	Library Fee	2 00
		$112 00

Day Scholars:	Tuition, yearly	$60 00
	Library Fee	2 00
		$62 00

In the classes of Poetry and Rhetoric there is a charge of $10 per annum for the use of chemicals.

In the class of Philosophy there is a charge of $10 for the use of Philosophical and Astronomical instruments.

Graduation Fee	$10 00

EXTRA CHARGES.

Private room (allowed only to students of the higher classes), with fuel, light, and attendance, per annum	$80 00
Use of Piano, per annum	12 00
Spanish, German, and Italian, per annum	30 00
Drawing or Painting, per annum	50 00
Stenography, per annum	20 00
Music (Piano, Violin and other Orchestral Instruments, Banjo, Guitar, Mandolin), $15 per quarter of 20 lessons.	
Mending of clothes and shoes at moderate rates.	

All accounts must be paid half-yearly in advance. If a student is withdrawn before the end of a session, no deduction will be made, except in cases of sickness or of dismissal, nor will any deduction be made for a shorter time than one month.

Degrees will not be conferred upon students whose debts to the College remain unpaid.

Articles of clothing will not be furnished by the College, unless a deposit for that purpose be left with the Treasurer, who will give a detailed account of its outlay in his regular semi-annual statement.

No bill for clothing or other articles will be acknowledged unless the purchase has been authorized by the Treasurer of the College.

Books and stationery, if not supplied by the parents or guardians themselves, will be furnished by the College at moderate prices.

Whatever sums parents or guardians may allow their sons or wards for pocket-money must be deposited with the Treasurer, who will disburse the same according to instructions received or as circumstances may require. *No advance will be made beyond the deposit.*

Every student from beyond the United States must have a guardian in the vicinity, who shall be responsible for his bills and receive him in case of dismissal.

General Regulations.

No distinction is made in the reception of students on the ground of religious belief, but all the boarders are required to be present at the public exercises of religion.

No student will be allowed to remain at the College during the summer vacation.

The introduction of intoxicating liquors, as well as of immoral books or papers, will render the offender liable to expulsion, as will any grave offence against morals or discipline.

The use of cigarettes is prohibited even to senior students.

The younger students are kept apart from the older, and their dormitories, study hall, play-ground, etc., are entirely separate. They are forbidden the use of tobacco in any form.

BOARDERS.

It is important that boarders should come provided with a full supply of clothing for both summer and winter. They must also bring with them six towels and the same number of napkins, with a napkin-ring. Linen and all articles of clothing must be marked with the owner's full name.

Boarders are forbidden to leave the College grounds without permission. Violation of this rule will render the offender liable to expulsion. Leave to visit the city, except in the company of some member of the Faculty, will not be given without the written authorization of parents. To Junior students this privilege is not granted.

Students whose parents reside in the District will ordinarily be permitted to visit them on the last Saturday of each month and to remain with them until Sunday evening.

The College Authorities reserve to themselves the discretionary power of opening all letters to students, not known to be from parents or guardians.

To avoid serious loss of time from study, the students are prohibited from receiving daily newspapers regularly, as individual subscribers. The principal papers, however, as well as other periodicals, are kept on file in the reading room.

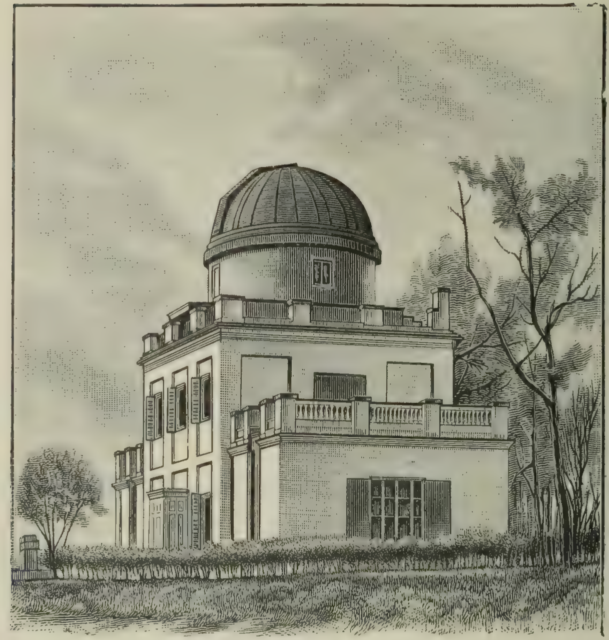
DAY-SCHOLARS.

Day-scholars and half-boarders, while within the College walls, are subject to all the rules and regulations for boarders.

They are required to attend the mid-day studies at the College.

Punctual attendance at class is required, and no day-scholar, after absenting himself or coming late, will be received in class without a note from a parent or guardian, countersigned by the Prefect of Studies.

Day-scholars are forbidden to take out letters or perform errands for boarders.



THE OBSERVATORY.

STAFF OF THE OBSERVATORY.

REV. JOHN G. HAGEN, S. J.,
Director.

REV. GEORGE A. FARGIS, S. J.,
REV. JOHN T. HEDRICK, S. J.,
Assistant Astronomers.

JOHN J. O'KEEFE, S. J.,
Attendant.

At a distance of about four hundred yards from the College, on a prominent hill, is the Astronomical Observatory, the main building of which is sixty feet long and thirty feet wide.

I. The structure is divided from east to west into three rooms. The eastern room contains a meridian circle, by Troughton & Simms, of London. The divided circle has a diameter of forty-five inches, reading by four microscopes to fractions of seconds. The aperture of the object glass is four inches. In the western room is mounted a transit instrument, by Ertel & Son, of Munich. It is seven feet long and has a four and one-half inch object-glass. This instrument is fitted with a photochronograph. The middle part of the Observatory is three stories high, surmounted by a rotary dome eighteen feet in diameter. Here has been erected the new twelve-inch equatorial, which is now entirely completed. This telescope, with its accessories, is the result of the generous donation made three years ago by an unknown friend in New York.

In the room below the dome is the library containing the Observations and other publications of nearly all the observatories of the world. The other scientific works on mathematics and astronomy formerly comprised in this collection have been incorporated with the Riggs Library of the College, where they will be of easier access to professors and students.

Under the library is the clock-room, with four pendulum clocks and two chronometers, one cylindrical chronograph, and the switchboard, from which all the connections for electric light and time signals are made. A special line connects the switchboard with the United States Naval Observatary.

With pleasure we state that the desire expressed in last year's Catalogue of having the Observatory provided with electric light from the city has been fulfilled. All the rooms have been furnished with incandescent lights, of twenty-candle power each.

A separate dome, twelve feet in diameter, on the southwest brow of the hill, shelters the old equatorial, by Troughton & Simms, which has an aperture of nearly five inches.

An extension to the main building, on the east side of the meridian-circle room, contains an instrument for the determination of the variations of latitude. It has a photographic object-glass of six inches aperture, and is provided with a double photochronograph especially devised for this purpose.

The Staff of the Observatory has not been changed, and consists, as during the past two years, of the Director, two assistant astronomers and one attendant.

Reverend Father Joseph Algué, S. J., from Spain, has completed two years of preparation at this Observatory, and will now take charge of the new observatory in Manila.

II. The use made of the instruments has been as follows:

The *small equatorial* has been devoted during the past three years to work on variable stars, which serves as preparation for a large plan laid out for the new 12-inch equatorial. The completion of this task will require about six years more.

Incidentally to this plan, several new variable stars have been discovered in the course of the past two years, and the light periods of most of them determined.

The *new* 12 *inch equatorial* has been used for photographing double stars. The photographic corrector, made by Mr. J. Clacey, has been put to a severe test and proves to be excellent. Rev. Father Fargis has succeeded in photographing double stars as close as Castor and Gamma Leonis by a very short exposure. The method is a novel one, emyloying the photochronograph, and has been described in the *Astronom-*

ische Nachrichten (No. 3058, pp. 178-186). For wider pairs a 6-inch photographic lens has been used with advantage. The results of these photographs of double stars will be published in the course of the coming year.

The photographic work done with the *Ertel transit instrument* comprises about three thousand plates, and is nearly ready for publication. The observations extended over two years, and their computation has required about the same time.

As a specimen of this work some preliminary results regarding the star *Sirius*, have been published in the *Astronomische Nachrichten* (No. 3146, page 23 ss.).

Another article connected with this work appeared in the *Monthly Notices* of the R. A. S. (Nov. 1892,) from the pen of the Rev. Father Hedrick, S. J., regarding the "Probable Error of the Clock Correction."

We may be allowed to mention in this place a mathematical publication of the Director of the Observatory, although it is not directly connected with astronomical work. The first volume of his *Synopsis of Higher Mathematics* has been reviewed in the principal European languages, and the general plan of the work has been unanimously approved by the reviewers. We mention, in particular, only the last in the "Annals of Mathematics" (March, 1893, pages 85–87), from the pen of Prof. W. B. Smith, of the University of Missouri. According to this author, "a more useful labor than this in the present condition of mathematical literature can hardly be imagined."

The second volume of this *Synopsis* is now going through the press, but the third and fourth volumes are needed to complete the work, and their preparation will probably take six years more.

To return to our astronomical observations, many experiments have been made here in the line of *determining the latitude by means of photography.* Three different methods have thus far been tested at our Observatory, for the first time, and have been found practicable.

The first of these is that by the *Floating Zenith Telescope*, which has been fully described in our last publication.

The second method has been tried by Rev. Fr. Algué, S. J., during the past year. He has devised a new instrument—*The Reflecting Zenith Telescope*—which has been constructed by Mr. G. N. Saegmuller, of Washington.

A description of this instrument, with theory and results, has just been published and distributed.

The third method consists simply in replacing the micrometer of an *ordinary zenith telescope* by a photographic camera with photochronograph attached. This method, obvious as it is, had never been tried until the thirteenth of the present June, when the latitude of our Observatory was determined in this way with an instrument of Mr. G. N. Saegmuller, which is now on exhibition at the World's Fair in Chicago.

There are thus three photographic methods of determining latitudes, tested for the first time at this Observatory. Each of them has its own advantages and disadvantages, and it will be a matter of opinion with observers to which to give the preference.

III. After gathering all this experience it is felt that the time has now arrived for replacing our present latitude instrument, which had been purposely constructed in a rudimentary and cheap way, by a new one of the finest construction. Now that our observers know precisely what the instrument ought to be, the sum of one thousand dollars may be invested in its construction without danger of waste.

As our Alumni and friends are aware that the Observatory has no endowment, they cannot fail to see that there is here an object worthy of their generosity and love for their *Alma Mater*.

The *meridian circle* has not been in use, except for instruction. It is desired to dispose of this instrument and replace it by a new photographic transit of nine inches aperture. The results reached with the small Ertel transit instrument in the line of determining star places free from "personal equation" are so promising that the pecuniary outlay necessary for a larger instrument would be fully justified. Indeed, it would be much more than compensated by a fundamental star catalogue to be produced by a perfect nine-inch photographic transit instrument.

An appeal to friends and patrons of the College in behalf of this instrument was made in the two last Catalogues, and is now urgently renewed. The cost of this instrument will be five thousand dollars.

THE DEPARTMENT OF PHYSICS.

The Physical Department occupies an entire floor of the east building in the south row. Adjoining the lecture-room is a well fitted laboratory, in which the students are taken through a systematic course of laboratory work, particular attention being paid to electrical measurements. The cabinet contains all the instruments needed for a thorough course of Physics.

CHEMICAL DEPARTMENT.

In Chemistry the College is remarkably well equipped, both in point of a large stock of apparatus, and of excellent facilities for work. The new laboratory, in the main building, is supplied with every requisite appliance. Each of the forty desks is fitted with drawers and lockers, separate drainage and water supply, and gas for both heating and illuminating purposes. There are also improved filtering apparatus, excellent furnace-chambers, blow-pipe tables, powerful furnaces for crucible operations, water-baths, drying ovens, etc. This laboratory is used by students in Qualitative Analysis and General Chemistry, a laboratory course in the latter being required in addition to the regular lecture and daily repetition. A new lecture-room has also been added, and is all that could be desired. For quantitative analysis and assaying, offered as electives to graduate students, there is also a complete line of instruments and supplies.

THE COLEMAN MUSEUM.

As early as the year 1840 the collections in Natural History, under the care of Fathers James Curley and T. Meredith Jenkins, had become sufficiently extensive to warrant the setting apart of a special room for their preservation and exhibition. Here they remained until 1889, when, during the Centenary Celebration, they were transferred to their present magnificent quarters, in the north pavilion of the main building. To this hall, by decree of the Faculty, was given the name of James V. Coleman, '69, in acknowledgment of his distinguished benefactions to the College. It is a spacious, lightsome room, fitted with numerous cases of various designs, all made of cherry wood, highly polished.

During the past two years the various collections have all been newly classified and labeled, and displayed to the best advantage. Particular attention has been given to the mineral collection, which embraces specimens illustrating the entire field of Mineralogy, many of them being unique. Besides the exhibition series, numbering over 2,000 minerals, there is a fine working collection carefully determined and arranged in drawers for the convenience of students. In Geology and Paleontology, likewise, there are excellent collections, the rocks and fossils alone, arranged stratigraphically, occupying an entire row of double cases. Notable among the latter is the unusual number of specimens of the remains of vertebrates, many collected in Alaska. The shell collection is very large, and has long been admired for the beauty and variety of the specimens. The Herbarium, containing many thousand plants, is now being remounted on the new form of sheets adopted by the National Herbarium in the Department of Agriculture. Specimens of particular interest are from time to time displayed in a set of swinging glass frames constructed for the purpose.

Though its principal object is the instruction of the student, the Museum contains many exhibits of interest to the visitor, among which may be mentioned the splendid collections of coins and medals, the numerous ethnological curios, and the relics of colonial times in Maryland.

But the object of greatest admiration is a large Mosaic picture, five feet by three, the gift of Mr. Coleman in memory of his deceased wife. It was made in the great studio of Mosaic in the Vatican for the celebrated exporter and connoisseur, Luigi Gallante, and is undoubtedly one of the largest and finest of its kind in the world. The scene represented is the "Benedictio Urbis et Orbis" by the Holy Father from the balcony of St. Peter's on Easter Day. The pieces are in many cases so small as to be scarcely discernible by the naked eye.

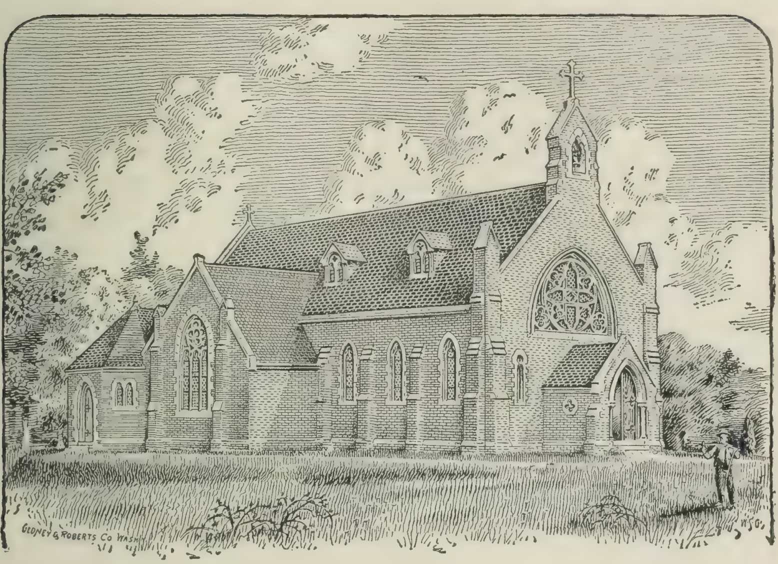
THE RIGGS MEMORIAL LIBRARY.

This fine apartment occupies the greater portion of the South Pavilion. It was founded by Mr. E. Francis Riggs, of Washington, as a memorial of his father, the late Mr. George W. Riggs, and his brother, Thomas Laurason Riggs, formerly a student of the College.

The elegance and convenience of the library are very great; in beauty and adaptation to its purpose it is judged to be unsurpassed in this country.

The collection of books is estimated at more than 60,000 in number, among which are many rare and curious works. There are one hundred volumes printed between the years 1472 and 1520, three manuscripts anterior to the year 1400, and others of later dates. A preliminary card catalogue has been begun, but is not yet complete.

During the past year additions have been made to the Library to the extent of about 400 volumes, chiefly by donation of friends. The Shea Collection has been catalogued and numbered. An analytical index has also been prepared, giving the history of every book in this remarkable collection, with notes on its contents. This work, performed by the assistant librarian, Mr. Harold Dijon, is of great interest and value.



THE CHAPEL OF THE SACRED HEART.

In the College Quadrangle stands the Chapel of the Sacred Heart of Jesus, measuring 109 feet in extreme length, and varying in breadth from 40 to 60 feet. This structure is the generous gift of the wife of an Alumnus, Mrs. John Vinton Dahlgren, and is intended as a memorial of her little son, Joseph Drexel Dahlgren, whose remains will be transferred to it. The Chapel was finished during the scholastic year, and on Friday, June 9th, 1893, was consecrated with imposing ceremonies. The seating capacity is about 500. The College thus possesses what it has so long and sorely needed, a spacious and beautiful structure, wherein the services of the Church may be performed with fitting solemnity and dignity.

THE ART AND HISTORICAL COLLECTIONS.

The College possesses the nucleus of a valuable collection of works of art, and a number of Maryland Colonial relics. It has long been the wish of the Faculty to increase these collections, and give them the prominence they deserve.

Among the paintings are the "Calling of St. Matthew," by Luca Giordano; a St. Joseph of exceptional excellence, by Guercino, and a portrait of the mother of Archbishop Carroll, by Gilbert Stuart. There is also a fine set of engravings of Raphael's frescoes, presented by Cardinal Bedini; a Roman mosaic, of great size and beauty, presented by James V. Coleman, Esq.; a bust of St. Aloysius, by Benzoni; a replica in bronze of Houdon's Washington, with a large number of ancient and modern pictures of less value.

NEEDS OF THE UNIVERSITY.

Without endowment, and deprived of all resources save the fees of the students, Georgetown College has grown from a struggling Academy to a University, which, with no undue commendation, may be called flourishing. Of late years several donations and legacies and the sale of property formerly considered almost worthless, have enabled her to liquidate a considerable portion of the debt incurred, and to supply herself with halls and facilities long needed. But much remains to be done to enable Georgetown to continue the development which has been steadily going on for a century.

The Faculty therefore appeal earnestly to the friends of the College and to all who are interested in the advancement of education, to assist them with funds for the erection of buildings, and the endowment of the various departments of the University.

Chief among the wants of the College are the following: A SCIENTIFIC SCHOOL, which would include the present classes of Natural Science, and would add to them the technical courses long contemplated. For the establishment of such classes, particularly in ENGINEERING, the present time is peculiarly opportune. Applications are constantly received from students who desire instruction in these branches; and professors of the highest degree of competence are ready to undertake the task. What is still needed is that some one possessed of sufficient means and impressed with the value of scientific education, should make this exalted purpose his own. A suitable structure could be erected for a sum not less than $30,000 or $40,000. For apparatus and equipment a like sum would be required; but this expenditure could be distributed over several years.

A GYMNASIUM and NATATORIUM, $30,000 to $40,000.

A free HOSPITAL in connection with the Medical Department, $75,000 to $100,000.

Besides these principal demands, many smaller wants are pressingly felt. Such are, the completion of the two beautiful stone porches of the new building, one of which is estimated at $6,000 and the other at $10,000; the finishing of certain halls in the same building, $6,000 to $10,000; the completion of the equipment of the Observatory and the foundation of a small working fund for the use of its Director, $10,000, &c., &c. The names of benefactors will be given to buildings erected, halls completed, or schools endowed by them.

All bequests should be made to *The President and Directors of Georgetown College, D. C.*

COLLEGE ORGANIZATIONS.

THE SOCIETY OF ALUMNI OF GEORGETOWN UNIVERSITY.

THE SODALITY OF THE IMMACULATE CONCEPTION OF THE BLESSED VIRGIN MARY.

ORGANIZED 1810.

This Confraternity is composed of Catholic students of the Senior Division. Its object is the cultivation of a religious spirit among its members and the practice of devotion to the Blessed Virgin Mary.

OFFICERS—*Director*, REV. DANIEL J. MACGOLDRICK, S. J. : *Prefect*, P. J. CARLON ; *First Assistant*, MARK MCNEAL ; *Second Assistant*, WM. A. O'DONNELL ; *Treasurer and Secretary*, JAMES H. DUGAN ; *Sacristan*, EDWARD J. TOBIN ; *Assistant Sacristans*, JOHN DES GARENNES, EDWARD G. HERMAN. 88 members.

CONFERENCE OF ST. VINCENT DE PAUL.

A conference of this Society was organized among the students in the year 1888–'89, under the title of the Conference of St. Francis De Sales of Georgetown College, and on the 25th of January, 1892, it was formally aggregated to the Society as an Aspirant Conference. Its purpose is primarily not so much the actual relief of the poor in the neighborhood of the College as to train its members in the spirit and methods of this admirable organization. Yet the charitable work performed is by no means inconsiderable. During the past year the number of persons relieved was about 185, the amount of money expended being $110. Besides this, 182 suits of clothes and large quantities of provisions were given out, especially during the Christmas and Easter holidays, when many students not members of the Conference, joined in its work. Nearly 200 rosaries and 100 scapulars were distributed within and without the College. By the influence of the Conference two persons were baptized.

OFFICERS—REV. J. HAVENS RICHARDS, S. J., *Spiritual Director ;* PATRICK H. O'DONNELL, *President ;* PATRICK J. CARLON, *Vice-President ;* MARK MCNEAL, *Secretary ;* THOMAS J. FINNING, *Treasurer ;* WILLIAM J. COLLINS, *Keeper of the Wardrobe ;* ROBERT J. COLLIER, *Librarian.* 15 Members.

LEAGUE OF THE SACRED HEART OF JESUS.

Devotion to the Sacred Heart has always existed among the students. On the 21st of June, 1888, the League was formally established in the College.

OFFICERS—REV. A. DUFOUR, S. J. *Director. Promoters, Senior Division*—PATRICK J. CARLON, WILLIAM A. O'DONNELL, J. FRANCIS SMITH, THOMAS J. FINNING, EDWARD J. TOBIN, CHARLES J. GOLDEN, JAMES H. DUGAN, SAMUEL A. LUDLOW. *Junior Division:* A. J. ANTELO DEVEREUX, LOUIS L. PRINCE, HENRY R. GOWER. 165 Members.

THE ST. JOHN BERCHMANS SANCTUARY SOCIETY.

This society, established during the past year, has for its object the fostering of zeal in the service of the altar and the training of its members in the exact performance of the various ceremonies of the Church. It also assumes charge of the decoration of the Chapel on festival days.

OFFICERS—J. BARRY SMITH, S. J., *Director ;* MARK MCNEAL, *Prefect;* EDWARD J. TOBIN, *Assistant ;* J. FRANCIS SMITH, *Secretary ;* ROBERT J. COLLIER, WILLIAM A. O'DONNELL, WALTER S. MARTIN, WILLIAM W. DIXON, JR., *Sacristans ;* G. CUTHBERT POWELL, *Bidellus.* 50 Members.

LITERARY SOCIETIES.

It has been a tradition in Georgetown from the beginning to give especial attention to the study and practice of elocution, and among the oldest associations of the College students are the two Debating Societies, known as the Philodemic and the Philonomosian.

Their object is to promote a taste for literary study and to afford practice in debate and declamation. Meetings are held in a handsome and well arranged hall in the new building.

On the 22d of February of every year the Philodemic Society holds a formal public debate, in the College Hall, upon some important question of the day.

Three prominent gentlemen of the city, who are invited to act as judges, decide upon the relative merits of the speakers. The prize awarded to the successful contestant consists of a gold medal two inches in diameter, valued at $100. This superb medal, which was founded in 1874 by the late R. T. Merrick, LL. D., ranks as one of the highest honors of the College.

The annual debate of the Philonomosian Society is not public.

THE PHILODEMIC SOCIETY.

ORGANIZED SEPTEMBER 25th, 1830.

The Philodemic is essentially a Debating Society, having for its object the cultivation of eloquence and the promotion of knowledge. It is composed of members of the more advanced classes.

OFFICERS—REV. D. J. MACGOLDRICK, S. J., *President;* WILLIAM J. COLLINS, *Vice-President;* JOSEPH I. WELLER, *Secretary;* JOHN F. HENNON, *Amanuensis;* JOSEPH C. MATTINGLY, *Treasurer;* WILLIAM A. O'DONNELL, J. FRANCIS SMITH, *Censors.* 22 members.

THE PHILONOMOSIAN SOCIETY.

ORGANIZED JANUARY 8th, 1839.

The object of this Society is the cultivation of eloquence and the promotion of historical knowledge.

The membership is open to students of classes above Second Grammar.

OFFICERS—FIRST TERM—REV. JAMES F. X. MULVANEY, S. J., *President;* JOHN P. GATELY, *Vice-President;* W. OUTERBRIDGE HORSEY, JR., *Secretary;* ANDREW BERRY, *Amanuensis;* GEORGE D. BAHEN, *Treasurer;* FRANCIS B. MCDERMOTT, *Censor.*

SECOND TERM—REV. JAMES F. X. MULVANEY, S. J., *President;* FRANCIS B. MCDERMOTT, *Vice-President;* RICHARD J. WATKINS, *Secretary;* GEORGE D. BAHEN, *Treasurer;* GEORGE H. DECLOUET, *Amanuensis;* JAMES S. WHEDBEE, *1st Censor;* J. ASHTON DEVEREUX, *2d Censor.* 36 members.

THE COLLEGE JOURNAL.

ESTABLISHED 1872.

THE COLLEGE JOURNAL is published towards the close of every month by a committee of the students. Its purpose is to aid their literary improvement, to chronicle the news of the College, etc. It also serves the Society of Alumni as an organ and means of intercommunication. Being principally devoted to matters of local interest, it must rely for its patronage chiefly upon the students and Alumni of the University, and their friends. These and all former students are urged to give it substantial support.

The Staff—Mark McNeal, *Editor-in-Chief* ; Patrick J. Carlon,'93, C. Piquette Mitchel, '93, Francis D. Mullan, '93, John M. Ryan, '93, Robert J. Collier, '94, Condé M. Nast, '94, Edward J. Tobin, '95, Dion J. Murphy, '95, Ralph Hopkins, '95, Walter S. Martin, '96, John F. O'Brien, '96, *Associate Editors* ; John Joseph O'Neill, '94, *Exchange Editor* ; D. Marcus Dyer '92, *Manager* ; John David Lannon, '94, John Joseph Repetti, '95, M. Martin Murphy, '95, *Assistant Managers.*

THE STUDENTS' LIBRARY.

This contains about three thousand five hundred volumes, selected with the view of furnishing the students with the means of reference as well as entertainment. The Library is open to all the students, subject to a small annual fee, which serves to defray the ordinary expenses. Connected with the Library is a reading room, where the principal journals are received, together with many reviews and magazines.

Officers—Rev. Daniel J. MacGoldrick, S. J., *Director* ; William A. O'Donnell, Kenneth B. Turner, *Librarians.*

TONER SCIENTIFIC CIRCLE.

This association, which was named in honor of Dr. Joseph M. Toner, of Washington, was established for the purpose of encouraging among the students the study of Natural Science. Each member in turn writes a paper upon some scientific subject ; these papers are read and discussed at the meetings of the society.

Officers—Mr. James F. Dawson, S. J., *Director;* Francis C. Keyes, *President* ; John M. Ryan, *Secretary.* 32 members.

ATHLETIC EXERCISES.

Organizations for the practice of athletic sports are encouraged, but great care is taken that studies suffer no detriment from this cause. The Athletic Association, formerly confined to the College, has of late years extended its membership to the Schools of Medicine and Law, and has taken a great development.

There is a special holiday known as Field Day, which is devoted to competition in gymnastics, etc. Four years ago the College expended about $4,000 in fitting up the ground floor in the North Pavilion of the new building as recreation rooms. This suite is finished like the remainder of the building, in polished wood, and comprises a large central hall, a spacious apartment for the billiard tables, a dressing-room for the Ball Clubs, a Reading-room, a Smoking-room and the Students' Library. A new building which will afford adequate facilities for physical training is one of the great needs of the College.

For the Junior students, satisfactory provision has been made in their own building. Their new gymnasium occupies the entire basement of that structure. It is sheathed both on the walls and ceiling in hard wood, and is supplied with the most recent forms of gymnastic apparatus.

ATHLETIC ASSOCIATION OR "THE YARD."

This Association comprises under one general direction all the organizations existing among the students for purposes of amusement and exercise, such as Baseball, Football, Lawn Tennis, and Billiards. These Associations, which, previous to the year 1889, were independent, since that date have been regulated by the Yard Committee, under the direction of the Head Prefect of the Senior Division.

OFFICERS—REV. JOSEPH A. GORMAN, S. J., *President;* JOHN F. HENNON, *Vice-President;* LOUIS F. HOGAN, *Secretary;* JOHN G. O'LEARY, *Treasurer;* CONDÉ M. NAST, *Manager of Baseball;* JOHN H. SULLIVAN, *Manager of Football;* J. FRANCIS SMITH, *Manager of Track and Field Athletics;* MARTIN MURPHY, *Journalist.*

EXECUTIVE COMMITTEE—*Ex-officio: The President, Vice-President, Secretary, Treasurer. Manager of Football, Manager of Baseball, Manager of Track and Field Athletics, and Journalist.*

Also, ROBERT CARMODY (*Football*); EDWARD MAHONEY (*Baseball*); WILLIAM T. HAYDON (*Billiards*); CONDÉ M. NAST (*Tennis*); MARK McNEAL, FRANCIS C. KEYES, WILLIAM A. O'DONNELL, JAMES W. BURK, THOMAS J. FINNING, CHARLES E. ROACH, ANDREW BERRY, HORACE E. BRISCOE, RICHARD J. HARLEY.

THE JUNIOR SODALITY.

Description and History.

Georgetown College is situated on Georgetown Heights, two and one-half miles distant from the Capitol, overlooking the City of Washington and the Potomac River, and commanding one of the noblest views in the world. The site is singularly healthful.

This College was the first Catholic institution of higher learning founded in the United States, and was established through the efforts of the Rev. John Carroll, afterward the first Archbishop of Baltimore. Its foundation has hitherto been referred to the year 1789 ; but in fact the earliest building was begun during the year 1788; students, however, were not received before 1791. Upon the reorganization of the Society of Jesus in Maryland, in 1805, the Georgetown Academy, as it was then called, was transferred to the Fathers of that Society, under whose control and direction the University still remains. The College was chartered as a University, by act of Congress, March 1st, 1815, and two years later the power thus acquired of conferring degrees was first exercised. In the year 1833, by an especial decree, the Holy See empowered Georgetown University to grant degrees in Philosophy and Theology. In 1843 an Astronomical Observatory was erected and fully equipped. The College of Medicine was opened in 1851, and the College of Law in 1870. The present magnificent main building of the College was begun in 1878. Since its erection, the College buildings, exclusive of the departments of Medicine and Law, present an aggregate frontage of about eight hundred feet. They are surrounded by grounds comprising seventy-eight acres, a large part of which is occupied by the "Walks," whose sylvan beauty has made them famous.

Studies.

The course of studies at Georgetown is that generally pursued in colleges of the Society of Jesus. The classes of the Collegiate Department are four in number, corresponding to the Freshman, Sophomore, Junior, and Senior years, but known in our own traditional terminology as the Schools of First Grammar, Poetry, Rhetoric, and Philosophy. The Preparatory Department has hitherto consisted also of four classes, but it is intended at the opening of the next session to reduce the number to three, by abolishing the lowest class.

The plan of studies is based on the conviction that a complete liberal education should aim at developing all the powers of the mind, and should cultivate no one faculty to an exaggerated degree at the expense of the others. During the early part of the preparatory course, the student's attention is principally devoted to acquiring an accurate knowledge of his native tongue and of elementary mathematics, with all the branches ordinarily taught to boys from thirteen to sixteen years of age. At the same time the rudiments of the Latin language are mastered, and the study of grammar is thus made from the beginning comparative and analytical. By means of constant oral and written exercises, the methods of teaching are rendered thoroughly practical. In the second year Greek is begun, followed, in the third year, by French or German.

As the pupil advances, his judgment is exercised more and more, while less attention is given to mere memory work. When, after at least three years of preparation, he reaches the college course, properly so called, he is supposed to be able to read with some facility Latin, Greek and French, and perhaps German; to be thoroughly familiar with the grammars of these languages; in a word, to have the tools of literary work in some degree under his control. He then devotes himself for a year more particularly to the cultivation of his literary taste and powers by reading and imitating the best models of ancient and modern literature. The following year is given in great part to the training of the imagination; the nature of poetry is explained, the technicalities of verse-making are mastered and practiced, and the great poets are carefully studied. Then comes the year of Rhetoric, during which the student's critical powers are exercised and developed, poets and prose writers are scientifically analyzed, the principles of oratory are carefully examined, and the speeches of the world's greatest orators are read and discussed. The last year of the course serves especially to discipline the reasoning faculties by the study of Logic, Metaphysics, and Ethics, and by higher studies in Mathematics and Natural Sciences. Among these branches, the greatest attention is given to Metaphysics, a thorough mastery of which is regarded as of the utmost importance, since it serves to arrange systematically all the student's knowledge and to furnish the key to all true science.

While this literary and philosophical training has been going on, the course of mathematics has been steadily continued, and natural science, in its various branches, has been taken up as soon as the development of the mind would admit of its being pursued in a systematic and really scientific way. Whatever is important in natural science is made a part of the curriculum, and is taught with a philosophical analysis intended to guard the student against that confounding of mere information with learning which is the danger of modern education. Physics, Mechanics, Geology, General and Analytical Chemistry, all form important parts of the regular obligatory series of studies.

It is believed that this course is calculated to develop and train all the powers of the mind, rendering it capable of understanding and appreciating all branches of learning. It serves as a foundation for special training in any branch that the student, with his mind mature and trained, may decide to take up.

The successful completion of this course is rewarded with the degree of Bachelor of Arts.

When this point is reached, the University offers her graduates special training in several branches, at their option. Her schools of Medicine and Law give full and accurate training for those professions; while in the College itself postgraduate courses are offered in Philosophy, Literature, History, Physics, Chemistry, and Mathematics. It is desired to add as soon as possible, to the departments already existing, a School of Engineering.

But in the undergraduate department, the same course is obligatory upon all; to render it in any considerable degree elective would be to defeat its very end and aim. Hence elective studies are few and merely incidental to established lines of work. From this prescribed course exemptions will not be granted.

No provision is made for an exclusively English or Commercial Course, and only students who intend to follow the full classical curriculum will be admitted.

A special class is organized for the benefit of older students who, being well versed in the ordinary English branches, desire to advance more rapidly in the classic languages.

Lectures, Etc.

The students of the higher classes are allowed at times, under proper direction, to avail themselves of the lectures of the Smithsonian Institution, special lectures in the Law Department, the debates in Congress, or the pleadings before the Supreme Court, when interesting and instructive subjects are under discussion.

Religious Instruction.

Religious instruction is considered of the first importance in education.

Catechism forms one of the regular class recitations, and weekly catechetical lectures are attended by all. The prize for Christian Doctrine is awarded to the author of the best paper upon the matter of these lectures. Further instruction is given to such as have need of it, or are preparing for the Sacraments. For the development of piety there are two Sodalities, which meet weekly. All Catholic students are expected to approach the Sacraments at least once a month.

Degrees.

The degree of Bachelor of Arts is conferred upon students who have made the regular course and have passed satisfactory examinations in the English branches of study, the Latin and Greek Classics, French or German, Mathematics, including Differential and Integral Calculus, Chemistry, Physics, Mechanics, and Rational Philosophy.

The degree of Master of Arts, in course, is conferred upon Bachelors of Arts who have followed, for at least one year, the prescribed number of Postgraduate courses of study, and have passed satisfactory examinations therein.

The candidate for the degree of Bachelor or Master of Arts is required to compose an essay on some literary, scientific, or moral subject, which, if accepted by the Faculty, must be left in the archives of the College.

Honorary degrees are conferred, at the discretion of the Faculty, upon those who unite proficiency in the Classics with eminence in Literature, Science, or the Professions.

Sessions and Holidays.

The Academic year is divided into two terms:

The first term begins usually on the second Wednesday in September and ends on the last day of January. The second term begins on the 2d of February and ends with the annual commencement on the third or fourth Tuesday of June.

The Christmas recess begins on the 23d of December and ends on the 2d of January. The Easter recess extends from Wednesday in Holy Week until the Wednesday after Easter, exclusive.

Students who overstay the time specified will be deprived of the privilege of returning home at the next recess. Hence parents and guardians are urged to observe the limits set for the recesses that occur during the year.

No schools are taught on Wednesday and Saturday afternoons, nor on days of general religious or national observance.

The classes begin at 8.45 A. M. and continue until 12. They are resumed at 3 and continue until 5 P. M.

Examinations.

A General Examination in all classes is held toward the close of each term.

Promotions ordinarily take place at the beginning of the first term. They will be made, however, at any time during the year, when warranted by the progress of the student.

Awards and Reports.

The prizes, at the Annual Distribution in June, are awarded to those who, by their class exercises during the year and the excellence of their examinations, attain the required number of marks. As marks are not made up to absentees, parents who permit their sons to remain at home beyond the period allotted for vacation or recess cannot expect to see them hold distinguished places in their classes.

Besides the Annual Distribution of Awards, the Faculty and students are assembled at the beginning of every month, when the marks and the standing of the students in their respective classes for the preceding month are publicly proclaimed, and testimonials awarded to those who have attained the prescribed degree of excellence.

A quarterly report of the standing in class, the progress and general conduct of every student is sent to his parents or guardians.

Requirements for Matriculation.

Students may enter at any time during the session, and, on examination, will be assigned to the class for which their prior attainments have fitted them.

Satisfactory testimonials of good conduct will be required from those who come from other institutions.

Candidates for admission to advanced classes must pass a satisfactory examination upon all the subjects previously studied by the class which they propose to enter.

From certain preparatory schools of established reputation students are admitted to the School of First Grammar, or Freshman Class, without examination, upon the Principal's certificate that they have completed the required amount of work and are prepared to enter College.

In all other cases, for admission to this class, a successful examination is required in the following subjects, or their equivalent :

LATIN.—The entire Latin Grammar, including a knowledge of all regular syntactical constructions, and of the outlines of Prosody. Translation into Latin at sight of complex English sentences, entailing the application of rules for *Oratio Obliqua* and for conditional sentences. Nepos' Lives, to the end of the life of Alcibiades, also the life of Atticus. Phædrus' Fables, two books. Cicero's Selected Letters, five hundred lines. Cæsar's Commentaries, two books. Ovid's Metamorphoses, one thousand lines. An equivalent from the Elegies, or from Virgil's Bucolics or Georgics, will be admitted instead of a portion of the Metamorphoses.

GREEK GRAMMAR.—Etymology, complete (including all irregular and defective forms), and the outlines of Syntax. Translation into Greek of simple English sentences. Xenophon's Anabasis, Books I and II. Lucian's Dialogues (Græca Minora).

N. B.—In the discussion of the classic authors, both Greek and Latin, the candidate must be prepared to give a thorough grammatical analysis of every word and phrase.

ENGLISH.—An English composition will be required evidencing thorough mastery of the grammar and some proficiency in descriptive and narrative writing.

HISTORY.—A general outline of History, both ancient and modern.

MATHEMATICS.—Arithmetic, entire. Algebra to end of Quadratics. Geometry, Plane and Solid. (Wentworth's Complete Algebra, and Wentworth's Geometry, or works of equal grade.)

MODERN LANGUAGES.—The elements of French or German grammar and some proficiency in translation and analysis.

LATIN.—1*st Term.*—Cicero's Orations; Quintilian; Horace's Satires and Epistles; Lectures on Rhetoric; Du Cygne's Ars Rhetorica.

2*d Term.*—Cicero's Orations; Tacitus—Agricola and Germania; Juvenal; Lectures on Rhetoric; Compositions in Prose and Verse.

Both Terms.—Sight reading from various Latin authors; Practice in speaking Latin.

GREEK.—Demosthenes on the Crown; The Œdipus Tyrannus of Sophocles; Themes.

ENGLISH.—Coppens' Rhetoric, completed; Lectures based on Brooke's English Literature, completed; Analysis—Hales' Longer English Poems; Story on the Constitution of the United States; Declamation; Compositions in Prose and Verse; Doctrinal Exposition of Religion, completed; Church History, completed—lectures by the professor.

MATHEMATICS.—Taylor's Differential and Integral Calculus,

SCIENCE.—Chemistry—Laboratory Course of Qualitative Analysis, under direction of professor; Tarr's Qualitative Analytical Chemistry; for advanced students, Quantitative Analysis.

SCHOOL OF PHILOSOPHY.

Senior.

RATIONAL PHILOSOPHY.—Russo's Logic and Metaphysics; Russo's Ethics and Natural Right. Public and Private Disputations; Papers for graduation and honors, six times in the year.

NATURAL SCIENCE.—Mechanics—Dana. Physics—Atkinson's Ganot; Thompson's Electricity and Magnetism; Laboratory Practice. Young's Astronomy; Le Conte's Geology. Public lectures by the students. Papers for graduation and honors, six times in the year.

Declamation.

THE POSTGRADUATE SCHOOL.

OBJECT.—This department is intended for graduates who desire to continue and extend their education in the Arts and Sciences, whether it be for the mere love of learning, or to qualify themselves as professors, or finally with a view to a more complete preparation for some other of the learned professions, by devoting themselves to liberal studies of a higher character, cognate to the career at which they aim.

The courses, if pursued to the full extent recommended, are ample enough to tax the energies of any student. It would, therefore, be more satisfactory to devote an entire year to them before entering upon the study of Law or Medicine. Yet the minimum of work exacted is not too much to be profitably combined with the required attention to purely professional studies.

ADMISSION.—All graduates of Georgetown College, or of institutions of like standing, are admissible to these courses.

RESIDENCE.—Students taking only graduate work at the College may reside within the College walls or not, as may suit their convenience. Those attending the Schools of Law and Medicine are not allowed to live in the College; but good boarding-places will be secured for them, if desired, at reasonable rates.

The classes in the graduate courses are conducted in the halls at Georgetown, from 10 A. M. to 12 M.

TIME.—The yearly session opens on the first Monday of October, and closes with the annual commencement of the College, on the third or fourth Tuesday in June.

STUDIES.—A brief elenchus of topics in the various branches will be found subjoined. Class work is carried on by lectures, directions in reading, and intimate personal and practical guidance on the part of the Professor; and on the side of the student by repetitions, written papers, and the preparation of theses. The aim is to surround the graduate student with all the facilities for advanced work and every incitement to independent investigation—in a word, to inspire him with the genuine spirit of scholarship.

Every student must select at least three courses, involving attendance upon lectures for eight hours per week. One of these courses must be Rational Philosophy. Where more courses are taken, successful examinations in three, one of which must be Philosophy, will be counted as sufficient for the degree.

AIDS TO STUDY.—Students have the privilege of consulting their professors beyond the class hours. Under the direction of the respective lecturers, they are permitted the use of the Riggs Library, the Cabinet of Physics, the Physical and Chemical Laboratories of the College, and the scientific collections of the Coleman Museum. They can also avail themselves of the libraries and collections under Government control in the city of Washington.

DEGREES.—The Master's Degree in Arts or Science will be given to those already holding the corresponding Bachelor's degree on the completion of one year of residence, with attendance upon lectures and satisfactory examinations, et cetera, as specified above.

FEES AND EXPENSES.—The fee for tuition is $60 for the entire course. The Master's Diploma is $10. The charge for room, board and washing at the College is $300 for the year. Text-books will not ordinarily exceed $10 or $12, Hence it will be seen that all expenses will come within $390.

COURSES.

I. RATIONAL PHILOSOPHY. Professor, Rev. M. H. O'Brien, S. J. Four hours per week.

1. METAPHYSICS. A more particular and precise treatment of questions of the day depending upon Psychology.

2. NATURAL THEOLOGY. The Concept, Existence and Attributes of the Deity from the standpoint of reason, developed in refutation of current errors.

3. ETHICS. Completion of the Moral Philosophy begun in the undergraduate course.

The Right of Property. Socialism. Communism. Private Property and its Opponents. Capital.

The State: Its Origin, Object, Constitution, Nature, Limits. Church and State; Church and School. Functions of the Civil Power. Sociology.

Political Economy.

International Law. The *Jus Gentium* in General; in Times of Peace; in Times of War. Treaties. Principles of Nationality. The Family of Nations.

II. LITERATURE. Professor, Rev. P. J. Quill, S. J. Three hours per week.

1. GENERAL LITERATURE. *a*) Preliminaries. A Survey of Early Oriental Literatures. Greek—The Age of Pericles. Latin—The Age of Augustus. The Middle Ages. The Neo-Latinists. Italian—The Age of Leo X. Spanish—The Age of Philip II. German—The Classic and Romantic Schools. Russian—The Nineteenth Century.

b) Some Christian Classics of the First Five Centuries. Greek—Clement of Alexandria, Eusebius, St. Gregory of Nazianzus, St. Basil, St. John Chrysostom, Synesius. Latin—Minucius Felix, Tertullian, St. Hilary of Poitiers, St. Ambrose, Prudentius, St. Jerome, St. Augustine, St. Paulinus of Nola, Salvian, Sedulius, Boethius.

c) Sketches of the Literatures of the East: Hebrew, Sanskrit, Zend, Assyrian, Egyptian, Persian, Arabic and Chinese.

2. ENGLISH LITERATURE. *a*) Philology. The English of Chaucer, of Shakespeare, of Dryden and of Newman. The Grammar and Vocabulary of each Period, together with analytical reading of the best authors.

b) History of Literature from Beowulf to the present decade. American Literature.

c) Advanced Rhetoric. The application of principles to the various forms of composition in prose and verse, with a view to authorship. Criticism. Analysis of masterpieces.

III. FRENCH LITERATURE. Professor, Rev. Alphonse Dufour, S. J. Three hours per week. *a*) Philological Section. Formation of the Language. Its Development and Present State *L'Académie.*

b) Historical Section. French Literature from the *Chanson de Roland* to the last Conference of Monsabré.

c) Practice of French in the Writing of Prose and Poetry, Conversation and Declamation. The purpose is to attain not only to an easy mastery of the language, but to its literary use. The classes are carried on in French, and the written papers of the student must also be in that tongue.

IV. HISTORY. Professor, Rev. Daniel J. MacGoldrick, S. J. Three hours per week.

1. *a*) The Theory of Historical Writing. Investigation of methods pursued by popular English Historians.

b) Sources of History. Monuments. Numismatics. Traditions. Chronicles. Annals. Classic History. Philosophic History.

c) Principles of Chronology.

2. The Constitutional History of Greece, Rome, England, and the United States.

V. COURSES OF MATHEMATICS. Professor, Rev. John G. Hagen, S. J. Two hours per week for each course.

a) Arithmetical and Algebraic Analysis. *b*) The *Ausdehnungslehre*. *c*) Non-Euclidian Geometry.

VI. COURSES OF PHYSICS. Professor, Mr. John J. Thompkins, S. J. Two hours per week for each course.

a) Mathematical Theory of Electricity. Theory of Dynamos.
b) Thermodynamics.

N. B. The courses in Physics will not be offered in 1894–95, but may be taken in 1895–96.

VII. COURSES OF CHEMISTRY. Professor, Mr. J. Barry Smith, S. J. Lectures: Three hours per week. Laboratories open eight hours daily.

Laboratory Courses: *a*) Quantitative Analysis; *b*) Determinative Mineralogy, including Blowpipe Analysis and the simpler processes of Furnace Assaying; *c*) Synthesis and Analysis of Carbon Compounds.

Lectures: Chemical Philosophy. Hydrocarbons and their Derivatives.

SUPPLEMENTAL COURSES.

Series of lectures on subjects of especial interest will be arranged as opportunities arise during the year.

PREPARATORY DEPARTMENT.

Faculty and Officers.

REV. J. HAVENS RICHARDS, S. J.,
President.

REV. JEROME DAUGHERTY, S. J.,
Vice-President; Prefect of Studies and Discipline.

REV. JOHN B. PITTAR, S. J.,
Lecturer on Christian Doctrine to the Classes of Rudiments; First Prefect of Discipline, Junior Division; Teacher of Lower Algebra, Div. A.

PATRICK F. O'GORMAN, S. J.,
Teacher of the Class of Second Grammar, Div. B; Choir Master.

GEORGE B. ROSE, S. J.,
Teacher of Second Grammar, Div. A.

CHARLES F. BRIDGES, S. J.,
Teacher of the Classes of Third Grammar and Third French, Div. A; Assistant Prefect.

REV. WILLIAM J. RICHLEY, S. J.,
Teacher of the Class of First Rudiments, Div. A, and of Elocution to Classes of Rudiments.

CHARLES N. RALEY, S. J.,
Teacher of the Class of First Rudiments, Div. B.

PATRICK J. CARLON, A. B.,
Teacher of the Class of Second Rudiments.

JOHN F. CONWELL, S. J.,
Teacher of Special Classics and Third French, Div. B; Assistant Prefect.

REV. DANIEL J. MACGOLDRICK, S. J.,
Teacher of the Class of Second French.

MICHAEL A. MESS, A. M.,
Teacher of German.

JOHN J. THOMPKINS, S. J.,
Teacher of Geometry.

WILLIAM F. O'HARE, S. J.,
Assistant Prefect.

PATRICK H. O'DONNELL, A. M.,
Teacher of Lower Algebra, Div. B.

JOHN J. MURPHY,
Teacher of First Arithmetic and Book-keeping.

EDWARD J. MAHONEY, A. M.,
Teacher of Second Arithmetic.

THOMAS Q. GARVEY,
Teacher of Stenography; Secretary to the President.

Requirements for Admission to the Preparatory Department.

Hitherto boys have been received in this department upon reaching the age of twelve years. As it is now proposed to abolish the class of Second Rudiments, the age of admission will be raised to thirteen. Candidates must be so far developed in mind, and so well acquainted with the ordinary English branches, as to enable them to begin with profit the study of Latin. Arithmetic must be thoroughly known to the end of Percentage.

Course of Studies

IN THE

PREPARATORY SCHOOLS.

RUDIMENTS.

Second Class.

ENGLISH.—Weld and Quackenbos' English Grammar; Mitchell's Geography; Appleton's Fourth Reader; Sargeant's Etymology; Kerney's First Class Book of History; Gilmour's Bible and Church History; Catechism; Written Exercises; Declamation.

ARITHMETIC.—Wentworth's Common School Arithmetic as far as Percentage; Penmanship.

First Class.

LATIN.—Alvarez' Latin Grammar; Historia Sacra; Themes.

GREEK.—Yenni's Greek Grammar; Witticisms of Hierocles; Æsop's Fables; Themes.

ENGLISH.—Weld and Quackenbos' English Grammar; Connolly's English Reader; Sargeant's Etymology; Mitchell's Geography; Kerney's First Class Book of History, completed; Gilmour's Bible and Church History, completed; Catechism, completed; Written Exercises; Declamation; Penmanship.

ARITHMETIC.—Wentworth's Common School Arithmetic, completed; Mayhew's Bookkeeping.

SCHOOL OF THIRD GRAMMAR.

LATIN.—Cicero's Selected Letters; Nepos; Phædrus; Scanning of Phædrus; Alvarez's Latin Grammar; Latin Composition.

GREEK.—Yenni's Greek Grammar; Æsop's Fables, continued; Xenophon—The Anabasis; Themes.

English.—Meiklejohn—The English Language, Part I; Mitchell's Geography, completed; Fredet's Ancient History; Connolly's English Reader; Declamation; Compositions; DeHarbe's Full Catechism.

Mathematics.—Wentworth's Complete Algebra to Logarithms.

French.—Dufour—French Grammar, Etymology; French Reader.

German.—Schmitz's German Grammar; Evans' Otto's Reader.

SCHOOL OF SECOND GRAMMAR.

Latin.—Cicero's Selected Letters; Cæsar's Commentaries; Ovid's Elegies and Metamorphoses; Scanning of Ovid; Alvarez's Grammar; Latin Composition; Casserly—Prosody.

Greek.—Xenophon—The Cyropædia; Lucian's Dialogues (Græca Minora); Yenni's Greek Grammar; Themes.

English.—Meiklejohn—The English Language, Parts I., II.; Fredet's Modern History; Fiske's Classical Antiquities (Ancient Geography and Mythology); Connolly's English Reader; Declamation; Composition; DeHarbe's Full Catechism.

Mathematics.—Wentworth's Geometry, Plane and Solid.

French.—Dufour—French Grammar, Seconde Partie, De la Syntaxe; French Reader, continued.

German.—Schmitz's German Grammar; Evans' Otto's Reader,

Terms.

Regular Charges.

Boarders:	Tuition, Board, Lodging, Washing, and Mending of Linen for the Scholastic Year	$325 00
	Medical Aid and Medicines	10 00
	Library Fee	2 00
		$337 00

$168.50 payable invariably in advance at the beginning of every half-year. A deposit must also be made, sufficient for books and other incidental expenses. This need not exceed $20.

Half Boarders:	Tuition, yearly	$60 00
	Dinner at the College, yearly	50 00
	Library Fee	2 00
		$112 00

Day Scholars:	Tuition, yearly	$60 00
	Library Fee	2 00
		$62 00

In the classes of Poetry and Rhetoric there is a charge of $10 per annum for the use of chemicals.

In the class of Philosophy there is a charge of $10 for the use of Philosophical and Astronomical instruments.

Graduation Fee	$10 00

Extra Charges.

Private room (allowed only to students of the higher classes), with heat, light, and attendance, per annum	$80 00
Use of Piano, per annum	12 00
Spanish, German, and Italian, per annum	30 00
Drawing or Painting, per annum	50 00
Stenography, per annum	20 00

Music (Piano, Violin and other Orchestral Instruments, Banjo, Guitar, Mandolin), $15 per quarter of 20 lessons.

Mending of clothes and shoes at moderate rates.

All accounts must be paid half-yearly in advance. If a student is withdrawn before the end of a session, no deduction will be made, except in cases of sickness or of dismissal, nor will any deduction be made for a shorter time than one month.

Degrees will not be conferred upon students whose debts to the College remain unpaid.

Articles of clothing will not be furnished by the College, unless a deposit for that purpose be left with the Treasurer, who will give a detailed account of its outlay in his regular semi-annual statement.

No bills for clothing or other articles will be acknowledged unless the purchase has been authorized by the Treasurer of the College.

Books and stationery, if not supplied by the parents or guardians themselves, will be furnished by the College at moderate prices.

Whatever sums parents or guardians may allow their sons or wards for pocket money must be deposited with the Treasurer, who will disburse the same according to instructions received or as circumstances may require. *No advance will be made beyond the deposit.*

Every student from beyond the United States must have a guardian in the vicinity, who shall be responsible for his bills and receive him in case of dismissal. The same may be required for students from very distant States in the Union.

General Regulations.

No distinction is made in the reception of students on the ground of religious belief, but all the boarders are required to be present at the public exercises of religion.

No student will be allowed to remain at the College during the summer vacation.

The introduction of intoxicating liquors, as well as of immoral books or papers, will render the offender liable to expulsion, as will any grave offence against morals or discipline.

The use of cigarettes is prohibited even to senior students.

The younger students are kept apart from the older, and their domitories, study hall, play-ground, etc., are entirely separate. They are forbidden the use of tobacco in any form.

Boarders.

It is important that boarders should come provided with a full supply of clothing for both summer and winter. They must also bring with them six towels and the same number of napkins, with a napkin-ring. Linen and all articles of clothing must be marked with the owner's full name.

Boarders are forbidden to leave the College grounds without permission. Violation of this rule will render the offender liable to expulsion. Leave to visit the city, except in the company of some member of the Faculty, will not be given without the written authorization of parents. To Junior students this privilege is not granted.

Students whose parents reside in the District will ordinarily be permitted to visit them on the last Saturday of every month and to remain with them until Sunday evening.

The College Authorities reserve to themselves the discretionary power of opening all letters to students not known to be from parents or guardians.

To avoid serious loss of time from study, the students are prohibited from receiving daily newspapers regularly as individual subscribers. The principal papers, however, as well as other periodicals, are kept on file in the reading-room.

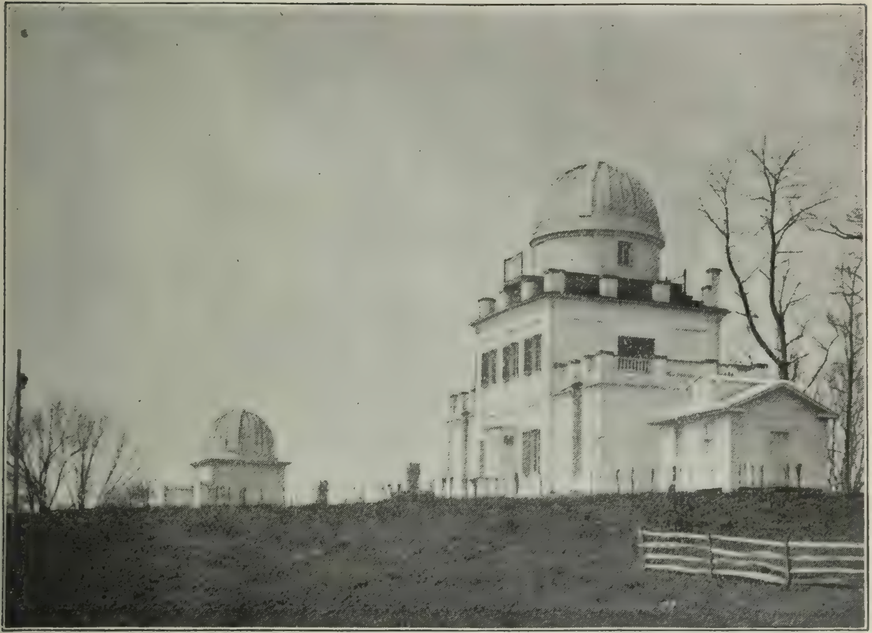
Day-Scholars.

Day-scholars and half-boarders, while within the College walls, are subject to all the rules and regulations for boarders.

They are required to attend the mid-day studies at the College.

Punctual attendance at class is required; and no day-scholar, after absenting himself or coming late, will be received in class without a note from a parent or guardian, countersigned by the Prefect of Studies.

Day-scholars are forbidden to take out letters or perform errands for boarders.



THE OBSERVATORY.

STAFF OF THE OBSERVATORY—REV. JOHN G. HAGEN, S. J., *Director ;* REV. GEORGE A. FARGIS, S. J., REV. JOHN T. HEDRICK, S. J., *Assistant Astronomers ;* JOHN J. O'KEEFE, S. J., *Attendant.*

At a distance of about four hundred yards from the College, on a prominent hill, is the Astronomical Observatory, the main building of which is sixty feet long and thirty feet wide.

I. The structure is divided from east to west into three rooms. The eastern room contains a meridian circle, by Troughton & Simms, of London. The divided circle has a diameter of forty-five inches, reading by four microscopes to fractions of seconds. The aperture of the object glass is four inches. In the western room is mounted a transit instrument, by Ertel & Son, of Munich. It is seven feet long and has a four and one-half inch object-glass. This instrument is fitted with a photochronograph. The middle part of the observatory is three stories high, surmounted by a rotary dome eighteen feet in diameter. Here is erected the new twelve-inch equatorial, which has already produced excellent results.

In the room below the dome is the library containing the Observations and other publications of nearly all the observatories of the world.

Under the library is the clock-room, with four pendulum clocks and two chronometers, a chronograph, and a switchboard from which all the connections for electric light and time signals are made. A special line connects the switchboard with the United States Naval Observatory.

All the instruments and rooms have been furnished with electric light from the city.

A separate dome, twelve feet in diameter, on the southwest brow of the hill, shelters the old equatorial, by Troughton & Simms, which has an aperture of nearly five inches

An extension to the main building, on the east side of the meridian-circle room, contains an instrument for the determination of the variations of latitude. The first instrument employed for this purpose has been replaced by a new one, constructed on a different principle. The photographic zenith telescope, the object-glass, circle, and photochronograph are the same that had been used with the floating zenith telescope. This instrument was constructed by Mr. Saegmuller, of Washington, for the sum of $1.000.

Our three photographic methods of determining the variations of the Poles are fully described, with illustrations and results, in a volume recently published by this observatory under the title "The Photochronograph and its Applications."

II. The use made of the instruments has been substantially in the same lines as during the preceding year.

The *small equatorial* has nearly completed its task of preparing work which is to be completed by the *large equatorial*. The object in view is an atlas of charts, the first series of which is now well under way.

The results of our photographic work on double stars, planets and satellites with the 12-inch equatorial are laid down in the volume mentioned above. The method is so promising that systematic work has been undertaken, especially with regard to Jupiter's satellites.

A long series of photographic determinations of the variations of the pole was commenced last November with the 6-inch *Zenith Telescope*.

The photographic work done with the *Ertel Transit Instrument* is now being prepared for the printer.

The second volume of the *Synopsis of Higher Mathematics* has appeared during the past spring, and the third volume is now in progress.

III. With pleasure we state that the desire expressed in last year's catalogue of obtaining funds for a new 9-inch transit instrument has been fulfilled. The order for the objective has been given, and specifications are drawn up for the mounting.

We cannot close this yearly report on the Observatory without calling the attention of all the friends of the College to a circular which has lately been distributed. Its exhibits "The Present Condition and Needs of Georgetown College Observatory," and urges the necessity of a moderate fund which will yield an annual revenue of about a thousand dollars, in order to defray the current expenses and provide for the annual publications.

As we have already received in various donations about $20,000 before the reputation of the Observatory was established, may we not trust that some liberal hands will be found to create this foundation, and thus crown our efforts with permanent success?

CHEMICAL DEPARTMENT.

In Chemistry the College is remarkably well equipped, both in point of a large stock of apparatus, and of excellent facilities for work. The new laboratory, in the main building, is supplied with every requisite appliance. Each of the forty desks is fitted with drawers and lockers, separate drainage and water supply, and gas for both heating and illuminating purposes. There are also improved filtering apparatus, excellent furnace-chambers, blow-pipe tables, powerful furnaces for crucible operations, water-baths, drying ovens, etc. This laboratory is used by students in Qualitative Analysis and General Chemistry, a laboratory course in the latter being required in addition to the regular lecture and daily repetition. A new lecture-room has also been added, and is all that could be desired. For quantitative analysis and assaying, offered as electives to graduate students, there is also a complete line of instruments and supplies.

THE COLEMAN MUSEUM.

As early as the year 1840 the collections in Natural History, under the care of Fathers James Curley and T. Meredith Jenkins, had become sufficiently extensive to warrant the setting apart of a special room for their preservation and exhibition. Here they remained until 1889, when, during the Centenary Celebration, they were transferred to their present quarters, in the north pavilion of the main building. To this hall, by decree of the Faculty, was given the name of James V. Coleman, '69, in acknowledgment of his distinguished benefactions to the College. It is a spacious, lightsome room, fitted with numerous cases of various designs, all made of cherry wood, highly polished.

Since their transfer, the various collections have all been newly classified and labeled, and displayed to the best advantage. Particular attention has been given to the mineral collection, which embraces specimens illustrating the entire field of Mineralogy, many of them being unique. Besides the exhibition series, numbering over 2,000 minerals, there is a fine working collection carefully determined and arranged in drawers for the convenience of students. In Geology and Paleontology, likewise, there are excellent collections, the rocks and fossils alone, arranged stratigraphically, occupying an entire row of double cases. Notable among the latter is the unusual number of specimens of the remains of vertebrates, many collected in Alaska. The shell collection is very large, and has long been admired for the beauty and variety of the specimens. The Herbarium, containing many thousand plants, has been remounted on the new form of sheets adopted by the National Herbarium in the Department of Agriculture. Specimens of particular interest are from time to time displayed in a set of swinging glass frames constructed for the purpose.

Though its principal object is the instruction of the student, the Museum contains many exhibits of interest to the visitor, among which may be mentioned the splendid collections of coins and medals, the numerous ethnological curios, and the relics of colonial times in Maryland.

An object of peculiar interest is a large Roman Mosaic picture, five feet by three, the gift of Mr. Coleman in memory of his deceased wife. It is undoubtedly one of the largest and finest of its kind in the world.

During the past year the Museum has received several donations of note, among them the valuable art specimens bequeathed by the late Mrs. Maria Coleman, of California, mother of Mr. James V. Coleman, including an ancient picture of the Annunciation, painted on wood panels, and undoubtedly of great value ; an excellent copy of Raphael's Madonna della Sedia, beautifully framed ; an iron relief of Washington ; an exquisite Florentine Mosaic ; two marble busts—a Shakespeare and a Sir Walter Scott ; and a pair of vases of Higen porcelain, from Japan.

The Natural History collection has been greatly increased by the gift from Woodstock College of several hundred ornithological specimens and a number of mammals.

During the year, also, a complete collection of Pontifical Medals, ordered from Rome about three years ago, has arrived and been displayed in the Museum. The medals are more than 800 in number. covering four centuries, from the accession of Martin V, in 1417, to the year 1893, and are a most valuable object lesson in Church history. Some of them are excellent specimens of numismatical art. They were struck from the original dies. They have been described in detail in a series of articles in the *College Journal*. This collection is one of several purchases effected for the Museum in consequence of the donation of $1,000 made by Mrs. Maria Coleman before her death.

THE RIGGS MEMORIAL LIBRARY.

This fine apartment occupies the greater portion of the South Pavilion. It was founded by Mr. E. Francis Riggs, of Washington, as a memorial of his father, the late Mr. George W. Riggs, and his brother, Thomas Laurason Riggs, formerly a student of the College.

The elegance and convenience of the library are very great; in beauty and adaptation to its purpose it is judged to be unsurpassed in this country.

. The collection of books is estimated at more than 60,000 in number, among which are many rare and curious works. There are one hundred volumes printed between the years 1472 and 1520, three manuscripts anterior to the year 1400, and others of later dates. Work on the card catalogue has been continued, but the task is as yet only begun.

During the past year additions have been made to the Library to the extent of about 1,300 volumes, exclusive of pamphlets, chiefly by donation of friends. The cataloguing and numbering of the Shea Collection has been completed.

GEDNEY & ROBERTS Co WASH.

THE CHAPEL OF THE SACRED HEART.

In the College Quadrangle stands the Chapel of the Sacred Heart of Jesus, measuring 109 feet in extreme length, and varying in breadth from 40 to 60 feet. This structure is the generous gift of the wife of an Alumnus, Mrs. John Vinton Dahlgren, and is intended as a memorial of her little son, Joseph Drexel Dahlgren, whose remains have been transferred to it. The Chapel was consecrated on Friday, June 9th, 1893. Its seating capacity is about 500. The College thus possesses what it has so long and sorely needed, a spacious and beautiful structure, wherein the services of the Church may be performed with fitting solemnity and dignity.

The Art and Historical Collections.

The College possesses the nucleus of a valuable collection of works of art, and a number of Maryland Colonial relics. It has long been the wish of the Faculty to increase these collections and give them the prominence they deserve.

Among the paintings are the "Calling of St. Matthew," by Luca Giordano; a St. Joseph of exceptional excellence, by Guercino, and a portrait of the mother of Archbishop Carroll, by Gilbert Stuart. There is also a fine set of engravings of Raphael's frescoes, presented by Cardinal Bedini; a Roman mosaic, of great size and beauty, presented by James V. Coleman, Esq.; a bust of St. Aloysius, by Benzoni; a replica in bronze of Houdon's Washington, with a large number of ancient and modern pictures of less value.

During the past year, as stated above, several objects of art have been received by bequest.

Needs of the University.

Without endowment, and deprived of all resources save the fees of the students, Georgetown College has grown from a struggling Academy to a University, which, with no undue commendation, may be called flourishing. Of late years she has been enabled to liquidate a considerable portion of the debt incurred, and to supply herself with halls and facilities long needed. But much remains to be done to enable Georgetown to continue the development which has been steadily going on for more than a century.

The Faculty therefore appeal earnestly to the friends of the College and to all who are interested in the advancement of education, to assist them with funds for the erection of buildings, and the endowment of the various departments of the University.

Chief among the wants of the College are the following: A SCIENTIFIC SCHOOL, which would include the present classes of Natural Science, and would add to them the technical courses long contemplated. For the establishment of such classes, particularly in ENGINEERING, the present time is peculiarly opportune. Applications are constantly received from students who desire instruction in these branches; and professors of the highest degree of competence are ready to undertake the task. What is still needed is that some one possessed of sufficient means and impressed with the value of scientific education, should make this exalted purpose his own. A suitable structure could be erected for a sum not less than $30,000 or $40,000. For apparatus and equipment a like sum would be required; but this expenditure could be distributed over several years.

A GYMNASIUM and NATATORIUM, $30,000 to $40,000.

A free HOSPITAL in connection with the Medical Department, $75,000 to $100,000.

Besides these principal demands, many smaller wants are pressingly felt. Such are, the completion of the two beautiful stone porches of the new building, one of which is estimated at $6,000 and the other at $10 000; the finishing of certain halls in the same building, $6,000 to $10,000; the completion of the equipment of the Observatory and the foundation of a small working fund for the use of its Director, $10,000, &c. The names of benefactors will be given to buildings erected, halls completed, or schools endowed by them.

All bequests should be made to *The President and Directors of Georgetown College, D. C.*

College Organizations.

THE SOCIETY OF ALUMNI OF GEORGETOWN UNIVERSITY.

OFFICERS.—*President*, HON. RICHARD H. CLARKE, New York ; *First Vice-President*, JOHN T. DOYLE, Menlo Park, Cal.; *Second Vice-President*, GEORGE L. MAGRUDER, M. D., Washington ; *Third Vice-President*, STEPHEN R. MALLORY, Pensacola, Fla.; *Fourth Vice-President*, FRANCIS A. CUNNINGHAM, Philadelphia; *Fifth Vice-President*, DANIEL W. LAWLER, St. Paul, Minn.; *Secretary*, EUGENE D. F. BRADY, District of Columbia ; *Treasurer*, F. O. ST. CLAIR, M. D., New York.

Executive Committee—REV. J. HAVENS RICHARDS, S. J., *ex-officio ;* WM. F. QUICKSALL, J. NOTA MCGILL, J. DUDLEY MORGAN, M. D., and F. O. ST. CLAIR, M. D., *ex-officio*.

Old students who may desire to keep up their connection with the College by becoming members of the Alumni Society will please communicate with the Secretary, E. D. F. Brady, 1505 Pennsylvania Avenue, N. W., Washington, D. C.

THE SODALITY OF THE IMMACULATE CONCEPTION OF THE BLESSED VIRGIN MARY.

ORGANIZED 1810.

This Confraternity is composed of Catholic students of the Senior Division. Its object is the cultivation of a religious spirit among its members and the practice of devotion to the Blessed Virgin Mary.

OFFICERS—*Director*, REV. SAMUEL H. FRISBEE, S. J.; *Prefect*, WILLIAM A. O'DONNELL ; *First Assistant*, THOMAS J. FINNING ; *Second Assistant*, EDWARD J. TOBIN ; *Treasurer and Secretary*, JAMES H. DUGAN ; *Assistant Secretary and Treasurer*, JOHN F. WESSEL ; *Sacristan*, SAMUEL A. LUDLOW ; *Assistant Sacristan*, EDWARD J. BRADY.

CONFERENCE OF ST. VINCENT DE PAUL.

A conference of this Society was organized among the students in the year 1888-'89, under the title of the Conference of St. Francis de Sales of Georgetown College ; and on the 25th of January, 1892, it was formally aggregated to the Society as an Aspirant Conference. Its purpose is primarily not so much the actual relief of the poor in the neighborhood of the College as to train its members in the spirit and methods of this admirable organization. Yet the charitable work performed is by no means inconsiderable. During the past year the number of persons relieved was about 175, the amount of money expended being $138.25. Besides this, 150 suits of clothes and large quantities of provisions were given out, especially during the Christmas and Easter holidays, when many students not members of the Conference joined in its work. More than 700 papers were collected for the prisons and hospitals. By the influence of the Conference three persons were baptized.

THE COLLEGE JOURNAL.

ESTABLISHED 1872.

The COLLEGE JOURNAL is published towards the close of every month by a committee of the students. Its purpose is to aid their literary improvement, to chronicle the news of the College, etc. It also serves the Society of Alumni as an organ and means of intercommunication. Being principally devoted to matters of local interest, its must rely for its patronage chiefly upon the students and Alumni of the University, and their friends. These and all former students are urged to give it substantial support.

ATHLETIC EXERCISES.

Organizations for the practice of athletic sports are encouraged, but great care is taken that studies suffer no detriment from this cause. The Athletic Association, formerly confined to the College, has of late years extended its membership to the Schools of Medicine and Law, and has taken a great development.

There is a special holiday known as Field Day, which is devoted to competition in gymnastics, etc. Five years ago the College expended about $4,000 in fitting up the ground floor in the North Pavilion of the new building as recreation rooms. This suite is finished like the remainder of the building, in polished wood, and comprises a large central hall, a spacious apartment for the billiard tables, a dressing room for the Ball Clubs, a Reading room and the Students' Library. A new building which will afford adequate facilities for physical training is one of the great needs of the College.

For the Junior students, satisfactory provision has been made in their own building Their new gymnasium occupies the entire basement of that structure. It is sheathed both on the walls and ceiling in hard wood, and is supplied with the most recent forms of gymnastic apparatus. During the past year elegant toilet rooms with needle baths have been added to the equipment of this department.

Athletic Association or "The Yard."

This Association comprises under one general direction all the organizations existing among the students for purposes of amusement and exercise, such as Baseball, Football, Lawn Tennis and Billiards. These Associations, which, previous to the year 1889, were independent, since that date have been regulated by the Yard Committee, under the direction of the First Prefect.

Announcement for 1894-'5.

The complete course of study in the Medical Department extends over four courses, of seven months each. The next course will begin Monday October 1, 1894, and end Saturday, April 13, 1895.

The building of this department, which has been extensively enlarged, is conveniently situated on H street northwest, between Ninth and Tenth streets, near several of the principal railway lines. It contains spacious and well ventilated lecture-rooms, chemical, histological, bacteriological and physiological laboratories, a convenient and well-lighted dissecting-room, and a library and reading-room for the use of students. The laboratories are equipped with the latest and most approved instruments and appliances, including an ample number of microscopes of high power.

These will greatly enhance the facilities for instruction, and will enable every student to master more readily the technical skill needed in these important methods of modern medical research.

The laboratory course may be taken independently of the lectures.

Requisites for Admission.

In accordance with the recommendation of the American Medical Association, a preliminary examination is required as a condidion for admission. This is for the purpose of ascertaining whether the candidate can profitably pursue the technical study of medicine, and of preventing those not qualified from wasting time and money.

A preliminary examination will not be required of those who are graduates of a college, a high-school or an academy.

Those who hold degrees in arts and sciences from universities and colleges in recognized standing may complete the course in three years.

Students who have attended one or more terms at any other medical college in good standing, will be admitted to the succeeding courses upon passing the examination required of students for those classes. Those presenting certificates of examination from another medical college in good standing will be admitted to the respective higher classes without further examimation.

The preliminary examinations will be held at the College Building on Saturday, September 29, 1894, at 8 P. M.

Methods of Instruction.

The course of instruction will consist of didactic and clinical lectures, recitations, demonstrations, dissecting, laboratory work and other practical manipulation. The students will be divided into four classs, called, respectively, the First, Second, Third and Fourth.

Class recitations will be conducted by the members of the Faculty.

A record of these recitations will be kept; and the average will be credited to each student in summing up after the final examinations at the end of the session.

The following is a sketch of the several courses of instruction:

ANATOMY.

PROF. FRANK BAKER, A. M., PH. D., M. D.,

The lectures of this course are so arranged that the student at any year receives such elementary instruction as is necessary, and yet there is not so much repetition as to weary those who have attended previous sessions, there being in each year a considerable amount of new matter upon the higher departments of the subject. Especial attention is paid to the practical bearings of the science and its application to surgery and pathology. The lectures will be fully illustrated by several hundred diagrams prepared especially for this course.

PRACTICAL ANATOMY.

The new dissecting-room is spacious and well provided with the proper appliances for the assistance of students. Dissecting will commence October 15th and continue until the following March. The room will be open daily for students, and the Demonstrator or his Assistants will be present. During the session there will be given special demonstrations of the brain, of the thoracic and the abdominal viscera, and also of other difficult or obscure regions of the body. The Demonstrator and Assistants will have general supervision and direction over all students while in the dissecting-room.

During each session every student of the First and Second Classes will be required to dissect all regions of the human body.

The Demonstrator will examine the students from time to time during the progress of their dissections, and if he finds that they have not properly displayed the structures, or have no accurate knowledge of the parts dissected, he will require a new dissection of the same region upon another subject. He will certify to the Professor of Anatomy the satisfactory completion of each dissection.

PHYSIOLOGY.

PROF. C. H. A. KLEINSCHMIDT, PH. D., M. D.

This course, which will extend over two sessions, comprises didactic lectures and laboratory work upon the functions of the various organs of the body in health, and upon physiological chemistry. These lectures are illustrated by vivisections, diagrams, plates, and models.

MATERIA MEDICA AND THERAPEUTICS.

PROF. WILLIAM H. HAWKES, A. M., M. D.,

One of the Consulting Physicians to Providence Hospital, and Chief of the Clinic of Diseases of Children at the Central Dispensary and Emergency Hospital.

Instruction in this department is given by lectures, recitations, and practical demonstrations. During the course the various articles of the Materia Medica will be exhibited in the crude and prepared states.

Especial care is given to the physiological action and therapeutic use of drugs.

The proper writing and formation of prescriptions will also be taught.

Arrangements have been made for practical laboratory work in this department.

CHEMISTRY AND TOXICOLOGY.

PROF. JOHN J. STAFFORD, A. M., M. D.

This course extends throughout three scholastic years ; instruction being given, both by lectures and by work in the laboratory. The aim will be to present the subject of general chemistry in such a manner that the student will have no difficulty in grasping the principles of the science. The lectures are thoroughly illustrated. by numerous experiments and a very complete collection of chemicals.

The first-year students attend lectures in elementary chemistry during the entire session. They also work in the laboratory six hours each week during the latter part of the session.

The second-year students spend six hours each week in the laboratory during the greater part of the session. They are given a thorough course in qualitative analysis ; special attention is given to the examination of medicinal and commercial chemicals, food stuffs, etc. A short course in volumetric analysis is included in the above.

The third-year students work in the laboratory six hours each week during the last part of the session. Each student is required to familarize himself with the proper methods of examining urine and other excreta with especial reference to the diagnosis of diseases. Such time as can be spared will be given to the study of poisons, their effects, detection, and determination. The dates at which students enter the laboratory will be given during the course.

THEORY AND PRACTICE OF MEDICINE.

PROF. J. W. H. LOVEJOY, A. M., M. D.,

Consulting Physician to Garfield Memorial and Children's Hospital.

The course in this branch will be occupied by didactic lectures and reviews.

An effort will be made to give in the course of two sessions as complete a description as possible of the diseases usually considered as belonging to the province of this chair, and in such manner as to give the student a clear conception of the methods of discrimination and management of the various diseased conditions. This teaching, together with the supplementary advantages offered by the various clinics to which the student will have access, will, it is hoped, afford him an opportunity of acquiring a thorough knowledge of this subject.

SURGERY.

PROF. JAMES KERR, M. D., M. CH.,

Surgeon to Central Dispensary and Emergency Hospital, to Woman's Hospital and Dispensary, and to Providence Hospital.

The course consists of lectures, clinics, and operations on the cadaver in the lecture-room and demonstrations at the hospital. Special attention will be given to practical methods of teaching surgery in all its branches, in the clinics, at the bedside, and in the operating-room. Surgical clinics are held daily at the Central Dispensary. This work embraces every variety of surgical material, which is fully taken advantage of for purposes of instruction. The work is divided into departments, under the Professor of Surgery and his assistants. The course on operative surgery is conducted by the Professor of Surgery. The students are required to do bandaging, and are instructed in the technique of surgical work.

OBSTETRICS.

PROF. HENRY D. FRY, M. D.,

Obstetrician, Garfield Memorial Hospital.

Obstetrics will be taught didactically, and, as far as practicable, instruction will be given at the bedside. The entire course will be graded, and will consist of classified lectures, comprising the whole subject, of recitation and demonstrations upon charts and plates, and of operations performed upon the manikin. During the past session, each member of the Senior Class, under the supervision of the Demonstrator of Obstetrics, attended one or more cases of midwifery. They were required to keep records and present written reports of the cases. In future, every facility will be given to obtain experience in the practical workings of this department, by means of bedside instruction.

The importance of exercising strict supervision over the period of pregnancy will be dwelt upon, and attention given to the pathological changes which may occur during gestation, labor, and the puerperal state.

The great value of antiseptic principles as applied to obstetric practice will also be urged.

An operative course on the Budin-Pinard manikin will be conducted by Dr. W. Sinclair Bowen, Demonstrator of Obstetrics. Instruction will be given in abdominal palpatation, in digital examination, and the methods of diagnosticating presentations and positions of the fœtus. A fresh fœtus is employed in order to accustom the student to feel and recognize the different sutures and fontanelles.

An opportunity is given to each for the performance of various obstetric operations, such as the application of the forceps, version, etc.

GYNÆCOLOGY.

PROF. JOSEPH TABER JOHNSON, A. M., PH. D., M. D.,

One of the Consulting Physicians to the Central Dispensary and Emergency Hospital, Consulting Physician to the Woman's Dispensary.

Modern gynæcology will be thoroughly taught in didactic lectures, freely illustrated by plates and blackboard drawings during the course; also in small classes of two or three at a time at private operations, where manipulations and operative work will be carefully explained.

Advanced students will be given an opportunity to witness the preparations for aseptic operations, and actually assist in their perpormance when practicable.

Abdominal surgery, arising from diseased organs in the female pelvis, will receive especial attention this year, and it is intended that all the graduating class, at least, and as many of the other students as possible, shall see abdominal operations not only in the private practice of the Professor of Gynæcology, but by Clinical Professor Stone in the wards of Columbia Hospital.

OPTHALMOLOGY AND OTOLOGY.

PROF. SWAN M. BURNETT, M. D., PH. D.,

Ophthalmologist and Otologist to Providence, Children's, and Garfield Memorial Hospitals, and to the Central Dispensary and Emergency Hospital.

These important branches are taught as a part of the regular curriculum.

The course begins with lectures on the anatomy of the eye and ear, illustrated by models, charts, and specimens under the microscope, followed by an explanation of the fundamental principles of physiological optics and acoustics. The lectures on the diseases of the eye and ear are wholly clinical, illustrative cases being taken from Dr. Burnett's large service at the Central Dispensary and Emergency Hospital, and Garfield Memorial, Children's and Providence Hospitals.

PATHOLOGY AND HISTOLOGY.

PROF. I. W. BLACKBURN, M. D.,

Pathologist to the Government Hospital for the Insane.

The course on Pathology will extend over two sessions, and will consist of lectures, demonstrations, laboratory work, and recitations.

The lectures on the first part of each session will be on general pathological processes ; those of the second part will be devoted to morbid condition of individual organs, tissues, and fluids.

The demonstrations and laboratory work will be arranged with special reference to the lectures, to afford an opportunity for practical study of the subjects taught.

The students of the first year will be taught the elements of histology and the use of the microscope, by lectures and practical work in the laboratory.

MENTAL DISEASES.

PROF. A. H. WITMER, M. D.,

Senior Assistant Physician, Government Hospital for the Insane.

The course will treat of the various diseases and defects of the mind and the legal relations of the insane. It will be supplemented by clinical instruction.

Owing to recent advances in psychiatry, a more thorough knowledge of this important branch of medical science is required on the part of the student of medicine, and the subject is now receiving the prominent attention it so justly deserves in the curricula of the leading schools. The importance of the topic is not confined to the specialist alone, for the general practitioner should have an adequate knowledge of the symptomatology, pathology and therapeutics of this special class of cases ; and the necessity of a knowledge of this subject in its forensic bearings is too self-evident to be advocated.

BACTERIOLOGY AND HYGIENE.

PROF. J. J. KINYOUN, M. D., U. S. M.-H. S.

The course on bacteriology and hygiene will extend over two years.

The first year of the course will consist of lectures, demonstrations and class recitations on the subjects of bacteriology, epidemiology, public hygiene, sanitary science and quarantine.

The second year in addition to the above will consist of a laboratory course of instruction, which will be continuous over half of the session.

In this course the student is expected to familiarize himself with the technique of bacteriological diagnosis, and to be able to make investigations of special problems in medicine, surgery and quarantine.

Special facilities will be offered for those wishing to pursue investigations* on any of the above subjects.

LARYNGOLOGY.

PROF. F. T. CHAMBERLIN, M. D.,

Laryngologist to the Eastern Dispensary.

This course will embrace a series of lectures upon laryngoscopy and diseases of the upper air passages.

After the student is rendered familiar with the modern methods of exploring the nares, pharynx, larynx, and trachea, the more important diseases of these regions will claim attention, and, when necessary, patients will be examined and treated before the class.

---

* The laboratory is open to graduates of medicine.

The instruments, apparatus, models, charts, and pathological specimens used to illustrate this course are complete in every detail.

MEDICAL ZOOLOGY.

WARDELL STILES, A. M., PH. D.,

Medical Zoologist, Bureau of Animal Industry, United States Department of Agriculture, Honorary Curator of the Helminthological collection, United States National Museum.

In the zoological department two courses will be given this coming year, one in human embryology and one on the animal parasites of man.

Embryology. This course will consist of about twenty lectures covering the subject up to organology. It is required of the first and second classes, and will be illustrated by numerous charts prepared especially for these lectures.

Animal parasites. This course comprises a series of lectures on the animal parasites found in the human subject. The lecturer will describe the anatomy, life-history of the different forms, and the best means of treatment and prevention. The lectures will be illustrated by a series of wall maps by Leuckart, by crayon sketches, by numerous original charts prepared especially for the course, and by exhibition of specimens. The lectures will be supplemented by practical laboratory exercises in microscopical examinations of meat, for *Trichina spiralis*, and of fæces, for determining the presence of parasites.

The course is obligatory for third and fourth year men. An opportunity to carry on original investigation in Medical Zoology, under the direct supervision of Dr. Stiles, will be offered to graduates or to advanced students who may desire to pay special attention to this branch.

MEDICAL JURISPRUDENCE AND STATE MEDICINE.

W. C. WOODWARD, M. D.,

Coroner of the District of Columbia.

From this chair will be treated a variety of subjects important to the general practitioner, such as the signs and causes of death, the means of identification of bodies, the proper method of giving evidence and of conducting post-mortem examinations, etc. Dr. Woodward's wide experience as coroner well fits him for this eminently practical work. The course is obligatory for students intending to graduate.

Clinical Advantages.

PROVIDENCE HOSPITAL.

Capitol Hill, corner Second and D Streets S. E.

This large general hospital, situated in an easily accessible part of the city, is supported in part by the general government.

It contains over three hundred beds. The medical and surgical wards are usually well filled with interesting cases. In the new surgical amphitheater, one of the finest in the country, every provision has been made to fully carry out aseptic surgery. Accommodations have been provided for over 150 students. Clinics will be given in this hospital by the following professors of this school, and by other members of the hospital staff:

Surgical—Professors Kerr, Bayne and Crook.

Clinical Medicine—Professors Callan and Cuthbert.

Diseases of the Eye and Ear—Professor Burnett.

Professors Magruder and Hawkes are on the Consulting Staff.

An annual fee of $5, covering all the clinics for the year, is charged by the hospital authorities.

CHILDREN'S HOSPITAL.

W Street, between Twelfth and Thirteenth Streets N. W.

Students may here observe the diseases, injuries, and deformities incident to infancy and childhood, together with the treatment appropriate therefor. Every facility will be given to thoroughly observe and comprehend the cases admitted to its wards.

The out-patient department or dispensary is open every week day from 2.30 to 4.30 P. M. It is divided into medical and surgical services, and a service for diseases of the eye and ear. All these are free of access for medical students.

Professors Lovejoy and Burnett are on the staff of this hospital.

CENTRAL DISPENSARY AND EMERGENCY HOSPITAL.

Fifteenth Street and Ohio Avenue N. W.

During the last year over 15,000 patients were treated here, and over 500 surgical operations performed, many of capital importance. Unusual opportunities are afforded for acquiring practical experience in the ordinary duties of a physician. As a large proportion of the serious cases of accident, that occur in the city, are first brought to this hospital because of its central· location, students become rapidly trained in the effective treatment of injuries demanding prompt assistance, and of that class of cases likely to be of the most importance to the young practitioner. Students are admitted to the services. The new building jus completed offers greatly improved facilities for clinical instruction; and the ambulance service and casualty wards will afford special advantages for studying traumatic and operative surgery.

There are competitive examinations for Resident Physician, two Assistant Resident Physicians, and Resident Student.

In this institution Prof. W. H. Hawkes will give clinical lectures upon the diseases of children, Prof. S. M. Burnett upon diseases of the eye and ear, Prof. James Kerr upon Surgery. Clinical lectures are also given by other members of the staff. Professors Johnson and Magruder are upon the Consulting Board.

The instruction in clinical surgerv at the Central Dispensary and Emergency Hospital comprises demonstrations on the cases in the surgical service. An average of over fifty were treated at each service during the year. These cases during the course of a session include a comprehensive study of all the ordinary diseases and injuries met with in practice. A selection of the most important ones is made for a special clinic each Sunday, where the senior students are required to assist the Professor and do the minor operations themselves under his directions.

A bacteriological and pathological laboratory has been founded by Professor Burnett, and is now in operation under Doctor Gray, where the clinical work of the hospital will be demonstrated.

A systematic course, demonstrated from the Skin and Venereal Department of the Clinic, will be given by Doctor Watkins, the Demonstrator of those branches.

Personal supervision of the training of the student is aimed at to qualify each with a working knowledge of this branch of practice.

Dr. Kerr appoints from the Graduating Class four graduates of the college as his assistants, to hold office for one year.

Clinical Instruction.

Attention to clinical instruction is obligatory upon students of the third and fourth years. The following clinics will be held by members of the Faculty:

Professor Johnson will invite senior students to witness gynæcological operations.

Professor Hawkes, diseases of children, at the Central Dispensary, Monday and Thursday, 1 to 2 P. M.

Professor Kerr, general and operative surgery, daily, at the Central Dispensary and Emergency Hospital. He will also give clinics at Providence Hospital, July, August and September.

Professor Burnett, eye and ear, Central Dispensary, Tuesdays and Fridays, 1 to 2 P. M., and at Garfield, Children's and Providence Hospitals.

Professor Bayne, surgical, Providence Hospital, October, November and December.

Professor Crook, surgical, Providence Hospital, April, May and June.

Professor Callan, medical, Providence Hospital, July, August and September.

Professor Witmer, insanity, at Government Hospital for the Insane.

Professor Cuthbert, medical, October, November and December, Providence Hospital.

Professor Chamberlin, throat and chest, Eastern Dispensary, Tuesdays and Fridays, 1 to 2 P. M.

Professor Stone will invite in turn senior students to be present at his service at Columbia Hospital. The most important operations in abdominal surgery are frequently performed here.

Dr. Watkins will avail himself of the valuable material at the Central Dispensary to give instruction upon diseases of the skin and genito-urinary organs.

Special Instruction.

Professor Burnett has a postgraduate course of instruction in ophthalmology, beginning the 15th of October and extending to the first of March. A small fee will be charged for this course, payable to him.

Professor Kerr gives special clinics on general and operative surgery throughout the session, for which a fee will be charged, payable to him.

Other Advantages.

The great libraries and museums connected with the various government institutions at Washington afford advantages to the student that are unrivalled in America and are equal to those found in most European capitals. These collections are for the most part freely open to the public, or can be consulted by students upon obtaining permission, readily granted to those that are pursuing special courses of study. In most cases the collections are made available for education and research by act of Congress. The following may be mentioned:

LIBRARIES.

The Library of Congress	700,000	vols.
The Library of the Surgeon-General's Office	110,000	"
The Library of the United States National Museum	16,000	"
The Library of the Museum of Hygiene	10,500	"
The Library of the Bureau of Ethnology	5,000	"
The Library of the Bureau of Education	30,000	"
The Library of the Department of Agriculture	25,000	"

MUSEUMS, &c.

The Army Medical Museum.
The United States National Museum.
The Museum of Hygiene.
The Museum of the Agricultural Department.
The Botanical Garden.
The United States National Zoological Park.

Examinations.

At the end of each session written examinations will be held as follows:

The *First Class* will be examined upon the elements of anatomy, physiology, chemistry, materia medica, histology and embryology.

The *Second Class* will be examined upon anatomy, embryology, pathology, physiology, practical chemistry materia medica and therapeutics.

An oral examination upon the cadaver itself, embracing regional anatomy, will also be required of the Second Class.

The *Third Class* will be examined upon the practice of medicine, surgery, obstetrics, gynæcology, toxicology, urinary analysis and pathology.

The *Fourth Class* will be examined upon the practice of medicine, surgery, obstetrics, gynæcology, clinical medicine, clinical surgery, laryngology, opthalmology and otology, animal parasites and bacteriology, medical jurisprudence and state medicine.

At the termination of each laboratory course an examination will be held.

No fee will be required for any of these examinations.

Students of the first, second, or third class failing to pass their examinations will be again examined in September, should they so desire. For this examination a fee of $20, to be paid invariably in advance, will be charged.

Students of the Fourth Class failing to pass the examination will be required to attend another course of lectures before being again examined.

The written examination of the students of the second, third, and fourth year will be supplemented by an oral examination.

Requirements for Admission.

The candidate must be of good moral character and at least twenty-one years of age. He must have studied medicine not less than four years, during which he must have attended four full courses of instruction, delivered in some recognized medical school, the last of which shall have been delivered in this institution. He must have attended at least two courses of practical anatomy, laboratory courses in physiology, chemistry, histology, pathology, and bacteriology, and the clinical courses of instruction.

Fees.

Matriculation (payable but once)	$5 00
Tuition, each year	100 00

No extra charge for Laboratories nor Demonstrators' fees.

No graduation fee is required.

Payment of fees is required at the commencement of the session.

Good board, at reasonable rates, can be obtained in the immediate vicinity of the College.

GEORGETOWN UNIVERSITY,

School of Law.

1894–1895.

The next term of this institution opens Wednesday evening, October 3, 1894, at 6.30 o'clock, in the Georgetown University Law Building, 506 and 508 E Street N. W., in the city of Washington. All persons interested are invited to attend the introductory lecture, which will then be delivered. The collegiate year closes on the first of June.

Advantages.

Of the great advantages offered by a Law School over the unassisted reading of a student in a law office there can be no question. Here, however, the experiment has been successfully made of uniting the advantages of the two. The lectures are held in the evening, and, so far as practicable, students who put themselves into timely communication with the Secretary are connected with the offices of the ablest lawyers of the city, where they are allowed to familiarize themselves with the conduct of business and the practical duties of the profession.

The holding of the lectures and other exercises in the evening also enables clerks in the various departments of the Government, and other persons who are engaged during the day, to avail themselves of the privileges of the School.

The site of the institution, at the Capital of the Nation, presents advantages for the study of American jurisprudence which are unequalled elsewhere, and must always remain so.

The Law Library at the United States Capitol contains over 50,000 volumes, embracing all the noted treatises, reports and periodicals, ancient and modern, American, English and of the nations of Continental Europe. By the operation of the copyright law and the outlay of an annual appropriation it is constantly enriched with new acquisitions, and is believed to be kept in a state of completeness unrivaled among the law libraries of the world. This magnificent collection is freely open to students for seven hours daily.

Congress, the Court of Claims, and the Supreme Court of the United States are in session during several months of each school year, and, with the Executive Departments, especially the Patent, Pension and General Land Offices, furnish advantages for professional study nowhere else enjoyed.

The Supreme Court of the District of Columbia has the common law, equity, criminal and probate jurisdiction of a State Court in the States, besides that of the Circuit and District Courts of the United States. Its sessions afford the student opportunities for hearing the forensic arguments and forming the acquaintance of the leaders of the American Bar from all parts of the Union, besides thoroughly familiarizing himself with the practice of these various courts.

There is, in the District of Columbia, no "Code" of either substantive law or procedure, and no very extensive statutory provisions. This obviates the tendency observable at so many law schools toward consuming the time and loading the memory of the student with merely local enactments, which will be of worse than no service to him when he returns to his home or removes to another locality after graduation. The jurisprudence of the District remains almost intact that of Maryland on the day of original cession, February 27, 1801, and is, therefore, as close an approximation to the simplicity of the Common Law, so constantly referred to in the text-books, as can be found in the Union.

Boarding, Etc.

There is no boarding department connected with the Law School. The majority of the law students board in Washington City, where the Law School is located, and where the cost of comfortable lodgings, board, fuel and gas, varies from $20 to $30 per month, according to the location and appointments selected. Satisfactory accommodation can easily be had at $25 per month; and there are every year students who provide for themselves comfortably at a cost of $20 per month, and even less. Tuition is $80 per annum, with no incidental charges except a diploma fee of $10 upon graduation. Cost of text books is about $30 per annum. The Law School session is from the first Wednesday in October to the first Wednesday in June—about eight months. The necessary expense for board, lodging, tuition, books, etc., per annum, is, therefore, about $300, exclusive, of course, of clothing and general incidental expenses.

Admission.

Students desiring to become members of the School enter their names upon the Secretary's register, at or before the opening of the term in October.

Candidates for advanced standing—*i. e.*, those desiring to complete the course in one year—must, at the time of entry, present certificates of at least one year's previous study at some approved Law School, or under the direction of a reputable practitioner.

Those desiring to enter the Postgraduate Course should exhibit their diplomas, or certificates of equivalent study.

Course of Study.

The regular curriculum covers a period of two years, divided into a Junior and Senior Course.

The Postgraduate Course covers an additional period of one year.

Students in the Senior Course are required to attend the Lectures, and to be examined upon Part 2 of the studies of the Junior Course, as indicated below; and students in the Postgraduate Course are, in like manner, required to attend the Lectures, and to be examined upon the studies of Part 2 of the Senior Course.

Regular and punctual attendance on the part of the student is required, as also preparation for thorough recitations in class daily.

Candidates for a degree must have been in regular attendance for at least one year, and must pass a satisfactory examination on the entire year's course of study.

The following is the course of study pursued in the Law School:

JUNIOR COURSE:—Part 1. *Personal Property, Torts, Domestic Relations and Criminal Law.*

Part 2. *Real Estate, Contracts, and Bills and Notes.*

SENIOR COURSE:—Part 1. *Subjects of Part 2 of the Junior Course.*

Part 2. *Pleading, Practice, Evidence, Equity, Moot Court.*

POSTGRADUATE COURSE:—Part 1. *Subjects of Part 2 of the Senior Course.*

Part 2. *Corporations, Common Law Practice, Equity Pleading and Practice, Testamentary Law, Constitutional and International Law, Comparative Jurisprudence, Civil Law, Conveyancing, Office Practice, etc.*

SPECIAL LECTURES:—*Admiralty Jurisprudence, Statutory Law and Natural Law.*

Examinations.

No examination is required on entering the School or at the beginning of the Course.

Each text-book in the course of study is made the subject of a carefully-written examination upon, or shortly after, its completion. Students passing satisfactorily upon the subjects of these examinations will not be required to stand a second examination upon them during the year; while those who fall below the standard required will have an opportunity of making up the deficiency before its close. This system has been found to promote more careful study, and at the same time to admit of more thorough examination, with less tax upon the student's endurance, than a general examination at the close of the Course.

Postgraduate Course.

As will be seen by reference to the curriculum, the course of study for the Junior and Senior Classes embraces quite as much as can be acquired with thoroughness in two years, and a diploma, conferring the degree of Bachelor of Laws, is granted to students successfully completing this course. In the District of Columbia, however, and in many of the States, three years' study is an indispensable prerequisite to admission to the Bar; and it was to meet this exaction or demand for a higher standard of legal acquirements that the Postgraduate Course was added. It has been a source of no slight gratification to the Faculty, and a most favorable omen for the Bar of the future, to observe that many gentlemen who propose to practice in jurisdictions where the requirements are less rigorous, and some, indeed, who had been previously admitted to the Bar, have, nevertheless, diligently pursued the Postgraduate Course of Study, taking the degree of Master of Laws.

The degree of Master of Laws is conferred upon those who successfully complete the Postgraduate Course of Study, and the holder thereof is entitled to participate in the studies and exercises of the School thereafter without additional charge.

The Moot Court.

Especial, painstaking effort has been devoted, with gratifying results, to perfecting such an organization of the Moot Court as would render that adjunct of the School not merely a forum for the argument of mooted questions of law, but a useful and efficient training-school for the practical duties of the profession.

As now organized, the Court is divided into a Circuit Court and a Court of Appeals.

The Circuit Court holds two sessions weekly, known as the Special and the Regular Term. At the Special Term motions, demurrers, pleas in equity and all proceedings of an interlocutory or preliminary nature which in actual practice ordinarily precede the final hearing upon the merits of the case are heard and disposed of, while at the Regular Term such proceedings are had as usually characterize the final hearing of causes in courts of the first instance. The practice conforms to that of the Supreme Court of the District of Columbia, with pleadings as at common law.

The Court of Appeals, to which causes may be removed from the Circuit Court by writ of error or appeal conformably to the practice of the United States Supreme Court, is held by Messrs. Tallmadge A. Lambert, Job Barnard and Henry Wise Garnett, and sits monthly, or oftener, as the work before it may require.

While the students in the Postgraduate course are expected to take the leading part in the exercises of the Moot Court, it will continue to be the endeavor of the Faculty to make the Court, as in the past, a training-school for all the students, as their progress warrants, in pleading, practice and forensic debate.

Library and Reading Rooms.

A carefully selected Library, comprising the latest editions of the standard text-books, and the leading reports, has been provided for the accommodation and convenience of students, in a well-lighted and suitably appointed suite of rooms in the Law Building set apart exclusively for the purpose. These rooms are open to students and alumni of the School at all hours of the day and evening.

Prizes.

The following prizes are offered for the competition of the students in the several classes:

1st. A cash prize of $40 to the member of the Junior Class maintaining the best average in recitations and examinations during the year.

2d. A cash prize of $40 to the author of the best essay upon any legal subject, among the members of the Senior Class.

3d. A cash prize of $100 to the member of the Senior Class maintaining the best average in recitations and examinations during the year.

4th. A cash prize of $50 to the member of the Senior Class maintaining the second best average in recitations and examinations during the year.

5th. A cash prize of $50 to the member of the Postgraduate Class maintaining the best average in recitations and examinations during the year.

6th. A cash prize of $25 to the author of the best essay upon any legal subject, among the members of the Postgraduate Class.

Lecture-Students.

Those who wish to avail themselves of the lectures delivered at this School without being subject to recitations or being candidates for a degree, may do so upon payment of one-half of the regular charge for tuition.

Less than two years' attendance as a lecture-student will not entitle one to admission to the Senior Class of the year following.

System of Instruction.

The system of instruction adopted by the Georgetown Law School is the following: A lesson, averaging from thirty to forty pages of the textbook, is assigned in advance, which the student is expected to master as thoroughly as he can before the recitation hour. The lecturer then goes over the ground covered by the text, explaining what is obscure or difficult, pointing out the application in practice of the principles treated of, and illustrating, by examples, their application in actual cases. Then follows the "Quiz," in which the lesson in gone entirely over again in the shape of questions, requiring the students to reproduce in their own language all that it contains, with practical applications of the doctrines learned to supposed cases put by the lecturer. The student thus has three opportunities of becoming familiar, theoretically and practically, with each topic treated of in the course: *once* by careful study of the text, *a second time* by the discussion of it in the lecture, *and once again* by himself reproducing and practically applying the principles thus taught, in his answers to the "Quiz." This system has been found, after careful and painstaking tests, most satisfactory to both teacher and student, and productive of the highest standard of proficiency in study It is believed to be absolutely the best.

Terms.

The charge for attendance is *Eighty Dollars* per annum. As far as payment of tuition is concerned, the collegiate year is regarded as divided into two equal terms, beginning on the first Wednesday in October and February, respectively, and one half the annual charge becomes due and payable on the following day, Thursday. For the accommodation of students, the Secretary will, when requested, receive monthly payments of $10 each, *strictly in advance.*

Persons enrolling their names as students will be considered as having entered the school for not less than one term, unless an express agreement to the contrary is made. Payment will not be received for less than one full month, nor can any deduction be made for absence.

For the *Postgraduate Course* the charge is *Fifty Dollars*, except to students holding the degree of Bachelor of Laws from this School, to whom the charge will remain as hevetofore, riz.: *Twenty-five Dollars.* The tuition in this class will be payable in two equal instalments in advance, or monthly in advance, by special arrangement with the Secretary.

For attendance on Lectures, as hereinbefore stated, the charge is *Forty Dollars* per annum, payable in two instalments in advance.

The fee for graduation, which is additional to the yearly charge for attendance, *and which includes all expenses of the annual commencement*, is *Ten Dollars.*

Description and History.

Georgetown College is situated on Georgetown Heights, two and one-half miles distant from the Capitol, overlooking the City of Washington and the Potomac River, and commanding one of the noblest views in the world. The site is singularly healthful.

This College was the first Catholic institution of higher learning founded in the United States, and was established through the efforts of the Rev. John Carroll, afterward the first Archbishop of Baltimore. Its foundation has hitherto been referred to the year 1789; but in fact the earliest building was begun during the year 1788; students, however, were not received before 1791. Upon the reorganization of the Society of Jesus in Maryland, in 1805, the Georgetown Academy, as it was then called, was transferred to the Fathers of that Society, under whose control and direction the University still remains. The College was chartered as a University, by act of Congress, March 1st, 1815, and two years later the power thus acquired of conferring degrees was first exercised. In the year 1833, by an especial decree, the Holy See empowered Georgetown University to grant degrees in Philosophy and Theology. In 1843 an Astronomical Observatory was erected and fully equipped. The College of Medicine was opened in 1851, and the College of Law in 1870. The present magnificent main building of the College was begun in 1878. Since its erection, the College buildings, exclusive of the departments of Medicine and Law, present an aggregate frontage of about eight hundred feet. They are surrounded by grounds comprising seventy-eight acres, a large part of which is occupied by the "Walks," whose sylvan beauty has made them famous.

Studies.

The course of studies at Georgetown is that generally pursued in colleges of the Society of Jesus. The classes of the Collegiate Department are four in number, corresponding to the Freshman, Sophomore, Junior, and Senior years, but known in our own traditional terminology as the Schools of First Grammar, Poetry, Rhetoric, and Philosophy. The Preparatory Department now consists of three classes, a fourth and lowest class, which formerly existed, having been abolished at the opening of the present year.

The plan of studies is based on the conviction that a complete liberal education should aim at developing all the powers of the mind, and should cultivate no one faculty to an exaggerated degree at the expense of the others. During the early part of the preparatory course, the student's attention is principally devoted to acquiring an accurate knowledge of his native tongue and of elementary mathematics, with all the branches ordinarily taught to boys from thirteen to sixteen years of age. At the same time the rudiments of the Latin language are mastered, and the study of grammar is thus made from the beginning comparative and analytical.

By means of constant oral and written exercises, the methods of teaching are rendered thoroughly practical. Soon Greek is begun, followed, in the second year, by French or German.

As the pupil advances, his judgment is exercised more and more, while less attention is given to mere memory work. When, after at least three years of preparation, he reaches the college course, properly so called, he is supposed to be able to read with some facility Latin, Greek and French, and perhaps German; to be thoroughly familiar with the grammars of these languages; in a word, to have the tools of literary work in some degree under his control. He then devotes himself for a year more particularly to the cultivation of his literary taste and powers by reading and imitating the best models of ancient and modern literature. The following year is given in great part to the training of the imagination; the nature of poetry is explained, the technicalities of verse-making are mastered and practiced, and the great poets are carefully studied. Then comes the year of Rhetoric, during which the student's critical powers are exercised and developed, poets and prose writers are scientifically analyzed, the principles of oratory are carefully examined, and the speeches of the world's greatest orators are read and discussed. The last year of the course serves especially to discipline the reasoning faculties by the study of Logic, Metaphysics, and Ethics, and by higher studies in Mathematics and Natural Sciences. Among these branches, the greatest attention is given to Metaphysics a thorough mastery of which is regarded as of the utmost importance, since it serves to arrange systematically all the student's knowledge and to furnish the key to all true science.

While this literary and philosophical training has been going on, the course of mathematics has been steadily continued, and natural science, in its various branches, has been taken up as soon as the development of the mind would admit of its being pursued in a systematic and really scientific way. Whatever is important in natural science is made a part of the curriculum, and is taught with a philosophical analysis intended to guard the student against that confounding of mere information with learning which is the danger of modern education. Physics, Mechanics, Geology, General and Analytical Chemistry, all form important parts of the regular obligatory series of studies.

It is believed that this course is calculated to develop and train all the powers of the mind, rendering it capable of understanding and appreciating all branches of learning. It serves as a foundation for special training in any branch that the student, with his mind mature and trained, may decide to take up.

The successful completion of this course is rewarded with the degree of Bachelor of Arts.

When this point is reached, the University offers her graduates special training in several branches, at their option. Her schools of Medicine and Law give full and accurate training for those professions; while in the College itself postgraduate courses are offered in Philosophy, Literature, History, Physics, Chemistry, and Mathematics. It is desired to add as soon as possible, to the departments already existing, a School of Engineering.

But in the undergraduate department, the same course is obligatory upon all; to render it in any considerable degree elective would be to defeat its very end and aim. Hence elective studies are few and merely incidental to established lines of work. From this prescribed course exemption will not be granted.

No provision is made for an exclusively English or Commercial Course, and only students who intend to follow the full classical curriculum will be admitted.

A special class is organized for the benefit of older students who, being well versed in the ordinary English branches, desire to advance more rapidly in the classic languages.

Lectures, Etc.

The students of the higher classes are allowed at times, under proper direction, to avail themselves of the lectures of the Smithsonian Institution, special lectures in the Law Department, the debates in Congress, or the pleadings before the Supreme Court, when interesting and instructive subjects are under discussion.

Religious Instruction.

Religious instruction is considered of the first importance in education.

Catechism forms one of the regular class recitations, and weekly catechetical lectures are attended by all. The prize for Christian Doctrine is awarded to the author of the best paper upon the matter of these lectures. Further instruction is given to such as have need of it, or are preparing for the Sacraments. For the development of piety there are two Sodalities, which meet weekly. All Catholic students are expected to approach the Sacraments at least once a month.

Degrees.

The degree of Bachelor of Arts is conferred upon students who have made the regular course and have passed satisfactory examinations in the English branches of study, the Latin and Greek Classics, French or German, Mathematics, including Differential and Integral Calculus, Chemistry, Physics, Mechanics, and Rational Philosophy.

The degree of Master of Arts, in course, is conferred upon Bachelors of Arts who have followed, for at least one year, the prescribed number of Postgraduate courses of study, and have passed satisfactory examinations therein.

The candidate for the degree of Bachelor or Master of Arts is required to compose an essay on some literary, scientific, or moral subject, which, if accepted by the Faculty, must be left in the archives of the College.

Honorary degrees are conferred, at the discretion of the Faculty, upon those who unite proficiency in the Classics with eminence in Literature, Science, or the Professions.

Sessions and Holidays.

The Academic year is divided into two terms:

The first term begins usually on the second Wednesday in September, and ends on the last day of January. The second term begins on the 2d of February and ends with the annual commencement on the third or fourth Tuesday of June.

The Christmas recess begins on the 23d of December and ends on the 2d of January. The Easter recess extends from Wednesday in Holy Week until the Wednesday after Easter, exclusive.

Students who overstay the time specified will be deprived of the privilege of returning home at the next recess. Hence parents and guardians are urged to observe the limits set for the recesses that occur during the year.

No schools are taught on Wednesday and Saturday afternoons, nor on days of general religious or national observance.

The classes begin at 8.45 A. M. and continue until 12. They are resumed at 3 and continue until 5 P. M.

Examinations.

A General Examination in all classes is held toward the close of each term.

Promotions ordinarily take place at the beginning of the first term. They will be made, however, at any time during the year, when warranted by the progress of the student.

Awards and Reports.

The prizes, at the Annual Distribution in June, are awarded to those who, by their class exercises during the year and the excellence of their examinations, attain the required number of marks. As marks are not made up to absentees, parents who permit their sons to remain at home beyond the period allotted for vacation or recess cannot expect to see them hold distinguished places in their classes.

Besides the Annual Distribution of Awards, the Faculty and students are assembled at the beginning of every month, when the marks and the standing of the students in their respective classes for the preceding month are publicly proclaimed, and testimonials awarded to those who have attained the prescribed degree of excellence.

A quarterly report of the standing in class, the progress and general conduct of every student is sent to his parents or guardians.

Requirements for Matriculation.

Students may enter at any time during the session, and, on examination, will be assigned to the class for which their prior attainments have fitted them.

Satisfactory testimonials of good conduct will be required from those who come from other institutions.

Candidates for admission to advanced classes must pass a satisfactory examination upon all the subjects previously studied by the class which they propose to enter.

From certain preparatory schools of established reputation students are admitted to the School of First Grammar, or Freshman Class, without examination, upon the Principal's certificate that they have completed the required amount of work and are prepared to enter College.

In all other cases, for admission to this class, a successful examination is required in the following subjects, or their equivalent:

LATIN.—The entire Latin Grammar, including a knowledge of all regular syntactical constructions, and of the outlines of Prosody. Translation into Latin at sight of complex English sentences, entailing the application of rules for *Oratio Obliqua* and for conditional sentences. Nepos' Lives, to the end of the life of Alcibiades, also the life of Atticus. Phædrus' Fables, two books. Cicero's Selected Letters, five hundred lines. Cæsar's Commentaries, two books. Ovid's Metamorphoses, one thousand lines. An equivalent from the Elegies, or from Virgil's Bucolics or Georgics, will be admitted instead of a portion of the Metamorphoses.

GREEK GRAMMAR.—Etymology, complete (including all irregular and defective forms), and the outlines of Syntax. Translation into Greek of simple English sentences. Xenophon's Anabasis, Books I. and II. Lucian's Dialogues (Græca Minora).

N. B.—In the discussion of the classic authors, both Greek and Latin, the candidate must be prepared to give a thorough grammatical analysis of every word and phrase.

ENGLISH.—An English composition will be required evidencing thorough mastery of the grammar and some proficiency in descriptive and narrative writing.

HISTORY.—A general outline of History, both ancient and modern.

MATHEMATICS.—Arithmetic, entire. Algebra, to end of Quadratics. Geometry, Plane and Solid. (Wentworth's Complete Algebra, and Wentworth's Geometry, or works of equal grade.)

MODERN LANGUAGES.—The elements of French or German grammar and some proficiency in translation and analysis.

Course of Studies

PRESCRIBED FOR THE

DEGREE OF BACHELOR OF ARTS.

SCHOOL OF FIRST GRAMMAR.

Freshman.

LATIN.—Sallust; Cicero—De Senectute, De Amicitia, Epistolae; Virgil—Eclogues, the Æneid; Alvarez' Latin Grammar—Syntax reviewed: exceptions, idioms, figurative construction; Latin Composition; Casserly—Prosody; Exercise in Metrical Composition; Sight rendering from various Latin authors; Practice in speaking Latin.

GREEK.—Xenophon—Hellenica; Homer—Iliad; Yenni's Greek Grammar, completed; Themes.

ENGLISH.—Burke's Lingard's History of England; Fiske's Antiquities (Grecian); Meiklejohn's "The English Language," Parts III., IV., Laws of Versification; Bell's Modern Reader and Speaker; Declamation; Compositions in Prose and Verse; De Harbe's Full Catechism, completed.

MATHEMATICS.—Wentworth's Complete Algebra, finished.

FRENCH.—Dufour—French Grammar, Manuel de Prononciation; French Reader, completed.

GERMAN.—Schmitz's German Grammar; Evans' Otto's German Reader.

SCHOOL OF POETRY.

Sophomore.

LATIN.—1*st Term.*—Virgil—The Æneid: Livy; Horace—Ars Poetica; Casserly—Prosody; Lectures on Poetry; Du Cygne's Ars Rhetorica.

2*d Term.*—Cicero's Orations; Horace's Odes and Epodes; Lectures on Poetry; Compositions in Prose and Verse; Du Cygne's Ars Rhetorica.

Both Terms.—Sight reading from various Latin authors; Practice in speaking Latin.

GREEK.—*Both Terms.*—Homer—the Iliad; the Olynthiacs of Demosthenes; Yenni's Greek Grammar; Greek Prosody; Themes.

ENGLISH.—Lectures based on Brooke's English Literature; Coppens' Rhetoric; Analysis—Hales' Longer English Poems; Johnston's History of the United States; Fiske's Antiquities (Roman);

Bell's Modern Reader and Speaker; Declamation; Compositions in prose and verse; Doctrinal Exposition of Religion; Church History—lectures by the professor.

MATHEMATICS.—Wentworth's Trigonometry and Surveying; Analytical Geometry.

SCIENCE.—Chemistry—Remsen's Introduction to the study of Chemistry; Remsen's Organic Chemistry; Remsen's Laboratory Manual; Laboratory Practice under direction of professor.

SCHOOL OF RHETORIC.

Junior.

LATIN.—1*st Term* —Cicero's Orations; Quintilian; Horace's Satires and Epistles; Lectures on Rhetoric; Du Cygne's Ars Rhetorica.

2d Term.—Cicero's Orations; Tacitus—Agricola and Germania; Juvenal; Lectures on Rhetoric; Compositions in Prose and Verse.

Both Terms.—Sight reading from various Latin authors; Practice in speaking Latin.

GREEK.—Demosthenes on the Crown; The Œdipus Tyrannus of Sophocles; Themes.

ENGLISH.—Coppens' Rhetoric, completed; Lectures based on Brooke's English Literature, completed; Analysis—Hales' Longer English Poems; Story on the Constitution of the United States; Bell's Modern Reader and Speaker; Declamation; Compositions in Prose and Verse; Doctrinal Exposition of Religion, completed; Church History, completed—lectures by the professor.

MATHEMATICS.—Taylor's Differential and Integral Calculus.

SCIENCE.—Chemistry—Laboratory Course of Qualitative Analysis, under direction of professor; Manual of Qualitative Analytical Chemistry; for advanced students, Quantitative Analysis.

SCHOOL OF PHILOSOPHY.

Senior.

RATIONAL PHILOSOPHY.—Russo's Logic and Metaphysics; Russo's Ethics and Natural Right. Public and Private Disputations; Papers for graduation and honors, six times in the year.

NATURAL SCIENCE —Mechanics—Dana. Physics—Atkinson's Ganot; Thompson's Electricity and Magnetism; Laboratory Practice. Young's Astronomy; Le Conte's Geology. Public lectures by the students. Papers for graduation and honors six times in the year.

Declamation.

THE POSTGRADUATE SCHOOL.

OBJECT.—This department is intended for graduates who desire to continue and extend their education in the Arts and Sciences, whether it be for the mere love of learning, or to qualify themselves as professors, or finally with a view to a more complete preparation for some other of the learned professions, by devoting themselves to liberal studies of a higher character, cognate to the career at which they aim.

The courses, if pursued to the full extent recommended, are ample enough to tax the energies of any student. It would, therefore, be more satisfactory to devote an entire year to them before entering upon the study of Law or Medicine. Yet the minimum of work exacted is not too much to be profitably combined with the required attention to purely professional studies.

ADMISSION.—All graduates of Georgetown College, or of institutions of like standing, are admissible to these courses.

RESIDENCE.—Students taking only graduate work at the College may reside within the College walls or not, as may suit their convenience. Those attending the Schools of Law and Medicine are not allowed to live in the College ; but good boarding-places will be secured for them, if desired, at reasonable rates.

TIME.—The yearly session opens about the first of October, and closes with the annual commencement of the College, on the third or fourth Tuesday in June.

STUDIES.—A brief elenchus of topics in the various branches will be found subjoined. Class work is carried on by lectures, directions in reading, and intimate personal and practical guidance on the part of the Professor ; and on the side of the student by repetitions, written papers, and the preparation of theses. The aim is to surround the graduate student with all the facilities for advanced work and every incitement to independent investigation—in a word, to inspire him with the genuine spirit of scholarship.

Every student must select at least three courses, involving attendance upon lectures for eight hours per week. One of these courses must be Rational Philosophy. Where more courses are taken, successful examinations in three, one of which must be Philosophy, will be counted as sufficient for the degree.

AIDS TO STUDY.—Students have the privilege of consulting their professors beyond the class hours. Under the direction of the respective lecturers, they are permitted the use of the Riggs Library, the Cabinet of Physics, the Physical and Chemical Laboratories of the College, and the scientific collections of the Coleman Museum. They can also avail themselves of the libraries and collections under Government control in the city of Washington.

DEGREES.—The Master's Degree in Arts or Sciences will be given to those already holding the corresponding Bachelor's degree on the completion of one year of residence, with attendance upon lectures and satisfactory examinations, et cetera, as specified above.

FEES AND EXPENSES.—The fee for tuition is $60 for the entire course. The charge for room, board and washing at the College is $300 for the year. Text-books will not ordinarily exceed $10 or $15. Hence it will be seen that the yearly expenses will amount to about $375.

COURSES.

I. RATIONAL PHILOSOPHY. Four hours per week.

1. METAPHYSICS. A more particular and precise treatment of questions of the day depending upon Psychology.

2. NATURAL THEOLOGY. The Concept, Existence and Attributes of the Deity from the standpoint of reason, developed in refutation of current errors.

3. ETHICS. Completion of the Moral Philosophy begun in the undergraduate course.

The Right of Property. Socialism. Communism. Private Property and its Opponents. Capital.

The State: Its Origin, Object, Constitution, Nature, Limits. Church and State. Church and School. Functions of the Civil Power. Sociology.

Political Economy.

International Law. The *Jus Gentium* in General; in Times of Peace; in times of War. Treaties. Principles of Nationality. The Family of Nations.

II. LITERATURE. Three hours per week.

1. GENERAL LITERATURE. *a*) Preliminaries. A Survey of Early Oriental Literatures. Greek—The Age of Pericles. Latin—The Age of Augustus. The Middle Ages. The Neo-Latinists. Italian—The Age of Leo X. Spanish—The Age of Philip II. German—The Classic and Romantic Schools. Russian—The Nineteenth Century.

b) Some Christian Classics of the First Five Centuries. Greek—Clement of Alexandria, Eusebius, St. Gregory of Nazianzus, St. Basil, St. John Chrysostom, Synesius. Latin—Minucius Felix, Tertullian, St. Hilary of Poitiers, St. Ambrose, Prudentius, St. Jerome, St. Augustine, St. Paulinus of Nola, Salvian, Sedulius, Boethius.

c) Sketches of the Literatures of the East: Hebrew, Sanskrit, Zend, Assyrian, Egyptian, Persian, Arabic and Chinese.

2. ENGLISH LITERATURE. *a*) Philology. The English of Chaucer, of Shakespeare, of Dryden and of Newman. The Grammar and Vocabulary of each Period, together with analytical reading of the best authors.

b) History of Literature from Beowulf to the present decade. American Literature.

c) Advanced Rhetoric. The application of principles to the various forms of composition in prose and verse, with a view to authorship. Criticism. Analysis of masterpieces.

III. FRENCH LITERATURE. Three hours per week. *a*) Philological Section. Formation of the Language. Its Development and Present State. *L'Académie.*

b) Historical Section. French Literature from the *Chanson de Roland* to the last Conference of Monsabré.

c) Practice of French in the Writing of Prose and Poetry, Conversation and Declamation. The purpose is to attain not only to an easy mastery of the language, but to its literary use. The classes are carried on in French, and the written papers of the student must also be in that tongue.

IV. HISTORY. Three hours per week.

1. *a*) The Theory of Historical Writing. Investigation of methods pursued by popular English Historians.

b) Sources of History. Monuments. Numismatics. Traditions. Chronicles. Annals. Classic History. Philosophic History.

c) Principles of Chronology.

2. The Constitutional History of Greece, Rome, France, England and the United States. History of Federal Government. Comparative study of Modern Constitutional Government.

V. COURSES OF MATHEMATICS. Two hours per week for each course.
a) Arithmetical and Algebraic Analysis. *b*) The *Ausdehnungslehre.* *c*) Non-Euclidian Geometry.

VI. COURSES OF PHYSICS. Two hours per week for each course.
a) Mathematical Theory of Electricity. Theory of Dynamos. *b*) Thermodynamics.

VII. COURSES OF CHEMISTRY. Lectures: Three hours per week. Laboratories open eight hours daily.

Laboratory Courses: *a*) Quantitative Analysis ; *b*) Determinative Mineralogy, including Blowpipe Analysis and the simpler processes of Furnace Assaying ; *c*) Synthesis and Analysis of Carbon Compounds.

Lectures: Chemical Philosophy. Hydrocarbons and their Derivatives.

In the Course of Literature some modifications were made during the year 1894–'95. It was divided into two half-courses, Rev. L. J. KAVANAGH lecturing on Oriental Literatures, and Rev. ROBERT FULTON treating the subjects of British Forensic Eloquence, Shakespeare's Hamlet and the Modern Novel.

To the courses previously existing a new one is now added, on German Literature of the Eighteenth Century. It will be given by Mr. JOHN W. CORBETT, S. J.

SUPPLEMENTAL COURSES.

Series of Lectures on subjects of especial interest will be arranged as opportunities arise during the year.

PROFESSORS OF THE GRADUATE DEPARTMENT FOR 1894–'95.

Philosophy—Rev. E. I. DEVITT, S. J.

Literature—Oriental—Rev. L. J. KAVANAGH, S. J.
English—Rev. ROBERT FULTON, S. J.
French—Rev. A. COPPENS, S. J.

Constitutional History—Rev. D. J. MACGOLDRICK, S. J.

Mathematics—Rev. J. G. HAGEN, S. J.

Physics—Mr. JOHN J. THOMPKINS, S. J.

Chemistry—Rev. JOHN W. FOX, S. J.

PREPARATORY DEPARTMENT.

Faculty and Officers.

REV. J. HAVENS RICHARDS, S. J.,
President.

REV. FRANCIS P. POWERS, S. J.,
Vice-President; Prefect of Studies and Discipline.

REV. JOHN B. PITTAR, S. J.,
First Assistant Prefect of Discipline, Junior Division; Teacher of Geometry, Section B.

PATRICK F. O'GORMAN, S. J.,
Teacher of the Class of Second Grammar; Assistant Prefect.

CHARLES N. RALEY, S. J.,
Teacher of the Class of Third Grammar; Assistant Prefect, Junior Division.

REV. WILLIAM J. RICHLEY, S. J.,
Teacher of the Class of Third Grammar, Lower Section, and Elocution; Lecturer on Christian Doctrine.

JOHN D. BUTLER, S. J.,
Teacher of the Class of Rudiments; Assistant Prefect.

JOHN T. CONWELL, S. J.,
Teacher of Geometry, Section A, and Third French; Assistant Prefect.

REV. DANIEL J. MACGOLDRICK, S. J.,
Teacher of the Class of Second French.

EDWARD W. RAYMOND, S. J.,
Teacher of Third French, Section B; Assistant Prefect, Junior Division.

MICHAEL A. MESS, A. M.,
Teacher of German.

EDWARD J. MAHONEY, A. M., M. D.,
Teacher of Lower Algebra, Section A.

BERNARD F. McGRATH, A. B., M. D.,
Teacher of Lower Algebra, Section B.

JOHN J. MURPHY, LL. B.,
Teacher of Arithmetic and Book-keeping.

Requirements for Admission to the Preparatory Department.

Boys will be received in this department who have reached the age of thirteen years, and who are so far developed in mind, and so well acquainted with the ordinary English branches, as to enable them to begin with profit the study of the elements of Latin and Greek. Arithmetic must be thoroughly known to the end of Percentage.

Course of Studies

IN THE

PREPARATORY SCHOOLS.

RUDIMENTS.

LATIN.—Alvarez' Latin Grammar; Historia Sacra; Themes.

GREEK.—Yenni's Greek Grammar; Witticisms of Hierocles; Æsop's Fables; Themes.

ENGLISH.—Weld and Quackenbos' English Grammar; Bell's Modern Reader and Speaker; Sargeant's Etymology; Mitchell's Geography; Kerney's First Class Book of History; Gilmour's Bible and Church History; Catechism; Written Exercises; Declamation; Penmanship.

ARITHMETIC.—Wentworth's Common School Arithmetic, completed: Mayhew's Bookkeeping.

SCHOOL OF THIRD GRAMMAR.

LATIN.—Cicero's Selected Letters; Nepos; Phædrus; Scanning of Phædrus; Alvarez' Latin Grammar; Latin Composition.

GREEK.—Yenni's Greek Grammar; Æsop's Fables, continued; Xenophon—The Anabasis; Themes.

ENGLISH.—Meiklejohn—The English Language, Part I.; Mitchell's Geography, completed; Fredet's Ancient History; Bell's Modern Reader and Speaker; Declamation; Compositions; DeHarbe's Full Catechism.

MATHEMATICS.—Wentworth's Complete Algebra to Logarithms.

FRENCH.—Dufour—French Grammar, Etymology; French Reader.

GERMAN.—Schmitz's German Grammar; Evans' Otto's Reader.

SCHOOL OF SECOND GRAMMAR.

LATIN.—Cicero's Selected Letters; Cæsar's Commentaries; Ovid's Elegies and Metamorphoses; Scanning of Ovid; Alvarez' Grammar; Latin Composition; Casserly—Prosody.

GREEK.—Xenophon—The Cyropædia; Lucian's Dialogues (Græca Minora); Yenni's Greek Grammar; Themes.

ENGLISH.—Meiklejohn—The English Language, Parts I., II.; Fredet's Modern History; Fiske's Classical Antiquities (Ancient Geography and Mythology); Bell's Modern Reader and Speaker; Declamation; Composition; DeHarbe's Full Catechism.

MATHEMATICS.—Wentworth's Geometry, Plane and Solid.

FRENCH.—Dufour—French Grammar, Seconde Partie, De la Syntaxe; French Reader, continued.

GERMAN.—Schmitz's German Grammar; Evans' Otto's Reader.

Terms.

Regular Charges.

BOARDERS: Tuition, Board, Lodging, Washing, and Mending of Linen for the Scholastic Year	$325 00
Medical Aid and Medicines	10 00
Library Fee	2 00
	$337 00

$168.50 payable invariably in advance at the beginning of every half-year. A deposit must also be made, sufficient for books and other incidental expenses. This need not exceed $20.

HALF BOARDERS: Tuition, yearly	$60 00
Dinner at the College, yearly	50 00
Library Fee	2 00
	$112 00
DAY SCHOLARS: Tuition, yearly	$60 00
Library Fee	2 00
	$62 00

In the classes of Poetry and Rhetoric there is a charge of $10 per annum for the use of chemicals.

In the class of Philosophy there is a charge of $10 for the use of Philosophical and Astronomical instruments.

Graduation Fee	$10 00

Extra Charges.

Private room (allowed only to students of the higher classes), with heat, light, and attendance, per annum	$80 00
Use of Piano, per annum	12 00
Spanish, German, and Italian, per annum	30 00
Drawing or Painting, per annum	50 00
Stenography, per annum	20 00

Music (Piano, Violin and other Orchestral Instruments, Banjo, Guitar, Mandolin), $15 per quarter of 20 lessons.
Mending of clothes and shoes at moderate rates.

All accounts must be paid half-yearly in advance. If a student is withdrawn before the end of a session, no deduction will be made, except in cases of sickness or of dismissal, nor will any deduction be made for a shorter time than one month.

Degrees will not be conferred upon students whose debts to the College remain unpaid.

Articles of clothing will not be furnished by the College, unless a deposit for that purpose be left with the Treasurer, who will give a detailed account of its outlay in his regular semi-annual statement.

No bills for clothing or other articles will be acknowledged unless the purchase has been authorized by the Treasurer of the College.

Books and stationery, if not supplied by the parents or guardians themselves, will be furnished by the College at moderate prices.

Whatever sums parents or guardians may allow their sons or wards for pocket money must be deposited with the Treasurer, who will disburse the same according to instructions received or as circumstances may require. *No advance will be made beyond the deposit.*

Every student from beyond the United States must have a guardian in the vicinity, who shall be responsible for his bills and receive him in case of dismissal. The same may be required for students from very distant States in the Union.

General Regulations.

No distinction is made in the reception of students on the ground of religious belief, but all the boarders are required to be present at the public exercises of religion.

No student will be allowed to remain at the College during the summer vacation.

The introduction of intoxicating liquors, as well as of immoral books or papers, will render the offender liable to expulsion, as will any grave offence against morals or discipline.

The use of cigarettes is prohibited even to senior students.

The younger students are kept apart from the older, and their domitories, study hall, play-ground, etc., are entirely separate. They are forbidden the use of tobacco in any form.

Boarders.

It is important that boarders should come provided with a full supply of clothing for both summer and winter. They must also bring with them six towels and the same number of napkins, with a napkin-ring. Linen and all articles of clothing must be marked with the owner's full name.

Boarders are forbidden to leave the College grounds without permission. Violation of this rule will render the offender liable to expulsion. Leave to visit the city, except in the company of some member of the Faculty, will not be given without the written authorization of parents; and even with such authorization, the permission will be given but rarely and for good reasons. To Junior students this privilege is not granted.

Students whose parents reside in the District will ordinarily be permitted to visit them on the last Saturday of every month and to remain with them until Sunday evening.

The College Authorities reserve to themselves the discretionary power of supervising all correspondence of students.

To avoid serious loss of time from study, the students are prohibited from receiving daily newspapers regularly as individual subscribers. The principal papers, however, as well as other periodicals, are kept on file in the reading-room.

Day-Scholars.

Day-scholars and half-boarders, while within the College walls, are subject to all the rules and regulations for boarders.

They are required to attend the mid-day studies at the College.

Punctual attendance at class is required; and no day-scholar, after absenting himself or coming late, will be received in class without a note from a parent or guardian, countersigned by the Prefect of Studies.

Day-scholars are forbidden to take out letters or perform errands for boarders.

THE OBSERVATORY.

STAFF OF THE OBSERVATORY—REV. JOHN G. HAGEN, S. J., *Director;* REV. GEORGE A. FARGIS, S. J., REV. JOHN T. HEDRICK, S. J., *Assistant Astronomers;* JOHN J. O'KEEFE, S. J., *Attendant.*

At a distance of about four hundred yards from the College, on a prominent hill, is the Astronomical Observatory, the main building of which is sixty feet long and thirty feet wide.

I. The structure is divided from east to west into three rooms. The eastern room contains a meridian circle, by Troughton & Simms, of London. The divided circle has a diameter of forty-five inches, reading by four microscopes to fractions of seconds. The aperture of the object glass is four inches. In the western room is mounted a transit instrument, by Ertel & Son, of Munich. It is seven feet long and has a four and one-half inch object-glass. This instrument is fitted with a photochronograph. The middle part of the observatory is three stories high, surmounted by a rotary dome eighteen feet in diameter. Here is erected the new twelve-inch equatorial, which has already produced excellent results.

In the room below the dome is the library containing the Observations and other publications of nearly all the observatories of the world.

Under the library is the clock room, with four pendulum clocks and two chronometers, a chronograph, and a switchboard from which all the connections for electric light and time signals are made. A special line connects the switchboard with the United States Naval Observatory.

All the instruments and rooms have been furnished with electric light.

A separate dome, twelve feet in diameter, on the southwest brow of the hill, shelters the old equatorial, by Troughton & Simms, which has an aperture of nearly five inches.

An extension to the main building, on the east side of the meridian-circle room, contains an instrument for the determination of the variations of latitude. This new instrument is called the photographic zenith telescope.

Our three photographic methods of determining the variations of the poles are fully described with illustrations and results, in a volume published last year by this observatory under the title "The Photochronograph and its Applications."

II. The use made of the instruments has been substantially in the same lines as during the preceding years.

The *small equatorial* has been used for the observation of the variable stars, some of which have been discovered at this observatory.

The *large equatorial* is principally devoted to the construction of a Star Atlas of about two hundred charts, to be issued in four series. The first series is nearly ready for the press.

The results of our photographic work on double stars, planets and satellites with the twelve-inch equatorial are laid down in the volume mentioned above. The method is so promising that systematic work has been undertaken, especially with regard to Jupiter's satellites.

During our observations of the variations of the poles a new kind of error was discovered, apparently inherent in the zenith telescope, the effects of which have been noticed by us in several other series of observations made elsewhere. . A full account of our investigations of these errors will soon appear in one of the astronomical periodicals.

The photographic work done with the *Ertel Transit Instrument* is in the hands of the printer, and will be issued by the end of this school year.

The new nine inch photographic transit instrument, with two four-inch collimators, is partly finished and will be mounted in the course of this summer. Its cost has been defrayed chiefly by a legacy of $4,000, received from the late Mrs. Maria Coleman.

III. We cannot close this yearly report on the Observatory without calling the attention of all the friends of the College to a circular which has lately been distributed. It exhibits "The Present Condition and Needs of Georgetown College Observatory," and urges the necessity of a moderate fund which will yield an annual revenue of about a thousand dollars, in order to defray the current expenses and provide for the annual publications.

As we have already received in various donations about $20,000 before the reputation of the Observatory was established, may we not trust that some liberal hands will be found to create this foundation, and thus crown our efforts with permanent success?

THE DEPARTMENT OF PHYSICS.

The Physical Department occupies an entire floor of the east building in the south row. Adjoining the lecture room is a well-fitted laboratory, in which the students are taken through a systematic course of laboratory work, particular attention being paid to electrical measurements. The cabinet contains all the instruments needed for a thorough course of Physics. During the past year an Edison Dynamo-electric machine of 1½ horse power has been added to the equipment of this department.

CHEMICAL DEPARTMENT.

In Chemistry the College is remarkably well equipped, both in point of a large stock of apparatus and of excellent facilities for work.

In the laboratory for Qualitative Analysis each of the forty desks is fitted with drawers and lockers, separate drainage and water supply, and gas for both heating and illuminating purposes. There are also improved filtering apparatus, excellent fume chambers, blow-pipe tables, powerful furnaces for crucible operations, water-baths, drying ovens, etc.

A new laboratory, intended for students in General Chemistry, has just been fitted up in the main building and affords ample facilities for the practical course required in that branch, in addition to the regular lecture and daily repetition. The Lecture Room for Chemistry is large, well lighted, and well stocked with material and appliances for demonstration. For Quantitative Analysis and Assaying, offered as electives to graduate students, there is also a complete line of instruments and supplies.

THE COLEMAN MUSEUM.

As early as the year 1840 the collections in Natural History, under the care of Fathers James Curley and T. Meredith Jenkins, had become sufficiently extensive to warrant the setting apart of a special room for their preservation and exhibition. Here they remained until 1889, when, during the Centenary Celebration, they were transferred to their present quarters, in the north pavilion of the main building. To this hall, by decree of the Faculty, was given the name of James V. Coleman, '69, in acknowledgment of his distinguished benefactions to the College. It is a spacious, lightsome room, fitted with numerous cases of various designs, all made of cherry wood, highly polished.

Since their transfer, the various collections have all been newly classified and labeled, and displayed to the best advantage. Particular attention has been given to the mineral collection, which embraces specimens illustrating the entire field of Mineralogy, many of them being unique. Besides the exhibition series, numbering over 2,000 minerals, there is a fine working collection carefully determined and arranged in drawers for the convenience of students. In Geology and Paleontology, likewise, there are excellent collections, the rocks and fossils alone, arranged stratigraphically, occupying an entire row of double cases. Notable among the latter is the unusual number of specimens of the remains of vertebrates, many collected in Alaska. The shell collection is very large, and has long been admired for the beauty and variety of the specimens. The Herbarium, containing many thousand plants, has been remounted on the new form of sheets adopted by the National Herbarium in the Department of Agriculture. Specimens of particular interest are from time to time displayed in a set of swinging glass frames constructed for the purpose.

Though its principal object is the instruction of the student, the Museum contains many exhibits of interest to the visitor, among which may be mentioned the splendid collection of coins and medals, among them a complete collection of Pontifical medals, the numerous ethnological curios, and the relics of colonial times in Maryland.

An object of peculiar interest is a large Roman Mosaic picture, five feet by three, the gift of Mr. Coleman in memory of his deceased wife. It is undoubtedly one of the largest and finest of its kind in the world.

During the past year the Museum has received several donations of note.

The Natural History collection has again been increased by the gift from Woodstock College of several hundred ornithological specimens and a number of mammals.

THE RIGGS MEMORIAL LIBRARY.

This fine apartment occupies the greater portion of South Pavilion. It was founded by Mr. E. Francis Riggs, of Washington, as a memorial of his father, the late Mr. George W. Riggs, and his brother, Thomas Laurason Riggs, formerly a student of the College.

The elegance and convenience of the library are very great; in beauty and adaptation to its purpose it is judged to be unsurpassed in this country.

The collection of books is estimated at more than 60,000 in number, among which are many rare and curious works. There are one hundred volumes printed between the years 1472 and 1520, three manuscripts anterior to the year 1400, and others of later dates. Work on the card catalogue has been continued, and considerable progress has been made.

During the past year additions have been made to the Library to the extent of about 1,000 volumes, exclusive of pamphlets, by donation and purchase.

The founder of the Library has generously completed its equipment by the gift of elegant oaken furniture, including catalogue cases, with space for 300,000 cards, librarian's desk, railings, show-case, book-lift, etc.

THE CHAPEL OF THE SACRED HEART.

In the College Quadrangle stands the Chapel of the Sacred Heart of Jesus, measuring 109 feet in extreme length, and varying in breadth from 40 to 60 feet. This structure is the generous gift of the wife of an Alumnus, Mrs. John Vinton Dahlgren, and is intended as a memorial of her little son, Joseph Drexel Dahlgren, whose remains have been transferred to it. The Chapel was consecrated on Friday, June 9th, 1893. Its seating capacity is about 500. The College thus possesses what it has so long and sorely needed, a spacious and beautiful structure, wherein the services of the Church may be performed with fitting solemnity and dignity.

During the year the Foundress of the Chapel has continued to exercise her generosity in its regard. Three large and very fine stained glass windows from Munich have been added, together with a set of stations in relief.

The Art and Historical Collections.

The College possesses the nucleus of a valuable collection of works of art, and a number of Maryland Colonial relics. It has long been the wish of the Faculty to increase these collections and give them the prominence they deserve.

Among the paintings are several works of merit by ancient and modern masters.

There are two mosaic pictures of great beauty and value, and several busts in marble or bronze. Several additions have recently been made to this collection through the generosity of friends. Foremost among these is the admirable portrait of the Founder of the College, Archbishop John

Carroll, painted by Gilbert Stuart. This was purchased for the College at great expense by the Hon. Judge P. Ord, of Washington, D. C., and will hereafter constitute one of our greatest treasures. Judge Ord has also presented an ancient and curious wooden screen with paintings on both sides, and mounted in a handsome frame.

Some two years ago an effort was made to create a collection of portraits of distinguished alumni of the College. This has now taken considerable proportions. Some of the more important accessions are a portrait of James Ord, presented by his son, Judge P. Ord; one of Robert Walsh, by J. Neagle, given by Mrs. Robert S. Chilton, etc.

Needs of the University.

Without endowment, and deprived of all resources save the fees of the students, Georgetown College has grown from a struggling Academy to a University, which, with no undue commendation, may be called flourishing. Of late years she has been enabled to liquidate a considerable portion of the debt incurred, and to supply herself with halls and facilities long needed. But much remains to be done to enable Georgetown to continue the development which has been steadily going on for more than a century.

The Faculty therefore appeals earnestly to the friends of the College and to all who are interested in the advancement of education, to assist them with funds for the erection of buildings, and the endowment of the various departments of the University.

Chief among the wants of the College are the following: A SCIENTIFIC SCHOOL, which would include the present classes of Natural Science, and would add to them the technical courses long contemplated. For the establishment of such classes, particularly in ENGINEERING, the present time is peculiarly opportune. Applications are constantly received from students who desire instruction in these branches; and professors of the highest degree of competence are ready to undertake the task. What is still needed is that some one possessed of sufficient means and impressed with the value of scientific education, should make this exalted purpose his own. A suitable structure could be erected for a sum not less than $30,000 or $40,000. For apparatus and equipment a like sum would be required; but this expenditure could be distributed over several years.

A GYMNASIUM and NATATORIUM, $40,000 to $75,000.

A free HOSPITAL in connection with the Medical Department, $75,000 to $100,000.

Besides these principal demands, many smaller wants are pressingly felt. Such are, the completion of the two beautiful stone porches of the new building, one of which is estimated at $6,000 and the other at $10,000 ; the finishing of certain halls in the same building, $6,000 to $10,000; the completion of the equipment of the Observatory and the foundation of a small working fund for the use of its Director, $10,000, &c. The names of benefactors will be given to buildings erected, halls completed, or schools endowed by them.

All bequests should be made to *The President and Directors of Georgetown College, D. C.*

College Organizations.

THE SOCIETY OF ALUMNI OF GEORGETOWN UNIVERSITY.

OFFICERS.—*President,* HON. RICHARD H. CLARKE, New York; *First Vice-President,* JOHN T. DOYLE, Menlo Park, Cal.; *Second Vice-President,* GEORGE L. MAGRUDER, M. Executive Committee—REV. J. HAVENS RICHARDS, S. J., *ex officio;* WM. F. QUICKSALL, J. NOTA MCGILL, J. DUDLEY MORGAN, M. D., and F. O. ST. CLAIR, M. D., *ex-officio.*

Old students who may desire to keep up their connection with the College by becoming members of the Alumni Society will please communicate with the Secretary, E. D. F. Brady, Metzerott Building, 1110 F Street N. W., Washington, D. C.

THE SODALITY OF THE IMMACULATE CONCEPTION OF THE BLESSED VIRGIN MARY.

ORGANIZED 1810.

The Confraternity is composed of Catholic students of the Senior Division. Its object is the cultivation of a religious spirit among its members and the practice of devotion to the Blessed Virgin Mary.

OFFICERS—*Director,* REV. FRANCIS P. POWERS, S. J.; *Prefect,* EDWARD J. TOBIN; *First Assistant,* THOMAS J. FINNING; *Second Assistant,* JAMES H. DUGAN; *Secretary and Treasurer,* JOHN F. WESSEL; *Sacristan,* SAMUEL A. LUDLOW; *Assistant Sacristan,* PETER F. HAGAN. 92 members.

CONFERENCE OF ST. VINCENT DE PAUL.

A conference of this Society was organized among the students in the year 1889–'90, under the title of the Conference of St. Francis de Sales of Georgetown College; and on the 25th of January, 1892, it was formally aggregated to the Society as an Aspirant Conference. Its purpose is primarily not so much the actual relief of the poor in the neighborhood of the College as to train its members in the spirit and methods of this admirable organization. Yet the charitable work performed is by no means inconsiderable. During the past year the number of persons relieved was about 180, the amount of money expended being $193.74. Besides this, 160 suits of clothes, 275 pairs of beads and 142 scapulars were given out. A considerable number of newspapers were collected for the prisons and hospitals.

OFFICERS—REV. J. HAVENS RICHARDS, S. J., *Spiritual Director;* THOMAS J. FINNING, *President;* EDWARD J. TOBIN, *Vice-President;* (GEO. D. BAHEN, deceased, succeeded by) JOHN G. O'LEARY, *Secretary;* JAMES H. DUGAN, *Treasurer;* JOHN F. WESSEL, *Keeper of Wardrobe;* EDWARD J. BRADY, *Librarian.* 15 members.

LEAGUE OF THE SACRED HEART OF JESUS.

Devotion to the Sacred Heart has always existed among the students. On the 21st of June, 1888, the League was formally established in the College.

OFFICERS—REV. FRANCIS P. POWERS, S. J., *Director.* PROMOTERS—*Senior Division:* EDWARD J. TOBIN (Head Promoter), THOS. J. FINNING, ANDREW BERRY, ROBERT D. DOUGLAS, JAMES H. DUGAN, WILLIAM N. ROACH, JOHN F. WESSEL, SAMUEL A. LUDLOW, EDWARD J. BRADY, JAMES E. ALEXANDER; *Junior Division:* PAUL D. BURNE, THOMAS DELIHANT, LOUIS L. LAUVE, JAMES A. O'SHEA.

ST. JOHN BERCHMANS SANCTUARY SOCIETY.

This society, established in 1892, has for its object the fostering of zeal in the service of the altar and the training of its members in the exact performance of the various ceremonies of the Church. It also assumes charge of the decoration of the Chapel on Festival days.

OFFICERS—MR. JOHN J. THOMPKINS, S. J., *Director;* MARTIN MURPHY, *Master of Ceremonies;* JOHN F. WESSEL, *Thurifer;* EDWARD J. TOBIN and CHARLES E. ROACH, *Acolytes;* LOUIS L. LAUVE, *Sacristan.* 40 members.

THE COLLEGE JOURNAL.

ESTABLISHED 1872.

The COLLEGE JOURNAL is published towards the close of every month by a committee of the students. Its purpose is to aid their literary improvement, to chronicle the news of the College, etc. It also serves the Society of Alumni as an organ and means of intercommunication. Being principally devoted to matters of local interest, it must rely for its patronage chiefly upon the students and Alumni of the University, and their friends. These and all former students are urged to give it substantial support.

THE STAFF.—CHARLES E. ROACH, '95, *Editor-in-Chief;* EDWARD J. TOBIN, '95, H. AUG. GAYNOR, '95, J. NEAL POWER, '95, OUTERBRIDGE

HORSEY, JR., '96, JOHN F. O'BRIEN, '96, J. ASHTON DEVEREUX, '96, EDW. J. BRADY, '97, WALTER M. EGGINGTON, '97, FRANCIS X. DELANEY, '97, THOMAS J. DUFFY, '98, J. RAYMOND STAFFORD, '98, *Associate Editors;* ROBERT DICK DOUGLAS, '96, *Exchange Editor;* SAMUEL A. LUDLOW, '97, *Manager;* CHARLES F. CURLEY, '97, CHARLES B. BURKE, '98, *Assistant Managers.*

THE PHILODEMIC SOCIETY.

ORGANIZED SEPTEMBER 25th, 1830.

The Philodemic is essentially a Debating Society, having for its object the cultivation of eloquence and the promotion of knowledge. It is composed of members of the more advanced classes.

OFFICERS—REV. E. I. DEVITT, S. J., *President;* CHARLES E. ROACH, '95, *Vice-President;* JOHN J. O'LEARY, '95, *Secretary;* FRANCIS B. McDERMOTT, '96, *Amanuensis;* E. VINCENT SMITH, '95, *Treasurer;* ROBERT D. DOUGLAS, '96, 1*st Censor;* MARTIN MURPHY, '95, 2*d Censor.* 25 members.

THE PHILONOMOSIAN SOCIETY.

ORGANIZED JANUARY 8, 1839.

The object of this Society is the cultivation of eloquence and the promotion of historical knowledge.

The membership is open to students of classes above Third Grammar.

OFFICERS—FIRST TERM—REV. JAMES F. X. MULVANEY, S. J., *President;* THOMAS M. PIERCE, *Vice-President;* J. RAYMOND STAFFORD, *Secretary;* JOHN H. McALEER, *Amanuensis;* F. KOERNER SMITH, *Treasurer;* HUGH F. McGRANN, *First Censor;* ARTHUR P. KENEDY, *Second Censor.*

SECOND TERM—REV. JAMES F. X. MULVANEY, S. J., *President;* F. KOERNER SMITH, *Vice-President;* EDMUND J. GORMAN, *Secretary;* MORRIS W. HEAD, *Amanuensis;* JOHN C. BRENNAN, *Treasurer;* EDWARD A. McMANUS, *First Censor;* JOSEPH J. DEYOUNG, *Second Censor.*

THE STUDENTS' LIBRARY.

This contains about three thousand seven hundred volumes, selected with the view of furnishing the student with the means of reference as well as entertainment. The library is open to all students, subject to a small annual fee, which serves to defray the ordinary expenses. Connected with the Library is a reading-room, where the principal journals are received, together with many reviews and magazines.

OFFICERS—REV. JAMES F. X. MULVANEY, S. J., *Director;* JAMES H. DUGAN, *Librarian;* J. ASHTON DEVEREUX, ANDREW BERRY, JOSEPH MONAGHAN, EDWARD J. BRADY, THOMAS J. DUFFY, *Assistants.*

Reading-Room.

LOUIS T. NOONAN, *First Censor;* FRANCIS X. DELANEY, RICHARD J. HARLEY, THOMAS J. DUFFY, *Assistants.*

TONER SCIENTIFIC CIRCLE.

This association, which was named in honor of Dr. Joseph M. Toner, of Washington, was established for the purpose of encouraging among the students the study of Natural Science. Each member in turns writes a paper upon some scientific subject; these papers are read and discussed at the meetings of the society.

OFFICERS—MR. JOHN J. THOMPKINS, S. J., *Director;* MARTIN MURPHY, *President;* H. AUGUSTINE GAYNOR, *Secretary;* RALPH HOPKINS, *Treasurer.* 25 members.

THE GLEE CLUB ORGANIZATION.

This organization has for its object the advancement of musical talent among the students of the several departments of the University. It is composed of a Glee, Banjo and Mandolin Club, and numbers some fifty members.

OFFICERS—CONDÉ M. NAST, *Manager;* JULIUS S. WALSH, *Assistant Manager;* P. F. O'GORMAN, S. J., *Leader of Glee Club;* L. A. CALLAN, *Leader of Banjo Club.*

ATHLETIC EXERCISES.

Organizations for the practice of athletic sports are encouraged, but great care is taken that studies suffer no detriment from this cause. The Athletic Association, formerly confined to the College, has of late years extended its membership to the Schools of Medicine and Law, and has taken a great development.

There is a special holiday known as Field Day, which is devoted to competition in gymnastics, etc. Some years ago the College expended about $4,000 in fitting up the ground floor in the North Pavilion of the new building as recreation rooms. This suite is finished like the remainder of the building, in polished wood, and comprises a large central hall, a spacious apartment for the billiard tables, a dressing room for the Ball Clubs, a Reading room and the Students' Library. A new building which will afford adequate facilities for physical training is one of the great needs of the College.

For the Junior students, satisfactory provision has been made in their own building. Their new gymnasium occupies the entire basement of that structure. It is sheathed both on the walls and ceiling in hard wood, and is supplied with the most recent forms of Gymnastic apparatus. Elegant toilet rooms with needle baths have been added to the equipment of this department.

Athletic Association or "The Yard."

This Association comprises under one general direction all the organizations existing among the students for purposes of amusement and exercise, such as Baseball, Football, Lawn Tennis and Billiards. These Associations, which, previous to the year 1889, were independent, since that date have been regulated bp the Yard Committee, under the direction of the First Prefect.

OFFICERS—REV. WM. F. GANNON, S. J., *President;* MARTIN MURPHY, *Vice-President;* CHARLES E. ROACH, *Secretary;* HUGH A. GAYNOR, *Treasurer;* OUTERBRIEGE HORSEY, JR., *Manager of Football and Baseball*, resigned, succeeded by THOMAS C. NELSON; FRANCIS B. MCDERMOTT, *Manager of Field and Track Athletics;* JAMES P. DEERY, *Journalist*, resigned, succeeded by THOMAS J. DUFFY; JAMES H. DUGAN, *Manager of Billiards;* EDWARD J. BRADY, *Manager of Lawn Tennis.*

Announcement for 1895-6.

The complete course of study in the Medical Department extends over four terms, of seven months each. The next term will begin Tuesday, October 1, 1895, and end Saturday, April 18, 1896.

The demands of modern medical education are such that the Faculty has found it necessary to extend the hours of instruction so that more time may be given to practical work in laboratories and hospitals. The instruction will, therefore, begin in the morning and continue *throughout the day*. Arrangements will, however, be made so that those already matriculated may complete their courses according to the conditions existing at the time of their matriculation.

The building of this department, which has been extensively enlarged, is conveniently situated on H street northwest, between Ninth and Tenth streets, near several of the principal railway lines. It contains spacious and well ventilated lecture-rooms, chemical, histological, bacteriological and physiological laboratories, a convenient and well-lighted dissecting-room, a library and reading-room for the use of students. The laboratories are equipped with the latest and most approved instruments and appliances, including an ample number of microscopes of high power.

These will greatly enhance the facilities for instruction, and will enable every student to master more readily the technical skill needed in these important methods of modern medical research.

The laboratory courses may be taken independently of the lectures.

Requisites for Admission.

In accordance with the regulations of the Association of American Medical Colleges, a preliminary examination is required as a condition for admission. It will not be required of those who are graduates of a college, a high-school or an academy.

The examination will comprise the following subjects :

1. An English composition in the handwriting of the applicant of not less than two hundred words, said composition to include construction, punctuation and spelling.

2. Arithmetic—the fundamental rules, common and decimal fractions, ratio and proportion.

3. Algebra—through quadratics.

4. Elementary Physics (Gage.)

5. Latin—equal to one year's study. (Harkness' Latin Reader or its equivalent.)

Students conditioned in any of these branches will be allowed one year's time to meet the requirements.

Students who have attended one or more terms at any other medical college in good standing, will be admitted to advanced standing upon passing the examination required of students for the stage at which they propose to enter. Those presenting certificates of examination from other medical colleges in good standing will be admitted to the respective higher classes without further examination.

Persons not candidates for the degree M. D. may be admitted without examination as special students, and may attend any of the courses upon giving satisfactory evidence that they are qualified to intelligently avail themselves of the instruction.

The preliminary examinations will be held at the College Building on Monday, September 30, 1895, at 8 P. M.

Methods of Instruction.

The course of instruction will consist of didactic and clinical lectures, recitations, demonstrations, dissecting, laboratory work and other practical manipulation. The students will be divided into four classes, called, respectively, the First, Second, Third and Fourth.

Class recitations will be conducted by the members of the Faculty.

A record of these recitations will be kept; and the average will be credited to each student in summing up after the final examinations at the end of the session.

Programmes giving time and place of the lectures and other exercises will be distributed at the commencement of each term. The Faculty reserves the right to change these from time to time as circumstances may require.

The following is a sketch of the several courses of instruction:

ANATOMY.

PROF. FRANK BAKER, A. M., PH. D., M. D.,

The lectures of this course are so arranged that the student at any year receives such elementary instruction as is necessary, and yet there is not so much repetition as to weary those who have attended previous sessions, there being in each year a considerable amount of new matter upon the higher departments of the subject. Especial attention is paid to the practical bearings of the science and its application to surgery and pathology. The lectures will be fully illustrated by several hundred diagrams prepared especially for this course.

PRACTICAL ANATOMY.

DR. JOHN F. MORAN,
Demonstrator.

The new dissecting-room is spacious and well provided with the proper appliances for the assistance of students. Dissecting will commence October 15th and continue until the following March. The room will be open daily for students, and the Demonstrator or his Assistants will be present. During the session there will be given special demonstrations of the brain, of the thoracic and the abdominal viscera, and also of other difficult or obscure regions of the body. The Demonstrator and Assistants will have general supervision and direction over all students while in the dissecting room.

During each session every student of the First and Second Classes will be required to dissect all regions of the human body.

The Demonstrator will examine the students from time to time during the progress of their dissections, and if he finds that they have not properly displayed the structures, or have no accurate knowledge of the parts dissected, he will require a new dissection of the same region upon another subject. He will certify to the Professor of Anatomy the satisfactory completion of each dissection.

OSTEOLOGY.

DR. J. RYAN DEVEREUX, A. M.

This course includes a careful study of every bone in the human body, the pupil being required to point out and designate the important and technical features of each upon an actual specimen. For the study of the skeleton it is very much like what the study of the softer parts is in the dissecting room, and is an indispensable preliminary to that work.

HISTOLOGY.

DR. HUGH M. SMITH.

In this course students are taught the theory and practical use of the microscope, and the elements of microscopical technique. Each student is given portions of the principal organs of the human body which he is instructed to prepare, mount, examine and study under the microscope, making notes and drawings of each.

PHYSIOLOGY.

PROF. C. H. A. KLEINSCHMIDT, PH. D., M. D.

This course, which will extend over two sessions, comprises didactic lectures and laboratory work upon the functions of the various organs of the body in health, and upon physiological chemistry. These lectures are illustrated by vivisections, diagrams, plates, and models.

MATERIA MEDICA AND THERAPEUTICS.

PROF. WILLIAM H. HAWKES, A. M., M. D.,

One of the Consulting Physicians to Providence Hospital, and Chief of the Clinic of Diseases of Children at the Central Dispensary and Emergency Hospital.

Instruction in this Department will extend over the first three years of the medical course.

Students of the second and the third year will be instructed in the physiological action and therapeutical use of drugs, and in prescription-writing. The instruction will be given by lectures, recitations, and occasional written examinations.

MATERIA MEDICA.

DR. GEORGE J. LOCHBOEHLER.

Under this course students of the first year will be taught the appearance and physical properties of the crude drugs and the preparations derived therefrom, illustrated by actual specimens. The elements of pharmacology will also be taught, including the compounding of medicinal substances and preparations, incompatabilities, weights and measures, doses, etc. Instruction will be both didactic and practical.

CHEMISTRY AND TOXICOLOGY.

PROF. JOHN J. STAFFORD, A. M., M. D.

This course extends throughout four scholastic years, instruction being given both by lectures and by work in the laboratory. The aim is to present the subject of general chemistry in such a manner that the student will have no difficulty in grasping the principles of the science. The lectures are thoroughly illustrated by numerous experiments and a very complete collection of chemicals. The laboratory is commodious, well lighted and ventilated, and fully equipped with all the modern appliances for chemical investigation. Each student upon entering is assigned a separate table, furnished a full set of reagents, and given access to the various instruments required in the work. The theoretical studies and practical work go hand in hand, the students work being directed by well trained instructors.

The first-year students attend lectures in elementary chemistry during the entire session. They also work in the laboratory six hours per week during a part of the session, where each student is required to prepare the elementary gases and perform experiments illustrating their properties. They construct apparatus, familiarize themselves with chemical manipulation, and thus prepare themselves for the advanced work taken up in the second year.

The second-year students spend six hours per week in the laboratory during the session. They are given a thorough course in qualitative analysis with a special reference to the examination of medicinal and commercial chemicals, food stuffs, etc. A portion of this time is directed to volumetric analysis.

The third-year students attend lectures on urinalysis and clinical diagnosis, and work in the laboratory six hours per week during a part of the session. Each student is required to familiarize himself with the proper methods of examining urine and other excreta with special reference to the diagnosis of diseases.

The fourth-year students attend lectures on toxicology and, in conjunction with same, work in the laboratory, where they investigate the toxic effect of substances, and the detection and estimation of poisons in animal tissues.

THEORY AND PRACTICE OF MEDICINE.

PROF. J. W. H. LOVEJOY, A. M., M. D.,

Consulting Physician to Garfield Memorial and Children's Hospitals.

The course in this branch will be occupied by didactic lectures and reviews.

An effort will be made to give in the course of two sessions as complete a description as possible of the diseases usually considered as belonging to the province of this chair, and in such manner as to give the student a clear conception of the methods of discrimination and management of the various diseased conditions. This teaching, together with the supplementary advantages offered by the various clinics to which the student will have access, will, it is hoped, afford him an opportunity of acquiring a thorough knowledge of this subject.

SURGERY.

PROF. JAMES KERR, M. D., M. CH.,

Surgeon to Central Dispensary and Emergency Hospital, to Woman's Hospital and Dispensary, and to Providence Hospital.

The course consist of lectures, clinics, and operations on the cadaver in the lecture-room and demonstrations at the hospital. Special attention will be given to practical methods of teaching surgery in all its branches, in the clinics, at the bedside, and in the operating-room. Surgical clinics are held daily at the Central Dispensary. This work embraces every variety of surgical material, which is fully taken advantage of for purposes of instruction. The work is divided into departments, under the Professor of Surgery and his assistants. The course on operative surgery is conducted by the Professor of Surgery. The students are required to do bandaging, and are instructed in the technique of surgical work.

OBSTETRICS.

PROF. HENRY D. FRY, M. D.,

Obstetrician, Garfield Memorial Hospital.

Obstetrics will be taught didactically, and, as far as practicable, instruction will be given at the bedside. The entire course will be graded, and will consist of classified lectures, comprising the whole subject, of recitation and demonstrations upon charts and plates, and of operations performed upon the manikin. During the past session each member of the Senior Class, under the supervision of the Demonstrator of Obstetrics, attended one or more cases of midwifery. They were required to keep records and present written reports of the cases. In future, every facility will be given to obtain experience in the practical workings of this department, by means of bedside instruction.

The importance of exercising strict supervision over the period of pregnancy will be dwelt upon, and attention given to the pathological changes which may occur during gestation, labor, and the puerperal state.

The great value of antiseptic principles as applied to obstetric practice will also be urged.

An operative course on the Budin-Pinard manikin will be conducted by Dr. W. Sinclair Bowen, Demonstrator of Obstetrics. Instruction will be given in abdomiual palpatation, in digital examination, and the methods of diagnosticating presentations and positions of the fetus. A fresh fetus is employed in order to accustom the student to feel and recognize the different sutures and fontenelles.

An opportunity is given to each for the performance of various obstetric operations, such as the application of the forceps, version, etc.

GYNECOLOGY.

PROF. JOSEPH TABER JOHNSON, A. M., PH. D., M. D.,

One of the Consulting Physicians to the Central Dispensary and Emergency Hospital, Consulting Physician to the Woman's Dispensary, Surgeon in charge of his own Hospital for Women.

Modern gynecology will be thoroughly taught in didactic lectures, freely illustrated by plates and blackboard drawings during the course; also in small classes of two or three at a time at private operations, where manipulations and operative work will be carefully explained.

Advanced students will be given an opportunity to witness the preparations for aseptic operations, and actually assist in their performance when practicable.

Abdominal surgery will receive especial attention each year, and it is intended that all of the graduating class, at least, and as many of the other students as possible, shall see abdominal operations not only in the private practice of the Professor of Gynecology, but by Clinical Professor Stone in his service at Columbia Hospital.

OPHTHALMOLOGY AND OTOLOGY.

PROF. SWAN M. BURNETT, M. D., PH. D.,

Ophthalmologist and Otologist to Providence and Children's Hospitals, and to the Central Dispensary and Emergency Hospital.

These important branches are taught as a part of the regular curriculum.

The course begins with lectures on the anatomy of the eye and ear illustrated by models, charts, and specimens under the microscope, followed by an explanation of the fundamental principles of physiological optics and acoustics. The lectures on the diseases of the eye and ear are wholly clinical, illustrative cases being taken from Dr. Burnett's large service at the Central Dispensary and Emergency Hospital, and at Children's and Providence Hospital. More than twelve hundred new cases of eye and ear diseases are treated annually at the Central Dispensary alone, and all operations are performed in the presence of the class.

Dr. C. R. Dufour, Demonstrator of Ophthalmology and Otology, gives clinical demonstrations twice a week at the Eastern Dispensary.

GENERAL PATHOLOGY.

PROF. I. W. BLACKBURN, M. D.,

Pathologist to the Government Hospital for the Insane.

The course on Pathology will extend over two sessions, and will consist of lectures, demonstrations, laboratory work, and recitations.

The lectures on the first part of each session will be on general pathological processes; those of the second part will be devoted to morbid condition of individual organs, tissues, and fluids.

The demonstrations and laboratory work will be arranged with special reference to the lectures, to afford an opportunity for practical study of the subjects taught.

MENTAL DISEASES.

PROF. A. H. WITMER, M. D.,

Senior Assistant Physician, Government Hospital for the Insane.

The lectures of this course will treat of the various diseases and defects of the mind and the legal relations of the insane. They will be supplemented by clinical instruction.

Owing to recent advances in psychiatry, a more thorough knowledge of this important branch of medical science is required on the part of the student of medicine, and the subject is now receiving the prominent attention it so justly deserves in the curricula of the leading schools. The importance of the topic is not confined to the specialist alone, for the general practitioner should have an adequate knowledge of the symptomatology, pathology and therapeutics of this special class of cases; and the necessity of a knowledge of this subject in its forensic bearings is too self-evident to be advocated.

SPECIAL PATHOLOGY AND BACTERIOLOGY.

PROF. J. J. KINYOUN, M. D., U. S. M.-H. S.

The course of instruction will consist of lectures, demonstrations and class recitations on the following subjects:

Infectious diseases and processes, their etiology, pathology and prophylaxis.

Bacteriology, Epidemiology and Quarantine.

In addition to these a laboratory course in Bacteriology will be given which will continue over one-half of the session. This will consist of bacteriological technique, the study and diagnosis of diseases which are caused by micro-organisms.

The student will also be given opportunities to observe and investigate special problems in clinical diagnosis, disinfection, etc.

The laboratory course is obligatory.

HYGIENE AND MILITARY SURGERY.

PROF. GEORGE M. KOBER, M. D.

The course on Hygiene will extend over two years and will include Lectures and Recitations on sunlight, air, climate, and meteorology; water, ice, artificial carbonated waters, and soils in relation to health and disease; alimentation, food, beverages and condiments, morbific and infected food products; the skin, baths and clothing; exercise, rest, sleep, beds and bedding; public hygiene, building-sites, streets and pavements, parks, disposal of the dead, collection and disposal of refuse and sewerage; private and public habitations, including drainage, ventilation, warming and lighting with practical demonstrations of sanitary appliances at the Museum of Hygiene.

The course on Military Surgery will consist of Lectures and Recitations on the duties of Medical Officers in time of peace, with special reference to the examination of recruits, discharges for disability and military sanitation; the hygiene of troops upon the march, in camps and barracks, and the training of the hospital corps for war, followed by a consideration of fire-arms, explosive compounds and projectiles, with general statistics of gun-shot, sabre and bayonet wounds, and ratios of mortality from wounds and diseases; the effects of modern fire-arms in battle and probable amount of surgical work in a given number of wounded; first aid and transport of the wounded, dressing stations, field-base and general hospitals; army diseases, their causes and prevention.

PHYSICAL DIAGNOSIS, LARYNGOLOGY AND RHINOLOGY.

PROF. T. MORRIS MURRAY, M. D.

Director of the Throat and Chest Clinic at the Central Dispensary and Emergency Hospital.

In addition to the didactic lectures on the principles of Physical Diagnosis and Laryngology at the college there will be demonstrations in these branches to the students at Dr. Murray's very large clinic for diseases of the throat and chest at the Central Dispensary and Emergency Hospital. This latter will be entirely practical. The class will be divided into sections, each member of which will make examinations under the personal supervision of Dr. Murray; thus they will be made familiar with one of the most important branches of medical practice.

MEDICAL ZOOLOGY.

CH. WARDELL STILES, A. M., PH. D.,

Medical Zoologist, Bureau of Animal Industry, United States Department of Agriculture, Honorary Curator of the Helminthological collection, United States National Museum.

In the zoological department two courses are given, one in human embryology and one on the animal parasites of man.

Embryology. This course will consist of about twenty lectures, covering the subject up to organology. It is required of the second class, and will be illustrated by numerous charts prepared especially for these lectures.

Animal parasites. This course comprises a series of lectures on the animal parasites found in the human subject. The lecturer will describe the anatomy, life-history of the different forms, and the best means of treatment and prevention. The lectures will be illustrated by a series of wall maps by Leuckart, by crayon sketches, by numerous original charts prepared especially for the course, and by exhibition of specimens. The lectures will be supplemented by practical laboratory exercises in microscopical examinations of meat, for *Trichinella spiralis*, and of fæces, for determining the presence of parasites.

The course is obligatory for fourth year men. An opportunity to carry on original investigation in Medical Zoology, under the direct supervision of Dr. Stiles, will be offered to graduates or to advanced students who may desire to pay special attention to this branch.

MEDICAL JURISPRUDENCE.

W. C. WOODWARD, M. D.,

Health Officer (formerly Coroner) of the District of Columbia.

From this chair will be treated a variety of subjects important to the general practitioner, such as the signs and causes of death, the means of identification of bodies, the proper method of giving evidence and of conducting post-mortem examinations, etc. The course is obligatory for students intending to graduate.

DISEASES OF INFANCY AND CHILDHOOD.

PROF. SAMUEL S. ADAMS, A. M., M. D.,

Consulting Physician at the Woman's Hospital and Dispensary; and the Sibley Memorial Hospital; one of the Attending Physicians of the Children's Hospital, the Garfield Memorial Hospital, the Washington Home for Incurables and the Washington Hospital for Foundlings.

The instruction in this department will be didactic and clinical. The didactic course will be given at the College and will consist of lectures upon the peculiarities of infancy and childhood, the art of history-taking, and the aetiology, pathology, symptomatology, diagnosis, prognosis and treatment of diseases peculiar to children, as well as the relation of general diseases to this age.

Practical teaching will be at the Children's and Foundling's Hospitals.

Clinical Advantages.

PROVIDENCE HOSPITAL,

Capitol Hill, corner Second and D Streets S. E.

This large general hospital, situated in an easily accessible part of the city, is supported in part by the general government.

It contains over three hundred beds. The medical and surgical wards are usually well filled with interesting cases. In the new surgical amphitheater, one of the finest in the country, every provision has been made to fully carry out aseptic surgery. Accommodations have been provided for over 150 students. Clinics will be given in this hospital by the following professors of this school, and by other members of the hospital staff:

Surgical—Doctors Kerr, Bayne and Crook.

Clinical Medicine—Doctors Callan, Cuthbert and Vincent.

Diseases of the Eye and Ear—Doctor Burnett.

Doctors Magruder and Hawkes are on the Consulting Staff.

An annual fee of $5, covering all the clinics for the year, is charged by the hospital authorities.

CHILDREN'S HOSPITAL,

W Street, between Twelfth and Thirteenth Streets, N. W.

Students may here observe the diseases, injuries, and deformities incident to infancy and childhood, together with the treatment appropriate therefor. Every facility will be given to thoroughly observe and comprehend the cases admitted to its wards.

The out-patient department or dispensary is open every week day from 2.30 to 4.30 P. M. It is divided into medical and surgical services, and a service for diseases of the eye and ear. All these are free of access for medical students.

Dr. Adams will give Clinical Instruction at this Hospital.

Doctors Lovejoy and Burnett are on the staff of this hospital.

CENTRAL DISPENSARY AND EMERGENCY HOSPITAL,

Fifteenth Street and Ohio Avenue, N. W.

During the last year over 15,000 patients were treated here, and over 500 surgical operations performed, many of capital importance. Unusual opportunities are afforded for acquiring practical experience in the ordinary duties of a physician. As a large proportion of the serious cases of accident, that occur in the city, are first brought to this hospital because of its central location, students become rapidly trained in the effective treatment of injuries demanding prompt assistance, and of that class of cases likely to be of the most importance to the young practitioner. Students are admitted to the services. The new building just completed offers greatly improved facilities for clinical instruction; and the ambulance service and casualty wards will afford special advantages for studying traumatic and operative surgery.

There are competitive examinations for Resident Physician and two Assistant Resident Physicians.

In this institution Doctor W. H. Hawkes will give clinical lectures upon the diseases of children, Doctor S. M. Burnett upon diseases of the eye and ear, Doctor James Kerr upon Surgery, and Doctor Murray upon Physical Diagnosis, Laryngology and Diseases of the Throat and Lungs. Clinical lectures are also given by other members of the staff. Doctors Johnson and Magruder are upon the Consulting Board.

The instruction in clinical surgery at the Central Dispensary and Emergency Hospital comprises demonstrations on the cases in the surgical service. An average of over fifty were treated at each service during the year. These cases during the course of a session include a comprehensive study of all the ordinary diseases and injuries met with in practice. A selection of the most important ones is made for a special clinic each Sunday, where the senior students are required to assist the Professor and do the minor operations themselves under his direction.

A bacteriological and pathological laboratory has been founded by Doctor Burnett, and is now in operation under Doctor Gray, where the clinical work of the hospital will be demonstrated.

A systematic course, demonstrated from the Skin and Venereal Department of the Clinic, will be given by Doctor Watkins, the Demonstrator of those branches.

Personal supervision of the training of the student is aimed at to qualify each with a working knowledge of this branch of practice.

Dr. Kerr appoints from the Graduating Class four graduates of the college as his assistants, to hold office for one year.

Clinical Instruction.

Attention to clinical instruction is obligatory upon students of the third and fourth years. The following clinics will be held by members of the Faculty:

Doctor Johnson will invite senior students to witness gynæcological operations.

Doctor Hawkes, diseases of children, at the Central Dispensary, Monday and Thursday, 1 to 2 P. M.

Doctor Kerr, general and operative surgery, daily, at the Central Dispensary and Emergency Hospital. He will also give clinics at Providence Hospital, July, August and September.

Doctor Burnett, eye and ear, Central Dispensary, Tuesdays and Fridays, 1 to 2 P. M., and at Children's and Providence Hospitals.

Doctor Murray, throat and chest, Central Dispensary, Wednesdays and Saturdays, 1 to 2 P. M.

Doctor Bayne, surgical, Providence Hospital, October, November and December.

Doctor Crook, surgical, Providence Hospital, April, May and June.

Doctor Callan, medical, Providence Hospital, July, August and September.

Doctor Witmer, insanity, at Government Hospital for the Insane.

Doctor Cuthbert, medical, October, November and December, Providence Hospital.

Doctor Stone will invite in turn senior students to be present at his service at Columbia Hospital. The most important operations in abdominal surgery are frequently performed here.

Doctor Snyder, surgical, Garfield Memorial Hospital.

Doctor Adams, infancy and childhood, Children's and Foundling Hospitals.

Doctor Watkins will avail himself of the valuable material at the Central Dispensary to give instruction upon diseases of the skin and genito-urinary organs.

Doctor Dufour, eye and ear, Eastern Dispensary, Mondays and Thursdays, 1 to 2 P. M.

Special Instruction.

Dr. Burnett has a postgraduate course of instruction in ophthalmology, beginning the 15th of October and extending to the first of March. A fee will be charged for this course, payable to him.

Dr. Kerr gives special clinics on general and operative surgery throughout the session, for which a fee will be charged, payable to him.

Other Advantages.

The great libraries and museums connected with the various government institutions at Washington afford advantages to the student that are unrivalled in America and are equal to those found in most European capitals. These collections are for the most part freely open to the public, or can be consulted by students upon obtaining permission, readily granted to those that are pursuing special courses of study. In most cases the collections are made available for education and research by act of Congress. The following may be mentioned:

LIBRARIES.

The Library of Congress	700,000	vols.
The Library of the Surgeon-General's Office	110,000	"
The Library of the United States National Museum	16,000	"
The Library of the Museum of Hygiene	10,500	"
The Library of the Bureau of Ethnology	5,000	"
The Library of the Bureau of Education	30,000	"
The Library of the Department of Agriculture	25,000	"

MUSEUMS, &c.

The Army Medical Museum.
The United States National Museum.
The Museum of Hygiene.
The Museum of the Agricultural Department.
The Botanical Garden.
The United States National Zoological Park.

Examinations.

At the end of each session examinations will be held as follows:

The *First Class* upon anatomy, physiology, chemistry, materia medica, and histology.

The *Second Class* upon anatomy, physiology, chemistry, therapeutics, pathology, minor surgery, and embryology.

The *Third Class* upon therapeutics, the practice of medicine, surgery, obstetrics, gynecology, diseases of infancy and childhood, urinalysis, pathology, hygiene, special pathology and bacteriology.

The *Fourth Class* upon the practice of medicine, surgery, obstetrics, gynecology, diseases of infancy and childhood, laryngology and physical diagnosis, ophthalmology and otology, animal parasites, toxicology, hygiene, and medical jurisprudence.

A second examination for those who have been found deficient in the work of the previous year will be held immediately before the opening of the following session.

The standing of a student in any branch will be determined by combining the record of his recitations, his examinations (both written and oral), and his laboratory and clinical work.

Students of the first year will not be permitted to advance to the second unless their standing shall be satisfactory in three out of the five subjects of that year. They must make good their deficiencies in all the branches of the first year before being admitted to the examinations held at the end of the second year.

Students of the second year will not be permitted to advance to the third unless their standing shall be satisfactory in the branches of the first year and in the branches of anatomy, chemistry, and physiology of the second year. Deficiencies in therapeutics, embryology, pathology, and minor surgery must be made up before the student will be admitted to the examinations held at the end of the third year.

Students of the third year will not be permitted to advance to the fourth unless their standing shall be satisfactory in the branches of the second year and in the branches of therapeutics, urinalysis, general and special pathology, and bacteriology of the third year. Deficiencies in practice, surgery, obstetrics, gynecology, diseases of infancy and childhood, and hygiene must be made up before the student will be admitted to the examinations held at the end of the fourth year.

Students of the fourth year will not be permitted to graduate unless their standing is satisfactory in the branches of the previous years and in practice, surgery, obstetrics, gynecology, ophthalmology and otology, physical diagnosis and diseases of infancy and childhood of the fourth year. Failure in the supplementary branches taught during this year may also be considered a sufficient cause for the rejection of a student at the discretion of the faculty.

REQUIREMENTS FOR GRADUATION.

The candidate must be of good moral character and at least twenty-one years of age. He must have studied medicine not less than four years, during which he must have attended four full courses of instruction, delivered in some recognized medical school, the last of which shall have been delivered in this institution. He must have attended at least two courses of practical anatomy, laboratory courses in physiology, chemistry, histology, pathology, and bacteriology, and the clinical courses of instruction.

FEES.

Matriculation (payable but once)	$5 00
Tuition, each year	100 00
Charge for breakage, use of instruments and material in the several laboratories, each year	5 00
Anatomical material, each part*	1 00

Fees for Special Students, 1895-96.

Didactic lectures from each of the seven chairs of (1) Anatomy, (2) Materia Medica and Therapeutics, (3) Obstetrics and Gynæcology, (4) Physics and Chemistry, (5) Physiology, (6) Practice of Medicine, (7) Surgery	$20 00
Dissection	10 00
Anatomical material, per part*	1 00
Practical chemistry, including chemicals and breakage, per course	25 00
Didactic and laboratory course in normal histology, pathology and pathological histology or bacteriology, including materials, each	25 00
Operative surgery on the cadaver, including material, per course	20 00

No extra charge for Demonstrators' fees.

No graduation fee is required.

Payment of not less than one-fourth of the fees is required at the commencement of the session, the balance by January 1st, ensuing.

Good board, at reasonable rates, can be obtained in the immediate vicinity of the College.

GEORGETOWN UNIVERSITY,

School of Law.

1895–1896.

The next term of this institution opens Wednesday evening, October 2 1895, at 6.30 o'clock, in the Georgetown University Law Building, 506 and 508 E Street N. W., in the city of Washington. All persons interested are invited to attend the introductory lecture, which will then be delivered. The collegiate year closes on the first of June.

Advantages.

Of the great advantages offered by a Law School over the unassisted reading of a student in a law office there can be no question. Here, however, the experiment has been successfully made of uniting the advantages of the two. The lectures are held in the evening, and, so far as practicable, students who put themselves into timely communication with the Secretary are connected with the offices of the ablest lawyers of the city, where they are allowed to familiarize themselves with the conduct of business and the practical duties of the profession.

The holding of the lectures and other exercises in the evening also enables clerks in the various departments of the Government, and other persons who are engaged during the day, to avail themselves of the privileges of the School.

The site of the institution, at the Capital of the Nation, presents advantages for the study of American jurisprudence which are unequaled elsewhere, and must always remain so.

The Law Library at the United States Capitol contains over 50,000 volumes, embracing all the noted treatises, reports and periodicals, ancient and modern, American, English and of the nations of Continental Europe. By the operation of the copyright law and the outlay of an annual appropriation it is constantly enriched with new acquisitions, and is believed to be kept in a state of completeness unrivalled among the law libraries of the world. This magnificent collection is freely open to students for seven hours daily.

Congress, the Court of Claims and the Supreme Court of the United States are in session during several months of each school year, and, with the Executive Departments, especially the Patent, Pension and General Land Offices, furnish advantages for professional study nowhere else enjoyed.

The Supreme Court of the District of Columbia has the common law, equity, criminal and probate jurisdiction of a State Court in the States, besides that of the Circuit and District Courts of the United States. Its sessions afford the students opportunities for hearing the forensic arguments and forming the acquaintance of the leaders of the American Bar from all parts of the Union, besides thoroughly familiarizing himself with the practice of these various courts.

There is, in the District of Columbia, no "Code" of either substantive law or procedure, and no very extensive statutory provisions. This obviates the tendency observable at so many law schools toward consuming the time and loading the memory of the student with merely local enactments, which will be of worse than no service to him when he returns to his home or removes to another locality after graduation. The jurisprudence of the District remains almost intact that of Maryland on the day of original cession, February 27, 1801, and is, therefore, as close an approximation to the simplicity of the Common Law, so constantly referred to in the text-books, as can be found in the Union.

Cost of Boarding, Etc.

There is no boarding department connected with the Law School. The majority of the law students board in Washington City, where the Law School is located, and where the cost of comfortable lodgings, board, fuel and gas varies from $20 to $30 per month, according to the location and appointments selected. Satisfactory accommodation can easily be had at $25 per month ; and there are every year students who provide for themselves comfortably at a cost of $20 per month, and even less. Tuition is $80 per annum, with no incidental charges except a diploma fee of $10 upon graduation. Cost of text-books is about $30 per annum. The Law School session is from the first Wednesday in October to the first Wednesday in June—about eight months. The necessary expense for board, lodging, tuition, books, etc., per annum, is, therefore, about $300, exclusive, of course, of clothing and general incidental expenses.

Admission.

Students desiring to become members of the School enter their names upon the Secretary's register, at or before the opening of the term in October.

Candidates for advanced standing—*i. e.*, those desiring to complete the course in one year—must, at the time of entry, present certificates of at least one year's previous study at some approved Law School, or under the direction of a reputable practitioner.

Those desiring to enter the Postgraduate Course should exhibit their diplomas, or certificates of equivalent study.

Course of Study.

The regular curriculum covers a period of two years, divided into a Junior and Senior Course.

The Post-Graduate Course covers an additional period of one year.

Students in the Senior Course are required to attend the Lectures, and to be examined upon Part 2 of the studies, of the Junior Course, as indicated below; and students in the Postgraduate Course are, in like manner, required to attend the Lectures, and be examined upon the studies, of Part 2 of the Senior Course.

Regular and punctual attendance on the part of the student is required, as also preparation for thorough recitations in class daily, *and delinquency in either particular will be deemed a sufficient cause for refusing to grant a degree.*

Candidates for a degree must have been in regular attendance for at least one year, and must pass a satisfactory examination on the entire year's course of study.

The following is the course of study pursued in the Law School:

JUNIOR COURSE:—Part 1. *Personal Property, Torts, Domestic Relations and Criminal Law.*

Part 2. *Real Estate, Contracts, and Bills and Notes.*

SENIOR COURSE:—Part 1. *Subjects of Part 2 of the Junior Course.*

Part 2. *Pleading, Practice, Evidence, Equity, Moot Court.*

POST-GRADUATE COURSE:—Part 1. *Subjects of Part 2 of the Senior Course.*

Part 2. *Corporations, Common Law Practice, Equity Pleading and Practice, Testamentary Law, Constitutional and International Law, Comparative Jurisprudence, Civil Law, Conveyancing, Office Practice, etc.*

SPECIAL LECTURES:—*Admiralty Jurisprudence, Statutory Law and Natural Law.*

Text-Books.

JUNIOR COURSE:—*Blackstone's Commentaries; Darlington on Personal Property; Bishop on Contracts; Byles on Bills; Pollock on Torts; Browne's Domestic Relations.*

SENIOR COURSE:—*Stephen on Pleading; Greenleaf on Evidence, Vol. 1.**

POSTGRADUATE COURSE:—*Cooley's Principles of Constitutional Law; Story on Partnership; Taylor on Corporations; Barton's Suit in Equity; Ames' Cases in Pleading; Hadley's Roman Law.*

BOOKS OF REFERENCE:—*Williams on Real Property; Sedgwick's Statutory and Constitutional Law; Paschal's Annotated Constitution.*

Lectures.

JUNIOR COURSE:—*Monday, Tuesday, Wednesday, Thursday* (except during First Term), *Friday* and *Saturday* evenings, at 6.30 o'clock.

SENIOR COURSE:—Part 1. *Monday, Wednesday* and *Friday* evenings, at 6.30 o'clock.

---

*The textbook on Equity will be announced at the opening session in October.

Part 2. *Tuesday*, *Thursday* and *Saturday* evenings, at 6.30 o'clock.

POSTGRADUATE COURSE:—Part 1. *Tuesday*, *Thursday* and *Saturday* evenings, at 6.30 o'clock.

Part 2. *Monday*, *Wednesday* and *Friday* evenings, at 6.30 o'clock.

SPECIAL LECTURES:

FIRST TERM:—*Monday* evenings, at 7.30 o'clock.

SECOND TERM:—*Wednesday* evenings, at 6.30 o'clock.

Tabular View of Exercises.

For the arrangement of studies the school-year is divided into three terms: the first term ends December 23, 1895; the second, March 14, 1896, and the third, May 23, 1896

The following tabular statement will show the assignment during each of these terms:

First Term, Ending December 23, 1895.

PERSONAL PROPERTY	Tuesdays and Saturdays.
REAL ESTATE	Mondays, Wednesdays and Fridays.
PLEADING	Tuesdays, Thursdays and Saturdays.
COMMON LAW PRACTICE	Mondays and Fridays.
MOOT COURT	Thursdays.
CIVIL LAW	Wednesdays.
ADMIRALTY	Mondays.

Second Term, Ending March 14, 1896.

CRIMINAL LAW	Tuesdays, Thursdays and Saturdays.
DOMESTIC RELATIONS	
CONTRACTS	Mondays, Wednesdays and Fridays.
EQUITY	Tuesdays and Saturdays.
COMMON LAW PRACTICE	Mondays and Fridays.
PRACTICE (Senior Class)	Thursdays
NATURAL LAW	Wednesdays.
MOOT COURT	Thursdays.

Third Term, Ending May 23, 1896.

TORTS	Tuesdays and Saturdays.
NOTES AND BILLS	Mondays, Wednesdays and Fridays.
EVIDENCE	Tuesdays and Saturdays.
CORPORATIONS	Mondays and Fridays.
EQUITY PLEADING AND PRACTICE	Thursdays.
CONSTITUTIONAL LAW	Wednesdays.
MOOT COURT	Thursdays.

Examinations.

No examination is required on entering the School, or at the beginning of the Course.

Each text-book in the course of study is made the subject of a carefully written examination, upon, or shortly after, its completion. Students passing satisfactorily upon the subjects of these examinations will not be required to stand a second examination upon them during the year; while those who fall below the standard required *may, at the discretion of the Faculty if they have been regular in their attendance upon lectures and quizzes,* have an opportunity of making up the deficiency before its close. This system has been found to promote more careful study, and, at the same time, to admit of more thorough examination, with less tax upon the student's endurance, than a general examination at the close of the Course.

Postgraduate Course.

As will be seen by reference to the curriculum, the course of study for the Junior and Senior Classes embraces quite as much as can be acquired with thoroughness in two years, and a diploma, conferring the degree of Bachelor of Laws, is granted to students successfully completing this course. In the District of Columbia, however, and in many of the States, three years' study is an indispensable prerequisite to admission to the Bar; and it was to meet this exaction or demand for a higher standard of legal acquirements that the Postgraduate Course was added. It has been a source of no slight gratification to the Faculty, and a most favorable omen for the Bar of the future, to observe that many gentlemen who propose to practice in jurisdictions where the requirements are less rigorous, and some, indeed, who have been previously admitted to the Bar, have, nevertheless, diligently pursued the Postgraduate Course of Study, taking the degree of Master of Laws.

The degree of Master of Laws is conferred upon those who successfully complete the Postgraduate Course of Study, and the holder thereof is entitled to participate in the studies and exercises of the School thereafter, without additional charge.

The Moot Court.

Especial, painstaking effort has been devoted, with gratifying results, to perfecting such an organization of the Moot Court as would render that adjunct of the School not merely a forum for the argument of mooted questions of law, but a useful and efficient training-school for the practical duties of the profession.

As now organized, the Court is divided into a Circuit Court and a Court of Appeals.

The Circuit Court holds two sessions weekly, known as the Special and the Regular Term. At the Special Term motions, demurrers, pleas in equity and all proceedings of an interlocutory or preliminary nature which, in actual practice, ordinarily precede the final hearing upon the merits of the case, are heard and disposed of, while at the Regular Term such proceedings are had as usually characterize the final hearing of causes in courts of the first instance. The practice conforms to that of the Supreme Court of the District of Columbia, with pleadings as at common law.

The Court of Appeals, to which causes may be removed from the Circuit Court by writ of error or appeal conformably to the practice of the United States Supreme Court, is held by Messrs. Tallmadge A. Lambert, Job Barnard and Henry Wise Garnett, and sits monthly, or oftener, as the work before it may require.

While the students in the Postgraduate course are expected to take the leading part in the exercises of the Moot Court, it will continue to be the endeavor of the Faculty to make the Court, as in the past, a training-school for all the students, as their progress warrants, in pleading, practice and forensic debate.

Library and Reading Rooms.

A carefully selected Library, comprising the latest editions of the standard text-books, and the leading reports, has been provided for the accommodation and convenience of students, in a well-lighted and suitably appointed suite of rooms in the Law Building set apart exclusively for the purpose. These rooms are open to students and alumni of the School at all hours of the day and evening.

Prizes.

The following prizes are offered for the competition of the students in the several classes:

1st. A cash prize of $50 to the member of the Junior Class maintaining the best average in recitations and examinations during the year.

2d. A cash prize of $25 to the member of the Junior Class maintaining the second best average in recitations and examinations during the year.

3d. A cash prize of $100 to the member of the Senior Class maintaining the best average in recitations and examinations during the year.

4th. A cash prize of $50 to the member of the Senior Class maintaining the second best average in recitations and examinations during the year.

5th. A cash prize of $50 to the member of the Postgraduate Class maintaining the best average in recitations and examinations during the year.

6th. A cash prize of $25 to the member of the Postgraduate Class maintaining the second best average in recitations and examinations during the year.

7th. A cash prize of $40 to the author of the best essay upon any legal subject, among the members of the Senior Class.

8th. A cash prize of $40 to the author of the best essay upon any legal subject, among the members of the Postgraduate Class.

Lecture Students.

Those who wish to avail themselves of the lectures delivered at this School without being subject to recitations or being candidates for a degree, may do so upon payment of one-half of the regular charge for tuition.

Less than two years' attendance as a lecture student will not entitle one to admission to the Senior Class of the year following.

System of Instruction.

The system of instruction adopted by the Georgetown Law School is the following: A lesson, averaging from thirty to forty pages of the text-book, is assigned in advance, which the student is expected to master as thoroughly as he can before the recitation hour. The lecturer then goes over the ground covered by the text, explaining what is obscure or difficult, pointing out the application in practice of the principles treated of, and illustrating, by examples, their application in actual cases. Then follows the "Quiz," in which the lesson is gone entirely over again in shape of questions, requiring the students to reproduce in their own language all that it contains, with practical applications of the doctrines learned to supposed cases put by the lecturer. The student thus has three opportunities of becoming familiar, theoretically and practically, with each topic treated of in the course: *once* by careful study of the text, *a second time* by the discussion of it in the lecture, *and once again* by himself reproducing and practically applying the principles thus taught, in his answers to the "Quiz." This system has been found, after careful and painstaking tests, most satisfactory to both teacher and student, and productive of the highest standard of proficiency in study. It is believed to be absolutely the best.

Terms.

The charge for attendance is *Eighty Dollars* per annum. As far as payment of tuition is concerned, the collegiate year is divided into two equal terms, beginning on the first Wednesday in October and February, respectively, and one-half the annual charge becomes due and payable on the following day, Thursday. For the accommodation of students, the Secretary will, when requested, receive monthly payments of $10 each, *strictly in advance.*

Persons enrolling their names as students will be considered as having entered the school for not less than one term, unless an express agreement to the contrary is made. Payment will not be received for less than one full month, nor can any deduction be made for absence.

For the *Postgraduate Course* the charge is *Fifty Dollars*, payable in two equal installments in advance, or monthly in advance, by special arrangement with the Secretary.

For attendance on Lectures, as hereinbefore stated, the charge is *Forty Dollars* per annum, payable in monthly installments in advance.

The fee for graduation, which is additional to the yearly charge for attendance, *and which includes all expenses of the annual commencement*, is *Ten Dollars.*

Old students who may desire to keep up their connection with the University by becoming members of the Alumni Society will please communicate with the Secretary, E. D. F. Brady, Metzerott Building, 1110 F Street N. W., Washington, D. C. All whose names were upon the rolls prior to 1883 are eligible to membership. Since that date only graduates of some department of the University are admitted.

GENERAL STATEMENT.

ORGANIZATION.—GEORGETOWN UNIVERSITY at present consists of the COLLEGE, the SCHOOL OF MEDICINE and the SCHOOL OF LAW. The COLLEGE, however, comprises in itself four distinct Departments, viz: The Graduate School, the Collegiate Department, the Preparatory Department, and the Astronomical Observatory. Every one of the Schools and Departments is under the direction of its own Dean, and every Faculty has the power of legislating on its own affairs; but this power can be exercised only in subordination to the President and Directors of the University, and subject to their approval.

HISTORY.—The foundation of Georgetown College was projected as early as the year 1785, when the Rev. John Carroll, afterward the first Archbishop of Baltimore, formed the plan and proposed it to his associates. On November 13, 1786, the Corporation of Roman Catholic Clergymen, in the Chapter held at Whitemarsh, Md., adopted a series of *Resolves Concerning the Institution of a School*, in which it ordered that a school should be erected at Georgetown, Md., and directed the sale of a piece of land belonging to the corporation, in order that the proceeds might be applied to the erection of the first building. Rev. Messrs. John Carroll, James Pellenz, Robt. Molyneux, John Ashton and Leonard Neale were appointed Directors.

Shortly afterward an appeal was issued, entitled *Proposals to Establish an Academy at George Town, Patowmack River, Maryland.* In this circular it was stated that, "Agreeably to the liberal Principle of our Constitution, the Seminary will be open to students of Every Religious Profession." In 1788 the erection of the first building was undertaken; yet 1789 is commonly considered the year of the foundation of the College, as the deed of the original lot of ground was dated January 23 in that year. Students were not received before 1791. Upon the reorganization of the Society of Jesus in Maryland, in 1805, the Georgetown College, as it had already begun to be called, was transferred to the Fathers of that Society, under whose control and direction the University still remains.

An act of Congress, dated March 1, 1815, reads as follows:

"AN ACT

"CONCERNING THE COLLEGE OF GEORGETOWN IN THE DISTRICT OF COLUMBIA:

"*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled:* That it shall and may be lawful for such persons as now are or from time to time may be, the President and Directors of the College of Georgetown, within the District of Columbia, to admit any of the students belonging to said College, or other persons meriting academical honors, to any degree in the faculties, arts, sciences, and liberal professions, to which persons are usually admitted in other Colleges or Universities of the United States; and to issue in an appropriate form the diplomas or certificates which may be requisite to testify to the admission to such degrees.

"LANGDON CHEEVES,
Speaker of the House of Representatives.
"JOHN GAILLARD,
President pro tempore of the Senate.
"Approved: JAMES MADISON."
"March 1, 1815.

Two years later the power of granting degrees, thus acquired, was first exercised.

In 1833 the Holy See empowered Georgetown College to confer, in its name, degrees in Philosophy and Theology. The text of the decree is as follows:

"DECRETUM SACRÆ CONGREGATIONIS DE PROPAGANDA FIDE.

"Cum R. P. Joannes Roothaan Societatis Jesu Præpositus Generalis supplicibus precibus ad Sanctissimum Dominum Nostrum Gregorium Div. Prov. PP. XVI. datis exposuerit, ejusdem Societatis Collegium Georgiopoli in America Septentrionali situm, per legem a Conventu Fœderatorum Statuum, anno 1815 latam, fuisse in Universitatem erectum, in eoque juvenes Philosophicis et Theologicis disciplinis institui; quin tamen in eo Gradus conferantur, quod eorum conferendorum potestas a Sancta Sede nondum facta fuerit; insuper addiderit, quod si Georgiopolitano Collegio ea facultas daretur ad illius instar, quæ olim per Brevia Julii III. anno 1552, et Pii IV. anno 1561, competebat omnibus ejusdem Societatis Collegiis, in quibus Philosophiæ et Theologiæ cursus rite absolvebantur, multa Religioni emolumenta obventura, sed illud maxime quod Georgiopolitanum Collegium cum sit in Fœderatis Americæ Statibus sola Universitas publice agnita, spe Doctoratus illecti, qui in illis Regionibus maximi fit, undique ad illud confluerent juvenes ecclesiastici, sicque cursum Theologiæ, quem in eorum Diœcesibus leviter modo attingunt, rite absolverent; relatis per R. The next step in the development of the College was the erection and equipment of a complete Astronomical Observatory in 1843.

In the following year the formal incorporation of the Institution was effected by Congress in the following act:

" AN ACT

" TO INCORPORATE GEORGETOWN COLLEGE, IN THE DISTRICT OF COLUMBIA.

" *Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That there be erected in Georgetown, in the District of Columbia, a college for the instruction of youth in the liberal arts and sciences, the name, style and title of which shall be ' The President and Directors of Georgetown College.'

" SEC. 2. *And be it further enacted*, That James Ryder, Thomas Lilly, Samuel Barber, James Curley, and Anthony Rey be, and they are hereby declared to be, a body politic and corporate, with perpetual succession in deed or in law to all intents and purposes whatsoever, by the name, style and title of ' The President and Directors of Georgetown College,' by which name and title they and their successors shall be competent, at law and in equity, to take to themselves and their successors, for the use of said college, any estate whatsoever, in any messuage, lands, tenements, hereditaments, goods, chattels, moneys, and other effects, by gift, bequest, devise, grant, donation, bargain, sale, conveyance, assurance, or will ; and the same to grant, bargain, sell, transfer, assign, convey, assure, devise, declare to use and farm, let, and to place out on interest for the use of said college, in such manner as to them, or a majority of them, shall be deemed most beneficial to said institution ; and to receive the same, their rents, issues and profits, income and interest, and to apply the same for the proper use and benefit of the said college ; and by the same name to sue and be sued, to implead, be impleaded in any courts of law and equity in all manner of suits, actions, and proceedings whatsoever, and generally by and in the same name to do and transact all and every the business touching or concerning the premises : *Provided*, That the same do not exceed the value of $50,000 net annual income, over and above and exclusive of the receipts for the education and support of the students of said college.

" SEC. 3. *And be it further enacted*, That the said corporation shall adopt a common seal, under and by which all deeds, diplomas, and acts of the said College or corporation shall pass and be authenticated, and the same seal, at their pleasure, to break and alter, or devise a new one.

" SEC. 4. *And be it further enacted*, That no misnomer of the said corporation shall defeat or annul any donation, gift, grant, devise or bequest to or from the said corporation.

" SEC. 5. *And be it further enacted*, That the said corporation shall not employ its funds or income, or any part thereof, in banking operations, or for any purpose or object other than those expressed in the first section of this act; and that nothing in this act contained shall be so construed as to prevent Congress from altering, amending, or repealing the same.

The School of Medicine was opened in 1851, and the School of Law in 1870. The Graduate School was in existence as early as 1856, in which year it comprised four Resident Graduates. It has continued with varying degrees of success since that time, and in the year 1890 assumed a marked development.

Location and Extrinsic Advantages.—In its location at the capital of the nation, Georgetown University enjoys advantages which can hardly be overestimated, and which must necessarily increase with the growth of the country. Not only is the city, free as it is from the noise, dirt and distracting surroundings of a great commercial centre, most favorable to the tranquil and earnest pursuit of study, but it has an unparalleled educational equipment in the great scientific collections and libraries of the Government. By the authority of Congress all such facilities for research and illustration in the Governmental collections are made accessible to the scientific investigators and the students of institutions of higher learning in the District of Columbia.

This provision applies to the Library of Congress the National Museum, the Patent Office, the Bureau of Education, the Bureau of Ethnology, the Army Medical Museum, the Department of Agriculture, the Fish Commission, the Botanical Gardens, the Coast and Geodetic Survey, the Geological Survey, the Naval Observatory, several hospitals, and other departments supplied with special libraries, laboratories and equipment for research. The administration of these bureaus brings together a large corps of scientific workers, and has already made of Washington the great scientific as well as political centre of the country. One consequence of these conditions is that the scientific societies are exceptionally numerous and flourishing. Even the presence of the National Government, with its executive, legislative and judicial machinery, is a most powerful agent of education: to be familiar as a matter of daily observation with the workings of the House of Representatives, the Senate, the Supreme Court and the Administration is a privilege and a training which cannot be too highly prized, and which cannot be found elsewhere.

Of all these extrinsic facilities the various Faculties of Georgetown University make full use, and among her instructors are found not a few of the most eminent scholars and scientific men employed in the technical service of the Government. Her students receive the most cordial reception and careful assistance in their work in the various libraries, museums and scientific bureaus.

To the advantages enumerated above is added the atmosphere of study and research engendered by the presence of the many universities of which Washington is rapidly becoming the seat.

NEEDS OF THE UNIVERSITY.

Without endowment, and deprived of all resources save the fees of the students, Georgetown College has grown from a struggling Academy to a University, which, with no undue commendation, may be called flourishing. Of late years she has been enabled to liquidate a considerable portion of the debt incurred, and to supply herself with halls and facilities long needed. But much remains to be done to enable Georgetown to continue the development which has been steadily going on for more than a century.

The Faculty therefore appeals earnestly to the friends of the College and to all who are interested in the advancement of education, to assist them with funds for the erection of buildings, and the endowment of the various departments of the University. Every alumnus and friend should incorporate in his will a bequest of greater or less amount to the University.

Chief among the wants of the College are the following : A SCIENTIFIC SCHOOL, which would include the present classes of Natural Science, and would add to them the technical courses long contemplated. For the establishment of such classes, particularly in ENGINEERING, the present time is peculiarly opportune. Applications are constantly received from students who desire instruction in these branches ; and professors of the highest degree of competence are ready to undertake the task. What is still needed is that some one possessed of sufficient means and impressed with the value of scientific education, should make this exalted purpose his own. A structure suitable for shops could be erected for a sum not less than $30,000 or $40,000. For apparatus and equipment a like sum would be required ; but this expenditure could be distributed over several years.

A GYMNASIUM and NATATORIUM, $50,000 to $100,000.

A free HOSPITAL in connection with the Medical Department, $75,000 to $100,000.

The liquidation of the debt of the LAW SCHOOL and the foundation of professorships therein.

Besides these principal demands, many smaller wants are pressingly felt. Such are, the completion of the two beautiful stone porches of the new building, one of which is estimated at $6,000 and the other at $10,000; the finishing of certain halls in the same building, $6,000 to $10,000; the completion of the equipment of the Observatory and the foundation of a small working fund for the use of its Director, $25,000, &c. The names of benefactors will be given to buildings erected, halls completed, or schools endowed by them.

It is proposed that for the present the endowment asked for chairs should be $40,000 each; for scholarships covering only tuition, $1,500 each; for scholarships providing lodging and board as well as tuition, $6.000 each.

All bequests should be made to *The President and Directors of Georgetown College, in the District of Columbia.*

THE COLLEGE.

ORGANIZATION.—Georgetown College constitutes one of the three greater divisions of Georgetown University, viz: The College, the Medical School, and the Law School. The College, however, comprises in itself four distinct departments: The Graduate School, the Collegiate Department, the Preparatory Department, and the Astronomical Observatory.

SITE AND SURROUNDINGS.—Georgetown College is situated on Georgetown Heights, two and one-half miles distant from the Capitol, overlooking the City of Washington and the Potomac River, and commanding one of the noblest views in the world. The site is singularly healthful, and the climate exceptionally soft and mild.

The College buildings are seven in number, exclusive of the Observatory, and present an aggregate frontage of about eight hundred feet. They are surrounded by grounds comprising seventy-eight acres, a large part of which is occupied by the "Walks," whose sylvan beauty has made them famous.

ACCOMMODATIONS.—A considerable number of single rooms in the main building are rented to students of the Collegiate classes. Those whose means or inclinations do not lead them to take a private room and all students of the Preparatory Department sleep in the dormitories and study in a general study hall. The dormitories are spacious and lofty, well ventilated and heated. The beds are surrounded by curtains, each alcove affording sufficient space for washstand, chair, and trunk, or, if desired, bureau. Thus almost as much privacy is secured as in a separate room.

The double rooms of the North Building are reserved for graduate students. None but graduates are allowed to board outside of the College premises, unless with immediate relatives.

GENERAL CONSPECTUS OF STUDIES IN THE COLLEGE.—The course of studies at Georgetown is carefully and logically graded throughout.

In the Preparatory and Collegiate Departments the purpose is to give the student a complete general or liberal education, which will train and develop all powers of the mind and will cultivate no one faculty to an exaggerated degree at the expense of the others. It is intended, too, to impart the broadest possible culture, together with accuracy in scholarship. To attain this end, the course, during the Preparatory and Under graduate periods, is prescribed, and embraces the Latin and Greek Classics, English in its various branches and aspects and correlated studies, such as Rhetoric, Literature, History, etc., one Modern Language besides

English, Mathematics, including Differential and Integral Calculus, Chemistry, both General and Qualitative Analytical, the elements of Geology, Astronomy and Mechanics, and a very thorough training in Physics and Rational Philosophy.

The Preparatory Course comprises three years, designated Third, Second and First Academic. The College or Undergraduate Course occupies four years, Freshman, Sophomore, Junior and Senior.

The exacting and comprehensive nature of this course may fitly form a subject of comment. It is believed that its requirements are seldom equalled, even in the larger colleges of the country. As an indication of the labor demanded for the successful completion of the course, it may be stated that the amount of time spent in class by all the students, save those of the Senior year, is twenty-seven and a half hours weekly. In the Senior year, lectures, recitation, and disputations occupy twenty-two hours per week. To prepare for these classes and recitations, obligatory study is exacted, varying from twenty-three hours and forty minutes to twenty-seven hours per week. Moreover, students who aim at a high standing spend much time in study in addition to that which is of obligation.

It is presumed that a man of fair capacity who has conscientiously followed this curriculum under capable professors will be possessed of trained and cultivated faculties, and will have a considerable amount of positive knowledge in every department of learning. He is thus in touch and intelligent sympathy with progress in every field of intellectual activity, and is saved as far as possible from narrowness and superficiality. Such an education serves, it is believed, as the best foundation for special training in any branch which the student, with his mind now mature and disciplined, may decide to take up. Those who are unable or unwilling to undergo the amount of labor and application necessary to the mastery of the full curriculum will be obliged to go elsewhere.

DEGREES.—The successful completion of this course is rewarded with the degree of Bachelor of Arts. No other first degree is given in the College, those of Bachelor of Science and Bachelor of Philosophy having been abolished by action of the Faculty.

When this point is reached, the University offers her graduates special training in several branches, at their option. Her schools of Medicine and Law give full and accurate training for those professions; while in the Graduate School higher courses are offered in Psychology, Ethics, Political Economy, History, Philology, the various Literatures of Modern Europe, Physics, Chemistry, Mathematics, Art, Music, etc.

The conditions for the degree of Master of Arts and Doctor of Philosophy will be found under the Graduate Department. Honorary degrees are conferred, at the discretion of the Faculty, upon those who unite proficiency in the Classics with exceptional eminence in Literature, Science, or the Professions.

Degrees will not be given at any other time than the annual commencement in June.

METHODS OF TEACHING.—One of the most essential necessities for success in educational work is the possession of natural, thorough, and effective methods of teaching. It is necessary, too, that these methods should be uniform in spirit throughout the school, employed equally by all the teachers under whom the student may come. In this respect Georgetown enjoys peculiar advantages. Her teaching is guided by the principles laid down in the famous RATIO STUDIORUM. This body of rules and suggestions has been elaborated by centuries of experience, and has been judged worthy of attentive study and hearty approbation by the greatest scholars. It is a noteworthy fact that many of the recently-devised methods of teaching, such as the Natural, the Inductive, and similar plans, are in reality mere repetitions of devices recommended long ago in the RATIO STUDIORUM and practised with varying degrees of fidelity in the colleges of the Society of Jesus.

DISCIPLINE.—In Georgetown's system of education, one of the most important features is the formation and training of character. It is intended to develop the character no less than the mind. Hence a greater degree of supervision is exercised over the students than is usual at the present day in many other large institutions; but the manner of doing this is such as to relieve the plan of its harsher features. The College is considered as constituting a large family. The Professors live with the students, mingle with them constantly, take part in their sports, direct their studies personally, and in every way assume the relation rather of older brothers than of taskmasters. This constant, familiar, personal communication on kindly terms between Professor and student is a powerful means for the formation and uplifting of character.

As the student reaches the later years of his college course, a somewhat larger degree of liberty is granted him; and when he enters the GRADUATE SCHOOL, or either of the professional departments, he is almost entirely freed from restrictions of any kind. He is then believed, by reason of the long course of judicious training which he has undergone in contact with cultivated and enlightened men, to have acquired habits of self-control, and to be prepared to comport himself anywhere and everywhere as a law-abiding, Christian gentleman.

ACADEMIC COSTUME.—The University gown and cap are worn by the Senior Class of the College, and on the more solemn academic occasions their use is obligatory. Students of the Graduate School add the hood; and all graduates of the University are now entitled to wear the complete academic costume, consisting of gown, cap, and hood. All members of the Faculty who hold a degree from some other institution of learning, may wear the hood proper to the corresponding degree in this University.

It is hoped that at all future commencements and other gatherings of an academic character this right will be exercised by many or all of those possessed of it.

The hood indicates in every case the wearer's degree. The Bachelor's hood is ten inches shorter than the Master's, while the Doctor's hood, of the same length as the Master's, is attached to a panel of the same material as that of the hood itself. The department in which the degree was taken is pointed out by the color of the edging, white designating Arts and Sciences; blue, Philosophy; purple, Law; green, Medicine; scarlet, Theology, etc. The interior of the hood is lined with the College colors—blue and grey, in silk.

In the foregoing features the hood adopted by Georgetown follows the intercollegiate agreement; but in size and shape it has been modified so as to be less cumbrous and more graceful than the usual pattern.

Messrs. Parker, Bridget & Co., of 315 Seventh St. N. W., Washington, D. C., who have devised the hood, furnish it at remarkably low prices; while gowns and caps of the approved type may be obtained from the same firm, or from Strawbridge, Clothier & Co., Philadelphia, or from other respectable dealers, at a moderate expense.

GENERAL INFORMATION.

This School of Georgetown University is designed for those college graduates who desire to continue their education in the Arts and Sciences. It is adapted to those who come for the mere love of learning, or to those who have in view a more complete preparation for one of the learned professions. Here they can devote themselves to liberal studies of a higher character analogous to the career they have in prospect.

The courses, if pursued to the full extent recommended, are ample enough to tax the energies of any student. Yet the minimum of work exacted is not too much to be profitably combined, in some cases, with the required attention to purely professional studies.

Admission.—All graduates of Georgetown College, or of institutions of like standing, are admissible to these courses.

Residence.—Students taking only graduate work at the College, may reside within the College walls or not, as may suit their convenience. Those attending the Schools of Law or Medicine are expected to live outside of the College; and, if desired, good boarding places, where reasonable rates are charged, will be secured them.

Time.—The yearly session opens on the first day of October, and closes with the annual commencement of the College, on the third or fourth Tuesday in June.

Studies.—A brief schedule of topics in the various branches will be found subjoined. Class work is carried on by lectures, direction in reading, and intimate personal and practical guidance on the part of the professor, and on the side of the student by repetitions, written papers, and the preparation of original theses and investigations. The aim is to surround the graduate student with every facility for advanced work, and every incitement to independent inquiry—in a word, to inspire him with the genuine spirit of scholarship.

Every student must select, with the approval of the Dean, at least three courses, involving attendance upon lectures for eight hours a week. One of these courses must be Rational Philosophy. Where a greater number of courses is taken, successful examinations in three, one of which must be Philosophy, will be counted as sufficient for the degree.

Aids to Study.—Students have the privilege of consulting their professors freely outside of the hours of lecture. Under the direction of the respective lecturers, they are permitted the use of the Riggs Library, the Cabinet of Physics, the Physical and Chemical Laboratories of the College, and the scientific collections of the Coleman Museum.

The Graduates' Library of Literature, a special collection intended for seminar work and already comprising some thousands of volumes, is placed in the old library of the North Building, so as to be readily accessible at all times. The Morris Literary and Debating Society has been organized for Graduate, Law and Medical Students.

DEGREES.—The Master's Degree in Arts or in Science will be given to those already holding the corresponding Bachelor's degree, on the completion of one year of residence, with attendance upon lectures, presentation of papers, and satisfactory examinations, as specified above.

For the degree of Doctor of Philosophy, two years of residence and application to selected and duly authorized graduate courses are required. The candidate must pass a final examination, present a thesis bearing upon his special department of study, and convince the committee appointed by the Faculty of his distinguished merit to receive this degree.

FEES AND EXPENSES.

The fee for tuition is $100 per annum, whatever number of courses may be taken. The charge for room, board and washing at the College is $300 for the year.

These charges must be paid in half-yearly instalments, and strictly in advance.

COURSES FOR 1896–1897.

I.—DEPARTMENT OF PHILOSOPHY.

COURSE 1. *a*) Psychology. Two hours a week, first term. Leading questions of the day developed with special reference to current errors.

b) Natural Theology. Two hours a week, second term. The Concept, Existence and Attributes of the Deity.

COURSE 2. *a*) Ethics. Two hours a week, both terms. A more extended application of ethical principles to modern conditions than can be attempted in the undergraduate course. The right of property. The State—its origin, object, constitution, nature, and limits. Church and State. Church and school. International law. Peace and war. Treaties. Principles of nationality.

b) Political Economy. Two hours a week, both terms. Production and consumption. Exchange, trade, commercial credit. Profits, rents, and wages. Social relations. Financial functions of government, taxation, public debts and revenues.

COURSE 3. Elementary Law. One hour a week, both terms. The general outlines of Jurisprudence and Elementary Law. This course is intended to present the elements of Law as a liberal study: but it may profitably be followed by those purposing to take professional courses in the Law School, or already engaged therein.

II.—DEPARTMENT OF LANGUAGE AND LITERATURE.

COURSE 4. *a*) English Philology. One hour a week. Survey of Early English. The English of Chaucer, Shakespeare, Dryden, and Newman. Dialects. Historical Grammar, together with analytical reading of the representative writers of each period. Use of the Early English Text Society publications.

b) Advanced Rhetoric. One hour a week. Study of form in the more salient literary productions of the period. The essay, drama, novel, satire. Forensic and academic oratory. Journalism. Composition with a view to authorship. Criticism.

COURSE 5. *a*) English Literature—Pre-Elizabethan. One hour a week. Anglo-Saxon Period—Beowulf, Caedmon, Aldhelm, Cynewulf, Bede, Ælfred the Great, Ælfric. Norman—Geoffrey of Monmouth, Romances, Layamon, Orm, Hermit of Hampole, Robert of Brunne. Chaucer Period—Langland, Gower, Chaucer, Lydgate, Barbour, Gavin Douglas, Ballads.

b) English Literature—Post Elizabethan. Two hours a week. The era of the great dramatists—Shakespeare. Spenser, Milton, Dryden. The Age of Queen Anne. Johnson, Burke, Sheridan, Cowper. The Nineteenth Century.

c) American Literature. Representative names—Franklin, Daniel Webster, Irving, Brownson, Emerson, Prescott, Hawthorne, Longfellow, Lowell.

COURSE 6. French Language and Literature. Two hours a week. *a*) Philology. Origin and formation of the language. Gallic, Latin, and Teutonic elements. The "Langue d'Oc" and "Langue d'Oil." The dialect of "Ile de France."

b) Literature. Early epics and lyrics. Chanson de Roland. The Troubadours. The Trouvères of the XII. and XIII. century. Early dramatic cycles. The confrères de la Passion. First French Comedy. Prose writers of the XII.–XVI. century.

COURSE 7. German Literature. Two hours a week. *a*) Philology. Development of Modern High German.

b) Literature. Dawn of the modern era. Age of Frederick the Great. The literary galaxy at Weimar. Analysis and critical reading of authors.

N. B.—For admission to the courses of French and German Literature, a reading knowledge of these languages, respectively, is required.

COURSE 8. Comparative Literature. One hour a week. *a*) Rapid survey of the classic literature of Greece and Rome.

b) Sketches of the ancient literature of the East—Hebrew, Assyrian and Egyptian, Sanscrit and Zend. Also short accounts of Modern Persian, Arabic, Chinese and Japanese.

c) The origin and progress of the Romance literatures, with the exception of French.

III.—DEPARTMENT OF HISTORY.

COURSE 9. Two hours a week. *a*) Theory of historical writing. Euristic, Documents, Chronology. Mental and moral qualifications of the Historian.

b) Epochal events in the Roman Empire and the Middle Ages.

c) American History. The Constitution of the United States.

d) Arrangements are being made for a course of Ecclesiastical History.

COURSE 10. History of the Rise and Development of Civil and Constitutional Liberty. Nature of Civil Liberty. Influence of the Judaic Theocracy. Grecian and Roman institutions. Mediæval struggles. Development of constitutional restrictions on the Continent and in England. The American Constitution. Origin of its various provisions. Reaction of American freedom on Europe.

IV.—DEPARTMENT OF THE NATURAL SCIENCES.

COURSE 11. Pure Mathematics. Two hours a week for each course. *a*) Arithmetical and Algebraic Analysis. *b*) The *Ausdehnungslehre.* *c*) Non-Euclidian Geometry.

COURSE 12. Applied Mathematics. Four hours a week. Analytical Mechanics.

COURSE 13. Mechanical Drawing. Three hours a week. Descriptive Geometry and Machine Design.

COURSE 14. Physics. Two hours a week for each course. *a*) Mathematical Theory of Electricity. Theory of Dynamos. *b*) Thermodynamics.

COURSE 15. Chemistry. Lectures. Three hours a week. Laboratories open eight hours daily.

Laboratory Courses: *a*) Quantitative Analysis. *b*) Determinative Mineralogy, including Blowpipe Analysis and the simpler processes of Furnace Assaying. *c*) Synthesis and Analysis of Carbon Compounds.

Lectures: Chemical Philosophy. Hydrocarbons and their Derivatives.

V.—DEPARTMENT OF THE FINE ARTS.

COURSE 16. Two hours a week. *a*) Philosophy and History of Art, in a series of special lectures. *b*) Technical instruction in drawing and painting.

COURSE 17. Music. Harmony. Scales. Intervals. Common chord. Major system. The general laws of part writing. Cadence. Inversion of common chord. Minor system. Dissonance. Chord of the seventh degree. Dominant seventh chord and its inversions. Collateral seventh harmonies. Double and hard diminished triads. Chromatic alterations of seventh chords. Modulation by normal progression, chromatic and enharmonic. Auxiliary notes, passing notes, anticipations, suspensions. Organpoint.

Counterpoint. Four orders of simple counterpoint. Contrapuntal choral, treatment. Double, triple, quadruple counterpoint. Counterpoint in the octave, tenth and twelfth. Imitation. Canon. Fugue.

History of music.

The course in music is new, and will be given by ANTON GLOETZNER, MUS. D.

The Faculty has in immediate contemplation the furnishing of other advanced instruction in Ecclesiastical History, the Oriental Languages Biology and the Philosophy of History.

As opportunities may offer or demand may suggest, other courses will be provided.

All those interested in additional branches of learning, will kindly send for information.

PRACTICAL SUGGESTIONS.—Those who aim at Journalism can lay a solid foundation in such courses as: Philosophy, Ethics, Economics, History, Advanced Rhetoric, English and French or German Language and Literature. In addition to the required essays and dissertations in their departments, they may possibly secure for practice the Washington correspondence of some newspapers of the country.

Graduates desiring to qualify themselves as professors have every facility to perfect themselves in their chosen specialty.

Students for the Church can extend and complete the Philosophy they have begun in their last college year, and thus prepare the main requirement for entrance into Theology. This, together with the projected course in Ecclesiastical History, in which the great questions under controversy will be treated, and courses in the theory and practice of Rhetoric and in Literature, will supply a year of great utility. Facility in the use of Latin can be acquired by conversation in groups formed for this purpose.

For those who contemplate taking a course of Civil, Mechanical, Electrical or Mining Engineering in some technical institute, the Graduate School provides a special scientific department with courses in Mechanical Drawing, Descriptive Geometry, and Analytical Mechanics, the purpose of which is to enable the most capable students to take the degree of C. E., M. E., and E. E. in two years, instead of four. The plan is not so much to teach a text-book as to offer an eclectic course embodying such principles as will afterwards be found most serviceable to the student of Engineering, Architecture and Geodesy.

THE MORRIS LITERARY AND DEBATING SOCIETY.

ORGANIZED MARCH 1, 1896.

The purpose of this Society is to afford its members opportunities for the discussion of literary, philosophical, and scientific subjects. It is particularly intended that the members should present the results of their investigations in the various fields of study chosen by them.

Membership is open to students of the Graduate and Professional Schools.

OFFICERS.—JAMES I. FITZSIMMONS, A. B., *President;* JOHN J. DOUGLASS, A. B., *Vice-President;* CHARLES A. ROMADKA, A. B., *Treasurer;* HUGH AUGUSTINE GAYNOR, A. B., *Secretary;* PETER J. MCLOUGHLIN, A. B., *Custodian of the Records;* The PRESIDENT, VICE PRESIDENT, SECRETARY, EDWARD M. LAMB, A. B., and HUGH E. MCLAUGHLIN, A. M., *Executive and Literary Committee.* 30 members.

Consulting Physician.

WILLIAM N. COGAN, D. D. S.,
Attending Dentist.

SESSIONS AND HOLIDAYS.

The Academic year is divided into two terms:

The first term begins on the 15th day of September, and ends on the 3d day of February. The second term begins on the 5th of February and ends with the annual commencement on the third or fourth Tuesday of June.

The Christmas recess begins on the 23d of December and ends on the 3d of January. The Easter recess extends from Wednesday in Holy Week until the Wednesday after Easter, exclusive.

Students who overstay the time specified will be deprived of the privilege of returning home at the next recess. Hence parents and guardians are urged to observe the limits set for the recesses that occur during the year.

No schools are taught on Wednesday and Saturday afternoons, nor on days of general religious or national observance.

The classes begin at 8.45 A. M. and continue until 12. They are resumed at 3 and continue until 5 P. M.

RELIGIOUS INSTRUCTION.

Religious instruction is considered of the first importance in education.

Catechism forms one of the regular class recitations, and weekly catechetical lectures are attended by all. The prize for Christian Doctrine is awarded to the author of the best paper upon the matter of these lectures. Further instruction is given to such as have need of it, or are preparing for the Sacraments. For the development of piety there are two Sodalities, which meet weekly. All Catholic students are expected to approach the Sacraments at least once a month.

EXAMINATIONS AND PROMOTIONS.

A General Examination in all classes is held in writing toward the close of each term.

Promotions ordinarily take place at the beginning of the first term. In the College Department they will rarely be made at any other time.

AWARDS AND REPORTS.

The prizes, at the Annual Distribution in June, are awarded to those who, by their class exercises during the year and the excellence of their examinations, attain the required number of marks. As marks are not made up to absentees, students who remain at home beyond the period allotted for vacation or recess cannot expect to hold distinguished places in their classes.

Besides the Annual Distribution of Awards, the Faculty and students are assembled at the beginning of every month, when the marks and the standing of the students in their respective classes for the preceding month are publicly proclaimed, and testimonials awarded to those who have attained the prescribed degree of excellence.

A quarterly report of the standing in class, the progress and general conduct of every student is sent to his parents or guardian.

FEES AND EXPENSES.

REGULAR CHARGES.

Boarders: Tuition, Board, Lodging, Washing, and Mending of Linen for the Scholastic Year	$325 00
Medical aid and Medicines	10 00
Library Fee	2 00
	$337 00

$168.50 payable invariably in advance at the beginning of every half-year. A deposit must also be made, sufficient for books and other incidental expenses. This need not exceed $20.

Half Boarders: Tuition, yearly	$60 00
Dinner at the College, yearly	50 00
Library Fee	2 00
	$112 00
Day Scholars: Tuition, yearly	$60 00
Library Fee	2 00
	$62 00

In the classes of Poetry and Rhetoric there is a charge of $10 per annum for the use of chemicals.

In the class of Philosophy there is a charge of $10 for the use of Philosophical and Astronomical instruments.

Graduation Fee	$10 00

EXTRA CHARGES.

Private room (if desired), with heat, light, and attendance, per annum	$80 00
Use of Piano, per annum	12 00
Spanish, German, and Italian, per annum	30 00
Drawing or painting, per annum	50 00
Stenography, per annum	20 00

Music (Piano, Violin and other Orchestral Instruments, Banjo, Guitar, Mandolin), $15 per quarter of 20 lessons.

Mending of clothes and shoes at moderate rates.

All accounts must be paid half yearly in advance. If a student is withdrawn before the end of a session, no deduction will be made, except in cases of sickness or of dismissal, nor will any deduction be made for a shorter time than one month.

Degrees will not be conferred upon students whose debts to the College remain unpaid.

Articles of clothing will not be furnished by the College, unless a deposit for that purpose be left with the Treasurer, who will give a detailed account of its outlay in his regular semi annual statement.

No bills for clothing or other articles will be acknowledged unless the purchase has been authorized by the Treasurer of the College.

Books and stationery, if not supplied by the parents or guardians themselves, will be furnished by the College at moderate prices.

Whatever sums parents or guardians may allow their sons or wards for pocket money must be deposited with the Treasurer, who will disburse the same according to instructions received or as circumstances may require. *No advance will be made beyond the deposit.*

Every student from beyond the United States must have a guardian in the vicinity, who shall be responsible for his bills and receive him in case of dismissal. The same may be required for students from very distant States in the Union.

GENERAL REGULATIONS.

No distinction is made in the reception of students on the ground of religious belief, but all the boarders are required to be present at the public exercises of religion.

No student will be allowed to remain at the College during the summer vacation.

The introduction of intoxicating liquors, as well as of immoral books or papers, will render the offender liable to expulsion, as will any grave offence against morals or discipline.

The use of cigarettes is prohibited.

BOARDERS.

It is important that boarders should come provided with a full supply of clothing for both summer and winter. They must also bring with them six towels and the same number of napkins, with a napkin-ring. Linen and all articles of clothing must be marked with the owner's full name.

Boarders are forbidden to leave the College grounds without permission. Violation of this rule will render the offender liable to expulsion. Leave to visit the city, except in the company of some member of the Faculty, will not be given without the written authorization of parents; and even with such authorization, the permission will be given but rarely and for good reasons.

Students whose parents reside in the District will ordinarily be permitted to visit them on the last Saturday of every month and to remain with them until Sunday evening.

The College Authorities reserve to themselves the discretionary power of supervising all correspondence of students.

To avoid serious loss of time from study, the students are prohibited from receiving daily newspapers regularly as individual subscribers. The principal papers, however, as well as other periodicals, are kept on file in the reading-room.

DAY-SCHOLARS.

Day-scholars and half-boarders, while within the College walls, are subject to all the rules and regulations for boarders.

They are required to attend the mid-day studies at the College, and are expected to spend about three hours daily in study at home.

Punctual attendance at class is required ; and no day-scholar, after absenting himself or coming late, will be received in class without a note from a parent or guardian, countersigned by the Prefect of Studies.

Day-scholars are forbidden to take out letters or perform errands for boarders.

REQUIREMENTS FOR MATRICULATION.

Students may enter at any time during the session, and, on examination, will be assigned to the class for which their prior attainments have fitted them.

Satisfactory testimonials of good conduct will be required from those who come from other institutions.

Candidates for admission to advanced classes must pass a satisfactory examination upon all the subjects previously studied by the class which they propose to enter.

From certain preparatory schools of established reputation students are admitted to the Freshman Class, without examination, upon the Principal's certificate that they have completed the required amount of work and are prepared to enter College.

In all other cases, for admission to this class, a successful examination is required in the following subjects, or their equivalent:

LATIN.—*Grammar.*—The entire Latin Grammar, including a knowledge of all regular syntactical constructions; Translation into Latin at sight of complex English sentences, entailing the application of rules for relative clauses, indirect discourse and conditional sentences.

Prosody.—All the rules as given in Casserly's Prosody or some equivalent work; Application to hexameter verse; Scansion of Ovid and Virgil. A simple exercise will be exacted in the rearrangement of broken verse.

Latin Composition.—Translation into Latin of easy continuous prose based upon Cæsar and Cicero. This requirement is of very especial importance, and great weight will be given to it in the examination. The use of Cicero's Letters as well as his Orations as models for the acquirement of Latin idiom is strongly recommended.

Nepos.—Lives to the end of the Life of Alcibiades; also the Life of Atticus.

Cæsar—Commentaries, two books.

Ovid—Metamorphoses, one thousand lines.

Cicero—Selected letters, five hundred lines; Orations, the four against Catiline.

Virgil—Æneid, three books.

GREEK.—*Grammar*—Etymology complete, (including all the irregular and defective forms); the Rules for Accents: the Rules of Syntax and their application; the Homeric dialect.

Greek Composition—Translation into Greek of simple English sentences based upon Xenophon's Anabasis.

Xenophon—Anabasis, Books I and II.

Lucian—Six Dialogues.

Homer—Iliad, Books I and II, or Odyssey, Books I, II and III.

N. B.—The amount of matter above assigned, as will be perceived, is not great, but it is expected to be most thoroughly known. In the discussion of the classic authors, both Greek and Latin, the candidate must be prepared to give a complete grammatical analysis of every word, phrase and sentence, and to point out exceptional idioms, and must be informed on the chief points of collateral erudition connected with the text.

ENGLISH.—*Higher Grammar*—The candidate must be prepared on the matter contained in Meiklejohn's "The English Language," or some equivalent work.

Composition—A brief prose composition will be required evidencing some proficiency in narrative and critical writing. This exercise will be based upon the books and authors assigned for study in the preparatory department of this College. Questions will be asked as to the subject-matter, method of treatment, structure, and style of these books. Fair penmanship and accurate spelling will be considered as essential preliminary requirements. The need of this remark will be evident in view of the lamentable deficiency in these elementary qualifications displayed by many pupils otherwise satisfactorily prepared for College. For 1896–'97 the books assigned will be three in number, comprising any one from each of the following groups: *a*) Hawthorne's Twice-Told Tales; Longfellow's Hiawatha: Scott's Ivanhoe. *b*) Irving's Sketch Book; Scott's Lady of the Lake; Longfellow's Evangeline; Goldsmith's Vicar of Wakefield; Wiseman's Fabiola. *c*) Addison's Sir Roger de Coverly Papers; Ruskin's Sesame and Lilies; Thackeray's Henry Esmonde; Newman's Callista.

HISTORY.—The History of the Oriental Nations, Greece and Rome, as found in Myer's Ancient History or some similar work; Modern General History, Fredet's or an equivalent.

MATHEMATICS.—*Arithmetic*, entire. *Algebra* to end of Quadratic Equations; *Geometry*, Plane and Solid. (Wentworth's Complete Algebra and Wentworth's Geometry, or works of equal grade.)

MODERN LANGUAGES.–One modern Language other than English is required, preferably French or German. The elements of Grammar, including the irregular verbs; Translation into English at sight of simple Prose; Grammatical Analysis.

COURSE OF STUDIES IN THE COLLEGIATE DEPARTMENT

PRESCRIBED FOR THE

DEGREE OF BACHELOR OF ARTS.

FRESHMAN.

LATIN.—Ten and one-half hours per week. Grammar—Alvarez's Latin Grammar (text in Latin); Syntax reviewed; exceptions, idioms, figurative construction. Casserly's Prosody—Rules reviewed; study of meters; exercise in the construction of hexameters and pentameters. Cicero—De Senectute, Epistolae, Orations. Sallust—De Conjuratione Catilinae or De Bello Jugurthino. Virgil—Eclogues. Æneid, continued as sight reading. Horace—Ars Poetica and Odes. Sight Rendering from various Latin authors; practice in speaking Latin. Composition—Written exercises in Latin Prose three times weekly. Memory—Five hundred lines per term from Cicero and Horace.

GREEK.—Four hours per week. Grammar—Yenni's Grammar reviewed entire, including accent, prosody, dialects, and the scansion of Homer; Herodotus—Selections; Theocritus—three Idyls; Homer—Iliad continued; Composition—Written Exercises in Greek prose, twice weekly; Memory—At least two hundred lines per term from Homer and Theocritus.

ENGLISH.—Four hours per week. History of English Literature—lectures based on Brooke; Rhetoric—Coppens' Introduction to English Rhetoric, Books I and IV; Critical study of authors selected by the professor; Hales' Longer English Poems; Tennyson's Idyls of the King, selected; Compositions in Prose and Verse at least once a week; Declamation—Bell's Modern Reader and Speaker; History—Burke's Lingard's England; Religious Instruction—De Harbe's Full Catechism, class recitations on one of the three parts to correspond with the weekly general lectures; Memory—Selections from the authors analyzed in class.

MATHEMATICS.—Five and one-half hours per week. Higher Algebra—Wentworth's Complete Algebra, from Quadratics to the end.

FRENCH.—Three hours per week. Grammar reviewed; Selections from modern French authors—Dufour; Racine, Athalie; Corneille, Polyeucte; Exercises in Conversation; Composition.

GERMAN (alternative with French)—Grammar reviewed; Readings from selected authors—Schiller, Jungfrau von Orleans, Letters; Stifter, Das Haidedorf; Goethe, Letters.

SOPHOMORE.

LATIN.—Ten and one-half hours per week. Ars Rhetorica, Du Cygne, L. III, cc. I, II, III, IV, V, upon which the professor bases his lectures. Casserly's Prosody reviewed, knowledge of the hexameter and pentameter verse-construction refreshed, and Horatian lyric meters commenced. Cicero—Pro Archia, Pro Marcello, In Verrem. Horace—Satires and Epistles. Livy—Histories, selected. Composition—Exercises in Latin Prose and Verse. Practice in Latin conversation and reading at sight. Memory studies amounting to 500 lines per term from Horace and Cicero.

GREEK.—Four hours per week. Theme work on authors of Class; Accent, prosody, and dialects continued; The Olynthiacs and Philippics of Demosthenes; Euripides' Hecuba, or Iphigenia among the Taurians; Aeschines; Sight reading; Memory studies amounting to three hundred lines per term.

ENGLISH.—Four hours per week. English Literature—lectures based on Brooke. Rhetoric—Coppens' Introduction to English Rhetoric, Books V and VI. Poetical Analysis of Shakespeare's plays and selected English poems, Rolfe and Hales; History of the United States, Johnston; Lectures on selected periods of Church History, Noethen; Christian Doctrine recitations corresponding with matter of weekly lectures, De Harbe; Elocution, theory and practice, Bell; Compositions in prose and verse; Memory studies from authors analyzed in class; Classical authors set by the professor for reading, on which either critical round-table talks are held, or essays read.

MATHEMATICS.—Five and one-half hours per week. Wentworth's Trigonometry and Surveying; Analytical Geometry.

SCIENCE.—Three hours per week. Remsen's Introduction to the study of Chemistry; Organic Chemistry, Remsen; Laboratory practice under the direction of the professor.

JUNIOR.

LATIN.—Ten and one-half hours per week. Ars Rhetorica, Du Cygne LL. I, II, which the professor enlarges upon in his lectures; Dialectica, Russo, S. J.; Cicero—De Oratore, Pro Lege Manilia, Pro Milone; Tacitus—Agricola or Germania; Juvenal—Satires: Plautus or Terence, selected plays; Prose and verse composition, sight reading, and practice in Latin conversation; Memory studies from Cicero and Juvenal amounting to 500 lines per term.

Greek.—Four hours per week. Theme work on authors of Class; accent, dialects, and prosody, with special study of choric structures. Demosthenes—De Corona; Sophocles—Œdipus Tyrannus, or Œdipus Coloneus; Thucydides—Selections; Sight reading from St. John Chrysostom's Eutropius and from authors read in lower classes; Memory studies from authors of class amounting to 300 lines per term.

English.—Four hours per week. Lectures on Rhetoric, Coppens' Oratorical Composition; Lectures on selected periods of Church history, Noethen; Dramatic analysis of Shakespeare's plays; Historical study and oratorical analysis of selected English and American speeches, Bradley; Constitution of the United States, Story; Christian Doctrine, recitations corresponding with matter of weekly lectures, De Harbe; Elocution, theory and practice, Bell; Compositions in prose and verse; Memory studies from authors analyzed in class. Classical authors are set by the professor for class discussions or written criticism.

Mathematics.—Differential and Integral Calculus, Taylor.

Science.—Laboratory Course of Qualitative Analysis, under direction of Professor; Manual of Qualitative Analysis; Quantitative Analysis, for advanced students.

SENIOR.

Rational Philosophy.—Twelve hours per week. Russo's Logic and Metaphysics; Russo's Ethics and Natural Right. Public and Private Disputations; Papers for graduation and honors, six times in the year.

Natural Science.—Ten hours per week. Mechanics—Dana. Physics—Atkinson's Ganot; Thompson's Electricity and Magnetism; Laboratory Practice. Young's Astronomy; Le Conte's Geology. Public lectures by the students. Papers for graduation and honors, six times in the year.

Elocution—Bell.

THE OBSERVATORY.

STAFF OF THE OBSERVATORY.—REV. JOHN G. HAGEN, S. J., *Director ;* REV. JOHN T. HEDRICK, S. J. ; REV. WILLIAM F. RIGGE, S. J., *Assistant Astronomers*, and MR. JOSEPH HISGEN, *Student in Astronomy ;* JOHN J. O'KEEFE, S. J., *Attendant.*

At a distance of about four hundred yards from the College, on a prominent hill, is the Astronomical Observatory, the main building of which is sixty feet long and thirty feet wide.

I. The structure is divided from east to west into three rooms. The eastern room contains a new nine-inch photographic transit instrument, with collimators, by Mr. Saegmuller of Washington. Its cost has been defrayed chiefly by a legacy of $4,000, received from the late Mrs. Maria Coleman. In the western room is mounted a transit instrument, by Ertel & Son, of Munich. It is seven feet long and has a four and one-half inch object-glass. The middle part of the observatory is three stories high, surmounted by a rotary dome eighteen feet in diameter. Here is erected the new twelve-inch equatorial, which has already produced excellent results.

In the room below the dome is the library containing the Observations and other publications of nearly all the observatories of the world.

Under the library is the clock room, with six pendulum clocks and two chronometers, a chronograph, and a switchboard from which the electrical connections with all the instruments are made. A special line connects the switchboard with the United States Naval Observatory.

All the instruments and rooms have been furnished with electric light.

A separate dome, twelve feet in diameter, on the southwest brow of the hill, shelters the old equatorial, by Troughton & Simms, which has an aperture of nearly five inches.

An extension to the main building, on the east side of the meridian-circle room, contains an instrument for the determination of the variations of latitude. This new instrument is called the photographic zenith telescope.

Our three photographic methods of determining the variations of the poles are fully described, with illustrations and results, in a volume published last year by this Observatory under the title "The Photochronograph and its Applications."

II. The use made of the instruments has been substantially in the same lines as during the preceding years.

The *small equatorial* has been used by Mr. J. Hisgen for the observation of the variable stars. His results will appear in the *Astr. Nachr.*

The *large equatorial* is principally devoted to the construction of a Star Atlas of about two hundred and fifty charts, to be issued in five series. The first series is now ready for the press.

The results of our photographic work on double stars, planets and satellites with the twelve-inch equatorial are laid down in the volume mentioned above.

During our observations of the variations of the poles a new kind of error was discovered, apparently inherent in the zenith telescope, the effects of which have been noticed by us in several other series of observations made elsewhere. A full account of our investigations of these errors has appeared in the *Astr. Nachr.*, No. 3306, 1895.

The photographic work done with the *Ertel* transit instrument has just been published in a separate volume, which is about to be distributed. The publication of this volume is due to the munificence of Mr. P. F. Collier, of New York, who has generously supplied the necessary funds.

The work with the new nine-inch photographic transit instrument has not passed beyond the stage of experiment, owing to the illness of one of our assistants.

Father W. F. Rigge has published a valuable article on "A Graphic Method of Predicting Occultations" (*Astr. Nachr.*, No. 3342, 1896.)

III. We cannot close this yearly report on the Observatory without calling the attention of all the friends of the College to a circular which has lately been distributed. It exhibits "The Present Condition and Needs of Georgetown College Observatory," and urges the necessity of a moderate fund which will yield an annual revenue of about twelve hundred dollars, in order to defray the current expenses and provide for the annual publications.

THE DEPARTMENT OF PHYSICS.

To this Department is devoted an entire floor of the east building of the south row, affording, in addition to a lightsome and commodious lecture-room, a laboratory and a fine cabinet. The lecture-room enjoys a southern exposure, and affords ample facilities for projection by sunlight. During the past year an electric projecting lantern, made by Colt, has been introduced. The laboratory is adapted to the performance of physical experiments and measurements, particularly electrical, to which much attention is given. The collection of instruments in the cabinet numbers several hundred, and is carefully selected for thorough demonstration of the principles of Physics. It includes such instruments as Melloni's apparatus, complete sets of single and double refracting prisms, polariscopes, both refracting and reflecting; the most improved forms of galvanometers and rheostats, and good working models of the various forms of dynamos and steam-engines. During the current year a three-horse-power motor, driven by a direct current of 500 volts, has been added to the equipment. This is used to drive an Edison generator of 1½ kilowatts, which gives a current of 125 volts, and is intended for experimental purposes. In addition to these forms of electrical power, the lecture-room is provided with an alternating current of 50 volts; so that electricity in its various forms is constantly before the student and subject to his command for experiments of the most practical character. The collection of Crooke's tubes is very complete, and has been further improved by the addition of tubes especially designed for the generation of the X rays. With these a series of investigations has been conducted, resulting in the obtaining of a large number of very perfect and interesting plates, some of which seem to throw new light on certain points in this obscure field of science.

CHEMICAL DEPARTMENT.

In Chemistry the College is fully equipped for thorough work, both in point of a large stock of apparatus and of ample laboratory facilities.

The laboratories intended for students in General Chemistry, fitted up in the main building, afford ample facilities for the practical courses required in that branch in addition to the regular lectures and daily repetition. The Lecture Rooms for Chemistry are large, well lighted, and abundantly stocked with materials and modern appliances of the most approved type for demonstration.

In the laboratory for Qualitative Analysis, each of the forty desks is fitted with drawers and lockers, separate drainage and water supply, and gas for both heating and illuminating purposes. There are also improved filtering apparatus, fume chambers, blow-pipe tables, powerful furnaces for crucible operations, water-baths, drying ovens, etc.

For Quantitative Analysis and Assaying, offered as electives to Graduate students, there is also a complete line of instruments and supplies.

THE COLEMAN MUSEUM.

As early as the year 1840 the collections in Natural History, under the care of Fathers James Curley and T. Meredith Jenkins, had become sufficiently extensive to warrant the setting apart of a special room for their preservation and exhibition. Here they remained until 1889, when during the Centenary Celebration, they were transferred to their present quarters, in the north pavilion of the main building. To this hall, by decree of the Faculty, was given the name of James V. Coleman, '69, in acknowledgment of his distinguished benefactions to the College. It is a spacious, lightsome room, fitted with numerous cases of various designs, all made of cherry wood, highly polished.

Since their transfer, the various collections have been newly classified and labeled, and displayed to the best advantage. Particular attention has been given to the mineral collection, which embraces specimens illustrating the entire field of Mineralogy, many of them being unique. Besides the exhibition series, numbering over 2,000 minerals, there is a working collection carefully determined and arranged in drawers for the convenience of students. In Geology and Paleontology, likewise, there are excellent collections, the rocks and fossils, arranged stratigraphically, occupying an entire row of double cases. Notable among the latter is the unusual number of specimens of the remains of vertebrates, many collected in Alaska. There are more than 1,000 ornithological specimens, and several rare mammals. The shell collection is very large, and has long been admired for the beauty and variety of the specimens. The Herbarium, containing many thousand plants, has been remounted on the new form of sheets adopted by the National Herbarium in the Department of Agriculture. Specimens of particular interest are from time to time displayed in a set of swinging glass frames constructed for the purpose. A collection of implements and other articles illustrating the ethnology of Alaska, and made by the Rev. P. F. Healy, S. J., during a cruise in the "Bear", comprises specimens which are now very rare.

Though its principal object is the instruction of the student, the Museum contains many exhibits of interest to the visitor. Among these may be mentioned the collections of coins and medals, one of which is a complete series of Pontifical medals, the numerous ethnological curios, and the relics of colonial times in Maryland.

An object of peculiar interest is a large Roman Mosaic picture, five feet by three, the gift of Mr. Coleman in memory of his deceased wife. It is undoubtedly one of the largest and finest of its kind in the world.

During the past year, the Museum has received several accessions by donations. Mr. John W. Langdale has completed and rearranged the valuable collection illustrating the mineralogy of the District of Columbia which he had already presented to the Museum.

THE RIGGS MEMORIAL LIBRARY.

This fine apartment occupies the greater portion of the South Pavilion. It was founded by Mr. E. Francis Riggs, of Washington, as a memorial of his father, the late Mr. George W. Riggs, and his brother, Thomas Laurason Riggs, formerly a student of the College.

The elegance and convenience of the library are very great; in beauty and adaptation to its purpose it is judged to be unsurpassed in this country.

The alcoves are designed to afford shelf room for 104,000 volumes. The catalogue cases contain space for 300,000 cards.

The collection of books is estimated at more than 70,000 in number, among which are many rare and curious works. There are one hundred volumes printed between the years 1472 and 1520, three manuscripts anterior to the year 1400, and others of later dates. Work on the card catalogue has been continued, and considerable progress has been made.

During the past year additions have been made to the Library, by donation and purchase, to the extent of about 1,000 volumes, exclusive of pamphlets. A still larger number has been purchased for the Graduates' Library.

THE CHAPEL OF THE SACRED HEART.

In the College Quadrangle stands the Chapel of the Sacred Heart of Jesus, measuring 109 feet in extreme length, and varying in breadth from 40 to 60 feet. This structure is the generous gift of the wife of an Alumnus, Mrs. John Vinton Dahlgren, and is intended as a memorial of her little son, Joseph Drexel Dahlgren, whose remains lie buried under the sanctuary. The Chapel was consecrated on Friday, June 9th, 1893. Its seating capacity is about 500. The College thus possesses a spacious and beautiful structure, wherein the services of the Church may be performed with fitting solemnity and dignity.

During the year the Foundress of the Chapel has continued to exercise her generosity in its regard. Two side altars of tasteful design, in marble, have been constructed in Florence and are daily expected to arrive.

THE ART AND HISTORICAL COLLECTIONS.

The College possesses the nucleus of a valuable collection of works of art, and a number of Maryland Colonial relics. It has long been the wish of the Faculty to increase these collections and give them the prominence they deserve.

Among the paintings are several works of merit by ancient and modern masters, two mosaic pictures of great beauty and value, several busts in marble or bronze, an admirable portrait of the Founder of the College, Archbishop John Carroll, painted by Gilbert Stuart, and presented by Judge P. Ord, &c.

Some years ago an effort was made to create a collection of portraits of distinguished alumni of the College. This has now assumed considerable proportions. Some of the more important accessions are a portrait of James Ord; one of Robert Walsh, by J. Neagle, given by Mrs. Robert S. Chilton; one of Rev. Francis Neale, S. J., the gift of V. Rev. Henry Cutler, V. G. of Richmond, &c.

COLLEGE ORGANIZATIONS.

THE SODALITY OF THE IMMACULATE CONCEPTION OF THE BLESSED VIRGIN MARY.

ORGANIZED 1819.

This Confraternity is composed of Catholic students of the Senior Division. Its object is the cultivation of a religious spirit among its members and the practice of devotion to the Blessed Virgin Mary.

OFFICERS—REV. WILLIAM J. ENNIS, S. J., *Director;* JAMES H. DUGAN, *Prefect;* JOHN F. WESSEL, *First Assistant;* FRANCIS X. DELANY, *Second Assistant;* MORRIS W. HEAD, *Secretary and Treasurer;* PETER F. HAGAN, *Sacristan;* SALVADOR GUILLÉN, *Assistant Sacristan.* 65 members.

CONFERENCE OF ST. VINCENT DE PAUL.

A conference of this Society was organized among the students in the year 1889–'90, under the title of the Conference of St. Francis de Sales of Georgetown College ; and on the 25th of January, 1892, it was formally aggregated to the Society as an Aspirant Conference. Its purpose is primarily not so much the actual relief of the poor in the neighborhood of the College as to train its members in the spirit and methods of this admirable organization. Yet the charitable work performed is by no means inconsiderable. During the past year the sum of $102.50 has been expended in relieving the poor. More than 500 articles of clothing have been collected and given away. About 160 rosaries and 40 scapulars have been distributed among the students. The members of the Conference have given active and regular assistance to the Mission established among the soldiers of Fort Myer, Va., teaching Sunday-school there, and in other ways aiding the Father in charge.

OFFICERS—REV. J. HAVENS RICHARDS, S. J., *Spiritual Director ;* JAMES H. DUGAN, *President ;* JOHN F. WESSEL, *Vice-President ;* ROBERT D. DOUGLAS, *Secretary ;* RICHARD J. HARLEY, *Treasurer ;* FRANCIS X. DELANY, *Keeper of Wardrobe ;* JOHN P. O'BRIEN, *Librarian.* 24 members.

LEAGUE OF THE SACRED HEART OF JESUS.

Devotion to the Sacred Heart has always existed among the students. On the 21st of June, 1888, the League was formally established in the College.

OFFICERS—REV. LOUIS S. WEBER, S. J., *Director.* PROMOTERS—*Graduate School:* JOHN P. O'BRIEN; *Senior Division:* FRANCIS X. DELANY (Head Promoter), ANDREW BERRY, ROBERT D. DOUGLAS, JAMES H. DUGAN, WILLIAM N. ROACH, JOHN F. WESSEL, HARRY A. GOWER, PETER F. HAGEN, CHARLES R. MULLEN, JAMES W. MCINTIRE, THOMAS DELIHANT (who formed two other bands among friends at home), JAMES J. ALEXANDER; *Junior Division:* PAUL D. BURNE, LOUIS L. LAUVE, HENRY C. CHAPPELL. 245 members.

ST. JOHN BERCHMANS SANCTUARY SOCIETY.

This society, established in 1892, has for its object the fostering of zeal in the service of the altar and the training of its members in the exact performance of the various ceremonies of the Church. It also assumes charge of the decoration of the Chapel on Festival days.

OFFICERS—CHARLES N. RALEY, S. J., *Director;* WM. J. O'LEARY, *Master of Ceremonies;* JULIUS S. WALSH, *Thurifer;* FRANCIS X. DELANY and JOHN H. CASSIDY, *Acolytes;* HENRY C. CHAPPEL and REGINALD B. HENRY, *Sacristans.* 30 members.

THE COLLEGE JOURNAL.

ESTABLISHED 1872.

The COLLEGE JOURNAL is published towards the close of every month by a committee of the students. Its purpose is to aid their literary improvement, to chronicle the news of the College, etc. It also serves the Society of Alumni as an organ and means of intercommunication. Being principally devoted to matters of local interest, it must rely for its patronage chiefly upon the students and Alumni of the University, and their friends. These and all former students are urged to give it substantial support.

THE STAFF—FRANCIS X. DELANY, '97, *Editor-in-Chief;* J. ASHTON DEVEREUX, '96, JOHN MULVIHILL, '96, EDW. J. BRADY, '97, NEIL M. SCULLY, '97, THOMAS M. PIERCE, '98, LIVINGSTONE J. CULLEN, 99, GRAFTON L. MCGILL, '99, *Associate Editors;* JOHN JOSEPH GALLAGHER, '98, *Exchange Editor;* JOSEPH P. MONAGHAN, '96, *Athletic Editor;* EDWARD M. SHEA, '98, *Business Manager;* JOHN H. MCALEER, '98, O. PERRY JOHNSON, '99, *Assistant Managers.*

THE PHILODEMIC SOCIETY.

ORGANIZED SEPTEMBER 25, 1830.

The Philodemic is essentially a Debating Society, having for its object the cultivation of eloquence and the promotion of knowledge. Its motto is: Colit Societas Philodemica Eloquentiam Libertati Devinctam. It is composed of members of the more advanced classes.

OFFICERS—REV. E. J. DEVITT, S. J., *President;* FRANCIS B. McDERMOTT, *Vice-President;* OUTERBRIDGE HORSEY, JR., *Secretary;* CHARLES F. VALENTINE, *Treasurer;* TIMOTHY WELCH, *Censor.*

THE PHILONOMOSIAN SOCIETY.

ORGANIZED JANUARY 8, 1839.

The object of this Society is the cultivation of eloquence and the promotion of historical knowledge. The membership is open to students of classes above Second Academic.

OFFICERS—*First Term:* REV. JAMES F. X. MULVANEY, S. J., *President;* JAMES MURRIN, *Vice President;* EDWARD F. MULLIGAN, *Secretary;* EDWARD HORGAN, *Treasurer;* JOHN J. ENGLISH, *Amanuensis;* W. F. APPLEGARTH, *First Censor;* CHARLES DEB. CLAIBORNE, *Second Censor.*

Second Term: REV. JAMES F. X. MULVANEY, S. J., *President;* JAMES MURRIN, *Vice-President;* EDWARD R. FAY, *Secretary;* E. LOUIS BYRNE, *Treasurer;* ROBERT B. RIDLEY, *Amanuensis;* PAUL L. HEAD, *First Censor;* TIMOTHY J. O'CONNELL, *Second Censor.*

THE STUDENTS' LIBRARY.

This contains about three thousand eight hundred volumes, selected with the view of furnishing the student with the means of reference as well as entertainment. The library is open to all students, subject to a small annual fee, which serves to defray the ordinary expenses. Connected with the Library is a reading room, where the principal journals are received, together with many reviews and magazines.

OFFICERS—MR. JOHN W. CORBETT, S. J., *Director;* JAMES H. DUGAN, *Librarian;* TIMOTHY WELCH, JOHN J. GALLAGHER, JOSEPH P. MONAGHAN, MORRIS W. HEAD, *Assistants.* Reading-room—JOHN H. McALEER, *First Censor;* FRANCIS X. DELANY, WILLIAM L. D. HIGGINS, *Assistants.*

TONER SCIENTIFIC CIRCLE.

This association, which was named in honor of Dr. Joseph M. Toner, of Washington, was established for the purpose of encouraging among the students the study of Natural Science. Each member in turns writes a paper upon some scientific subject; these papers are read and discussed at the meetings of the society.

OFFICERS—MR. A. J. DONLON, S. J., *Director;* WM. N. ROACH, JR., *President;* CHARLES F. VALENTINE, *Secretary;* ALVIN J. FINKE, *Treasurer;* HOWARD I. KELLY, *Librarian;* ANTONIO J. SMITH, *Censor.*

CAMERA CLUB.

OFFICERS—REV. ARMAND W. FORSTALL, S. J., *Director;* RUFUS I. NEWELL, *President;* SALVADOR A. GUILLEN, *Vice-President.* 10 members.

THE GLEE CLUB ORGANIZATION.

This organization has for its object the advancement of musical talent among the students of the several departments of the University. It is composed of a Glee, Banjo and Mandolin Club, and numbers some fifty members.

OFFICERS—MR. P. F. O'GORMAN, S. J., *Director, Leader of Glee Club;* L. A CALLAN, *Leader of Banjo and Mandolin Club;* L. LOUIS TRACEY, *Manager.*

ATHLETIC ASSOCIATION OR "THE YARD."

Organizations for the practice of athletic sports are encouraged, but great care is taken that studies suffer no detriment from this cause. Since the death of a student, George D. Bahen, in consequence of injuries received in a foot-ball game on Thanksgiving Day, 1894, this sport has been forbidden with teams from without the College.

As yet there is no adequate gymnasium for the students of the Collegiate Department. They have, however, a series of recreation rooms fitted up for their use on the ground floor of the North pavilion. This suite is finished, like the remainder of the building, in polished wood, and comprises a central hall, an apartment for billiard tables, a dressing-room for athletic contestants, a reading-room, and the students' library.

The baseball field, which was extended and graded one year ago at the cost of more than $3,000, is 525 feet in length and 425 feet in width. During the past year, by the efforts of Walter S. Martin of California, who collected the funds from members of his own family, a fine running track fifteen feet in width, and more than a quarter of a mile long, has been constructed about the outer edge of the field.

The Athletic Association, or "The Yard," comprises under one general direction all the organizations existing among the students for purposes of amusement and exercise, such as Baseball, Track Athletics, Lawn Tennis and Billiards. These associations, which previous to the year 1889 were independent of one another, since that date have been regulated by the Yard Committee, under the direction of the First Prefect.

The Athletic Association has frequently received aid and counsel from the Alumni of the University; but feeling the need of closer relations between present and former students, it has recently organized an Advisory Board. This consists of seven members, viz., a representative of the College Faculty, three members of the Society of Alumni, and three students, one from each of the three departments, Collegiate, Medical and Law.

OFFICERS—REV. WM. M. McDONOUGH, S. J., *President;* WALTER S. MARTIN, *Vice President;* FRANCIS E. SLATTERY, *Secretary;* JOHN F. WESSEL, *Treasurer;* JOHN P. O'BRIEN, *Manager of Baseball;* ROBERT D. DOUGLAS, *Manager of Field and Track Athletics,* resigned, succeeded by FRANCIS E. SLATTERY; JOSEPH P. MONAGHAN, *Journalist,* resigned, succeeded by JOHN H. CASSIDY; ANDREW BERRY, *Manager of Billiards;* HARRY R. GOWER, *Manager of Lawn Tennis.*

The EXECUTIVE COMMITTEE is constituted by the above officers *ex officio.*

ADVISORY BOARD—REV. WM. M. McDONOUGH, S. J., *President;* J. DUDLEY MORGAN, M. D., M. J. COLBERT, J. NOTA McGILL, WALTER S. MARTIN, PETER J. McLOUGHLIN.

GENERAL STATEMENT.

The Preparatory Department comprises a course of three years, intended to prepare the student thoroughly for College.

The class-rooms of the Preparatory Department are situated in the main building of the College. In all other respects the younger students are kept apart from the older, and their dormitories, study hall, play-ground, etc., are entirely separate.

Regulations.—The rules of the junior students are the same as those given above for the students of the Collegiate Department, save that the former are forbidden the use of tobacco in any form, and that they are not allowed, even with the authorization of parents, to visit the city unaccompanied.

Fees and Expenses.—These are also the same as for students in the Collegiate Department; but no student of the Preparatory Department will be allowed the use of a private room.

Admission.—Candidates for admission are required to have completed a course equivalent to that of a public grammar school. They will be examined upon Elementary English Grammar, United States History, Geography, English Composition, and Arithmetic as far as Percentage, inclusively. Intelligent reading, fair penmanship, and accurate spelling are indispensable prerequisites.

These conditions are seldom found verified in boys under fourteen years of age.

ANNOUNCEMENT FOR 1896–7.

The complete course of study in the Medical Department extends over four terms, of seven months each. The next term will begin Thursday, October 1, 1896, and end Thursday, May 13, 1897.

The demands of modern medical education are such that the Faculty found it necessary to extend the hours of instruction so that more time may be given to practical work in laboratories and hospitals. The instruction will, therefore, begin in the morning and continue *throughout the day.* Arrangements will, however, be made so that those already matriculated may complete their courses according to the conditions existing at the time of their matriculation.

The building of this department, which has been extensively enlarged, is conveniently situated on H street northwest, between Ninth and Tenth streets, near several of the principal railway lines. It contains spacious and well ventilated lecture-rooms, chemical, histological, bateriological and physiological laboratories, a convenient and well-lighted dissecting-room, a library and reading room for the use of students. The laboratories are equipped with the latest and most approved instruments and appliances, including an ample number of microscopes of high power.

These will greatly enhance the facilities for instruction, and will enable every student to master more readily the technical skill needed in these important methods of modern medical research.

The laboratory courses may be taken independently of the lectures.

REQUISITES FOR ADMISSION.

In accordance with the regulations of the Association of American Medical Colleges, a preliminary examination is required as a condition for admission. It will not be required of those who are graduates of a college, a high school or an academy.

The examination will comprise the following subjects:

1. An English composition in the handwriting of the applicant of not less than two hundred words, said composition to include construction, punctuation and spelling.
2. Arithmetic—the fundamental rules, common and decimal fractions, ratio and proportion.
3. Algebra—through quadratics.
4. Elementary Physics (Gage).
5. Latin—equal to one year's study. (Harkness' Latin Reader or its equivalent.)

Students conditioned in any of these branches will be allowed one year's time to meet the requirements.

Students who have attended one or more terms at any other medical college in good standing, will be admitted to advanced standing upon passing the examination required of students for the stage at which they propose to enter. Those presenting certificates of examination from other medical colleges in good standing will be admitted to the respective higher classes without further examination.

Persons not candidates for the degree M. D. may be admitted without examination as special students, and may attend any of the courses upon giving satisfactory evidence that they are qualified to intelligently avail themselves of the instruction.

The preliminary examinations will be held at the College Building on Tuesday, September 29, 1896, at 8 P. M.

METHODS OF INSTRUCTION.

The course of instruction will consist of didactic and clinical lectures, recitations, demonstrations, dissecting, laboratory work and other practical manipulation. The students will be divided into four classes, called, respectively, the First, Second, Third and Fourth.

Class recitations will be conducted by the members of the Faculty.

A record of these recitations will be kept, and the average will be credited to each student in summing up after the final examinations at the end of the session.

Programmes giving time and place of the lectures and other exercises will be distributed at the commencement of each term. The Faculty reserves the right to change these from time to time as circumstances may require.

The following is a sketch of the several courses of instruction :

ANATOMY.

PROF. FRANK BAKER, A. M., PH. D., M. D.

Separate courses of instruction are given to the students of the first and those of the second years. Especial attention is paid to the practical bearings of the science and its application to surgery and pathology. The lectures will be fully illustrated by several hundred diagrams prepared especially for this course.

PRACTICAL ANATOMY.

DR. EMORY W. REISINGER,

Demonstrator.

The new dissecting-room is spacious and well provided with the proper appliances for the assistance of students. Dissecting will commence October 15th and continue until the following March. The room will be open daily for students, and the Demonstrator or his Assistants will be present. During the session there will be given special demonstrations of the brain, of the thoracic and the abdominal viscera, and also of other difficult or obscure regions of the body. The Demonstrator and Assistants will have general supervision and direction over all students while in the dissecting room.

During each session every student of the First and Second Classes will be required to dissect all regions of the human body.

The Demonstrator will examine the students from time to time during the progress of their dissections, and if he finds that they have not properly displayed the structures, or have no accurate knowledge of the parts dissected, he will require a new dissection of the same region upon another subject. He will certify to the Professor of Anatomy the satisfactory completion of each dissection.

OSTEOLOGY.

Dr. Edwin R. Hodge.

This course includes a careful study of every bone in the human body, the pupil being required to point out and designate the important and technical features of each upon an actual specimen. For the study of the skeleton it is very much like what the study of the softer parts is in the dissecting room, and is an indispensable preliminary to that work.

HISTOLOGY.

Dr. Hugh M. Smith.

In this course students are taught the theory and practical use of the microscope, and the elements of microscopical technique. Each student is given portions of the principal organs of the human body, which he is instructed to prepare, mount, examine and study under the microscope, making notes and drawings of each.

PHYSIOLOGY.

Prof. C. H. A. Kleinschmidt, Ph. D., M. D.

This course, which will extend over two sessions, comprises didactic lectures and laboratory work upon the functions of the various organs of the body in health, and upon physiological chemistry. These lectures are illustrated by demonstrations, diagrams, plates, and models.

MATERIA MEDICA AND THERAPEUTICS.

Prof. William H. Hawkes, A. M., M. D.,

One of the Consulting Physicians to Providence Hospital, and Chief of the Clinic of Diseases of Children at the Central Dispensary and Emergency Hospital.

Instruction in this Department will extend over the first three years of the medical course.

Students of the second and the third year will be instructed in the physiological action and therapeutical use of drugs, and in prescription-writing. The instruction will be given by lectures, recitations, and occasional written examinations.

MATERIA MEDICA.

GEORGE J. LOCHBOEHLER, PHAR. D., M. D.

Under this course students of the first year will be taught the appearance and physical properties of the crude drugs and the preparations derived therefrom, illustrated by actual specimens. The elements of pharmacology will also be taught, including the compounding of medicinal substances and preparations, incompatibilities, weights and measures, doses, etc. Instruction will be both didactic and practical.

CHEMISTRY AND TOXICOLOGY.

PROF. JOHN J. STAFFORD, A. M., M. D.

This course extends throughout four scholastic years, instruction being given both by lectures and by work in the laboratory. The aim is to present the subject of general chemistry in such a manner that the student will have no difficulty in grasping the principles of the science. The lectures are thoroughly illustrated by numerous experiments and a very complete collection of chemicals. The laboratory is commodious, well lighted and ventilated, and fully equipped with all the modern appliances for chemical investigation. Each student upon entering is assigned a separate table, furnished a full set of reagents, and given access to the various instruments required in the work. The theoretical studies and practical work go hand in hand, the student's work being directed by well-trained instructors.

Special attention will be given to the examination of air, water, and milk with reference to public health and hygiene.

The first year students attend lectures in elementary chemistry during the entire session. They also work in the laboratory four hours per week during the session, where each student is required to prepare the elementary gases and perform experiments illustrating their properties. They construct apparatus, familiarize themselves with chemical manipulation, after which they are required to group and analyze the various salts of the elements, using both the wet and dry methods.

The second-year students spend six hours per week in the laboratory during the session. They are given a thorough course in qualitative analysis with special reference to the examination of medicinal and commercial chemicals, food stuffs, cosmetics, wall papers, dyes, fabrics, paints, etc., for the detection of substances injurious to health. A portion of this time is directed to volumetric analysis.

The third-year students attend lectures on urinalysis and clinical diagnosis, and work in the laboratory six hours per week during a part of the session. Each student is required to familiarize himself with the proper methods of examining urine and other excreta with special reference to the diagnosis of diseases.

The fourth-year students attend lectures on toxicology and, in conjunction with same, work in the laboratory, where they study the toxic effect of substances, and the detection and estimation of poisons in animal tissues.

THEORY AND PRACTICE OF MEDICINE.

PROF. J. W. H. LOVEJOY, A. M., M. D.,

Consulting Physician to Garfield Memorial and Children's Hospitals.

Instruction in this branch will be given by didactic lectures and reviews. An effort will be made to give in the course of two sessions as complete a description as possible of the diseases usually considered as belonging to the province of this chair, and in such manner as to give the student a clear conception of the methods of discrimination and management of the various diseased conditions. This teaching, together with the supplementary advantages offered by the various clinics to which the student will have access, will, it is hoped, afford him an opportunity of acquiring a thorough knowledge of this subject.

MEDICAL DIAGNOSIS.

JAMES D. MORGAN, A. B., M. D.

It will be the aim in this course to impress upon the student the aids to diagnosis derived from a proper consideration of each phenomenon connected with disease. The more common and perplexing diseases will be clinically demonstrated in the lecture hall or at the bedside, and the student will be called upon to differentiate cases presented, giving the characteristic signs and symptoms of such disease.

Exhibition of such instruments as are used in diagnosis will be given, and their practical value shown.

PRINCIPLES OF SURGERY AND SURGICAL PATHOLOGY.

W. H. FORWOOD, M. D.,

Lieut.-Col. Deputy Surg.-Gen'l, U. S. A., Surgeon in charge Barnes Hospital, Soldiers' Home, D. C. Professor Military Surgery, Army Medical School.

The course in surgery is so arranged as to extend over two years, and consists of illustrated lectures and operations on the cadaver at the college and clinical instruction and demonstrations at the hospitals. Special attention is given to the modern advancements in Surgery and to practical methods of teaching all its branches, at the clinics, at the bedside, and in the operating room. Surgical clinics are held at the various hospitals and dispensaries, where there is an abundance of surgical material of every variety, which is fully taken care of for purposes of instruction. The students are required to do bandaging and are instructed in the technique of surgical work.

During the last four weeks of each college year the graduating class will receive a course of instructions in Operative Surgery on the cadaver, when each member of the class will have opportunity to do nearly every capital and minor operation under the direction of the professors.

OBSTETRICS.

PROF. HENRY D. FRY, M. D.,

Obstetrician, Garfield Memorial and Columbia Hospitals.

Obstetrics will be taught didactically, and, as far as practicable, instruction will be given at the bedside. The entire course will be graded, and will consist of classified lectures, comprising the whole subject, of recitations and demonstrations upon charts and plates, and of operations performed upon the manikin. During the past session each member of the Senior Class, under the supervision of the Demonstrator of Obstetrics, attended one or more cases of midwifery, of which he was required to keep records and present written reports of the cases. In future, every facility will be given to obtain experience in the practical workings of this department, by means of bedside instruction.

The importance of exercising strict supervision over the period of pregnancy will be dwelt upon, and attention given to the pathological changes which may occur during gestation, labor, and the puerperal state.

The great value of antiseptic principles as applied to obstetric practice will also be urged.

An operative course on the Budin-Pinard manikin will be conducted by Dr. W. Sinclair Bowen, Demonstrator of Obstetrics. Instruction will be given in abdominal palpatation, in digital examination, and the methods of diagnosticating presentations and positions of the fetus. A fresh fetus is employed in order to accustom the student to feel and recognize the different sutures and fontenelles.

An opportunity is given to each student to perform the various obstetric operations, such as the application of the forceps, version, etc.

GYNECOLOGY.

PROF. JOSEPH TABER JOHNSON, A. M., PH. D., M. D.,

One of the Consulting Physicians to the Central Dispensary and Emergency Hospital, Consulting Physician to the Woman's Dispensary, Surgeon in charge of his own Hospital for Women.

Modern gynecology will be taught in didactic lectures, freely illustrated by plates and blackboard drawings; also in small classes of two or three at a time at private operations, where manipulations and operative work will be carefully explained.

Advanced students will be given an opportunity to witness the preparations for aseptic operations, and to assist in their performance when practicable.

Abdominal surgery will receive especial attention each year, and it is intended that all of the graduating class, at least, and as many of the other students as possible, shall see abdominal operations not only in the private practice of the Professor of Gynecology, but by Clinical Professor Stone in his service at Columbia Hospital.

OPHTHALMOLOGY AND OTOLOGY.

PROF. SWAN M. BURNETT, M. D., PH. D.,

Ophthalmologist and Otologist to Providence and Children's Hospitals, and to the Central Dispensary and Emergency Hospital.

These important branches are taught as a part of the regular curriculum.

The course begins with lectures on the anatomy of the eye and ear illustrated by models, charts, and specimens under the microscope, followed by an explanation of the fundamental principles of physiological optics and acoustics. The lectures on the diseases of the eye and ear are wholly clinical, illustrative cases being taken from Dr. Burnett's extensive service at the Central Dispensary and Emergency Hospital, and at Children's and Providence Hospitals. More than twelve hundred new cases of eye and ear diseases are treated annually at the Central Dispensary alone, and all operations are performed in the presence of the class.

Dr. C. R. Dufour, Demonstrator of Ophthalmology and Otology, gives clinical demonstrations twice a week at the Eastern Dispensary.

GENERAL PATHOLOGY.

PROF. I. W. BLACKBURN, M. D.,

Pathologist to the Government Hospital for the Insane.

The course on Pathology will extend over two sessions, and will consist of lectures, demonstrations, laboratory work, and recitations.

The lectures during the first part of each session will be on general pathological processes; those of the second part will be devoted to morbid condition of individual organs, tissues, and fluids.

The demonstrations and laboratory work will be arranged with special reference to the lectures, to afford an opportunity for practical study of the subjects taught.

MENTAL DISEASES.

PROF. A. H. WITMER. M. D.,

Senior Assistant Physician, Government Hospital for the Insane.

The lectures of this course will treat of the various diseases and defects of the mind and the legal relations of the insane. They will be supplemented by clinical instruction.

Owing to recent advances in psychiatry, a more thorough knowledge of this important branch of medical science is required on the part of the student of medicine, and the subject is now receiving the prominent attention it so justly deserves in the curricula of the leading schools. The importance of the topic is not confined to the specialist alone, for the general practitioner should have an adequate knowledge of the symptomatology, pathology and therapeutics of this special class of cases; and the necessity of a knowledge of this subject in its forensic bearings is too self-evident to be discussed.

SPECIAL PATHOLOGY AND BACTERIOLOGY.

PROF. J. J. KINYOUN, M. D., U. S. M. H. S.

The course of instruction will consist of lectures, demonstrations and class recitations on the following subjects:

Infectious diseases and processes, their etiology, pathology and prophylaxis.

Bacteriology and Quarantine.

In addition to these a laboratory course in Bacteriology will be given which will continue one-half of the session. This course will consist of bacteriological technique, the study and diagnosis of diseases which are caused by micro-organisms.

The student will also be given opportunities to observe and investigate special problems in clinical diagnosis, disinfection, etc.

The laboratory course is obligatory.

HYGIENE AND MILITARY SURGERY.

PROF. GEORGE M. KOBER, M. D.

The course on Hygiene will extend over two years and will include Lectures and Recitations on sunlight, air, climate, and meteorology; water, ice, artificial carbonated waters, and soils in relation to health and disease; alimentation, food, beverages and condiments, morbific and infected food products; the skin, baths and clothing; exercise, rest, sleep, beds and bedding; private and public habitations, including drainage, ventilation, warming and lighting with practical demonstrations of sanitary appliances at the Museum of Hygiene.

The course on Military Surgery will consist of Lectures and Recitations on the duties of Medical Officers in time of peace, with special reference to the examination of recruits, discharges for disability and military sanitation; the hygiene of troops upon the march, in camps and barracks, and the training of the hospital corps for war, followed by a consideration of fire-arms, explosive compounds and projectiles, with general statistics of gun-shot, sabre and bayonet wounds, and ratios of mortality from wounds and diseases; the effects of modern fire-arms in battle and probable amount of surgical work in a given number of wounded; first aid and transport of the wounded, dressing stations, field-base and general hospitals; army diseases, their cause and prevention.

PHYSICAL DIAGNOSIS, LARYNGOLOGY AND RHINOLOGY.

PROF. T. MORRIS MURRAY, M. D.,

Director of the Throat and Chest Clinic at the Central Dispensary and Emergency Hospital.

In addition to the didactic lectures on the principles of Physical Diagnosis and Laryngology at the college there will be demonstrations in these branches to the students at Dr. Murray's very large clinic for diseases of the throat and chest at the Central Dispensary and Emergency Hospital.

This latter will be entirely practical. The class will be divided into sections each member of which will make examinations under the personal supervision of Dr. Murray: thus they will be made familiar with one of the most important branches of medical practice.

MEDICAL ZOOLOGY.

CH. WARDELL STILES. A. M., PH. D.,

Zoologist, United States Bureau of Animal Industry, Honorary Custodian of the Helminthological Collection, United States National Museum, Correspondant Etranger de l'Académie de Médecine (Paris).

In the Zoological department two courses are given—one on human and comparative embryology and one on the animal parasites of man.

Embryology. This course will consist of about twenty lectures, covering the subject up to organology. It is required of the first and second classes, and is illustrated by numerous charts prepared especially for these lectures.

Animal parasites. This course comprises a series of lectures on the animal parasites found in the human subject. The lecturer will describe the anatomy, life-history of the different forms, and the best means of treatment and prevention. The lectures will be illustrated by a series of wall maps by Leuckart, by crayon sketches, by numerous original charts prepared especially for the course, and by exhibition of specimens. The lectures will be supplemented by practical laboratory exercises in microscopical examinations of meat for *Trichinella spiralis*, and of fæces, for determining the presence of parasites.

The course is obligatory for fourth year men. An opportunity to carry on original investigation in Medical Zoology, under the direct supervision of Dr. Stiles, will be offered to graduates or to advanced students who may desire to pay special attention to this branch.

STATE MEDICINE.

PROF. W. C. WOODWARD, M. D.,

Health Officer (formerly Coroner) of the District of Columbia.

This course will consist of lectures and of such demonstrations as may be practicable upon the relation of the medical practitioner to Government, and of the application of medical science to the purposes of Government for the protection of public health, and for the determination of such medical problems as come before courts of law. Attendance will be obligatory upon students in their third and fourth years.

DISEASES OF INFANCY AND CHILDHOOD.

PROF. SAMUEL S. ADAMS, A. M., M. D.,

Consulting Physician at the Woman's Hospital and Dispensary; and the Sibley Memorial Hospital; one of the Attending Physicians of the Children's Hospital, the Garfield Memorial Hospital, and the Washington Hospital for Foundlings.

The instruction in this department will be didactic and clinical. The didactic course will be given at the College and will consist of lectures upon the peculiarities of infancy and childhood, the art of history-taking, and the etiology, pathology, symptomatology, diagnosis, prognosis and treatment of diseases peculiar to children, as well as the relation of general diseases to this age.

Practical teaching will be at the Children's and Foundlings' Hospitals.

DERMATOLOGY.

Prof. J. C. McGuire, A. M., M. D.,

Dermatologist to Garfield Memorial Hospital.

The preliminary course will include a review of the history of dermatology, minute anatomy of the skin, general pathology, etiology, and diagnosis of cutaneous affections, followed by lectures upon individual diseases illustrated by plates.

A clinical course will be given to advanced students, as it is only at the bedside that a practical knowledge of this important branch of medicine can be obtained.

DIAGNOSIS OF DISEASES OF THE NERVOUS SYSTEM.

Dr. Charles Lewis Allen.

This course will be on the diagnosis of diseases of the nervous system and, as far as possible, illustrated by clinical demonstrations. The uses of electricity as a means of diagnosis and as a therapeutic agent will be carefully taught.

CLINICAL ADVANTAGES.

PROVIDENCE HOSPITAL,

Capitol Hill, corner Second and D Streets, S. E.

This large general hospital, situated in an easily accessible part of the city, is supported in part by the general government.

It contains over three hundred beds. The medical and surgical wards are usually well filled with interesting cases. In the new surgical amphitheatre, one of the finest in the country, every provision has been made to fully carry out aseptic surgery. Accommodations have been provided for over 150 students. Clinics will be given in this hospital by the following professors of this school, and by other members of the hospital staff:

Surgical—Doctors Bayne and Crook.

Clinical Medicine—Doctors Callan, Cuthbert and Vincent.

Diseases of the Eye and Ear—Doctor Burnett.

Doctors Magruder and Hawkes are on the Consulting Staff.

An annual fee of $5, covering all the clinics for the year, is charged by the hospital authorities.

CHILDREN'S HOSPITAL,

W Street, between Twelfth and Thirteenth Streets, N. W.

Students may here observe the diseases, injuries, and deformities incident to infancy and childhood, together with the treatment appropriate therefor. Every facility will be given to thoroughly observe and comprehend the cases admitted to its wards.

The out-patient department or dispensary is open every week day from 2.30 to 4.30 P. M. It is divided into medical and surgical services, and a service for diseases of the eye and ear. All these are free of access for medical students.

Doctors Burnett and Adams will give Clinical Instruction at this Hospital.

Doctors Lovejoy, Burnett and Adams are on the staff of this hospital.

CENTRAL DISPENSARY AND EMERGENCY HOSPITAL,

Fifteenth Street and Ohio Avenue, N. W.

During the last year over 15,000 patients were treated here, and over 500 surgical operations performed, many of capital importance. Unusual opportunities are afforded for acquiring practical experience in the ordinary duties of a physician. As a large proportion of the serious cases of accident that occur in the city are first brought to this hospital because of its central location, students become rapidly trained in the effective treatment of injuries demanding prompt assistance, and of that class of cases likely to be of the most importance to the young practitioner. Students are admitted to the services. The new building just completed offers greatly improved facilities for clinical instruction; and the ambulance service and casualty wards will afford special advantages for studying traumatic and operative surgery.

There are competitive examinations for Resident Physician and two Assistant Resident Physicians.

In this institution Doctor W. H. Hawkes will give clinical lectures upon the diseases of children, Doctor S. M. Burnett upon diseases of the eye and ear, and Doctor Murray upon Physical Diagnosis, Laryngology and Diseases of the Throat and Lungs. Clinical lectures are also given by other members of the staff. Doctors Johnson and Magruder are upon the Consulting Board.

The instruction in clinical surgery at the Central Dispensary and Emergency Hospital comprises demonstrations on the cases in the surgical service. An average of over fifty were treated at each service during the year. These cases during the course of a session include a comprehensive study of all the ordinary diseases and injuries met with in practice. A selection of the most important ones is made for a special clinic each Sunday, where the senior students are required to assist the Professor and do the minor operations themselves under his direction.

Personal supervision of the training of the student is aimed at to qualify each with a working knowledge of this branch of practice.

CLINICAL INSTRUCTION.

Attention to clinical instruction is obligatory upon students of the third and fourth years. The following clinics will be held by members of the Faculty:

Doctor Johnson will invite senior students to witness gynecological operations.

Doctor Hawkes, diseases of children, at the Central Dispensary, Monday and Thursday, 1 to 2 P. M.

Doctor Forwood, surgical, Barnes Hospital, Soldiers' Home.

Doctor Burnett, eye and ear, Central Dispensary, Tuesdays and Fridays, 1 to 2 P. M., and at Children's and Providence Hospitals.

Doctor Murray, throat and chest, Central Dispensary, Wednesdays and Saturdays, 1 to 2 P. M.

Doctor Bayne, surgical, Providence Hospital, October, November and December.

Doctor Crook, surgical, Providence Hospital, April, May and June.

Doctor Callan, medical, Providence Hospital, July, August and September.

Doctor Witmer, insanity, at Government Hospital for Insane.

Doctor Cuthbert, medical, October, November and December, Providence Hospital.

Doctor Vincent, medical, Providence Hospital, January, February and March.

Doctor Stone will invite in turn senior students to be present at his service at Columbia Hospital. The most important operations in abdominal surgery are frequently performed here.

Doctor Snyder, surgical, Garfield Memorial Hospital.

Doctor Adams, infancy and childhood, Children's and Foundling's Hospitals.

Doctor McGuire, dermatology, Garfield Hospital.

Doctor Dufour, eye and ear, Eastern Dispensary, Mondays and Thursdays, 1 to 2 P. M.

SPECIAL INSTRUCTION.

Dr. Burnett has a postgraduate course of instruction in ophthalmology, beginning the 15th of October and extending to the first of March. A fee will be charged for this course, payable to him.

OTHER ADVANTAGES.

The great libraries and museums connected with the various government institutions at Washington afford advantages to the student that are unrivaled in America and are equal to those found in most European capitals. These collections are for the most part freely open to the public, or can be consulted by students upon obtaining permission, readily granted to those that are pursuing special courses of study. In most cases the collections are made available for education and research by act of Congress. The following may be mentioned:

LIBRARIES.

The Library of Congress	700,000	vols
The Library of the Surgeon-General's Office	110,000	"
The Library of the United States National Museum	16,000	"
The Library of the Museum of Hygiene	10, 00	"
The Library of the Bureau of Ethnology	5,000	"
The Library of the Bureau of Education	30,000	"
The Library of the Department of Agriculture	25,000	"

MUSEUMS, &c.

The Army Medical Museum.
The United States National Museum.
The Museum of Hygiene.
The Museum of the Agricultural Department.
The Botanical Garden.
The United States National Zoological Park.

EXAMINATIONS.

At the end of each session examinations will be held as follows:

The *First Class* upon anatomy, physiology, chemistry, materia medica, and histology.

The *Second Class* upon anatomy, physiology, chemistry, therapeutics, pathology, minor surgery, and embryology.

The *Third Class* upon therapeutics, the practice of medicine, surgery, obstetrics, gynecology, diseases of infancy and childhood, urinalysis, pathology, hygiene, special pathology and bacteriology, and mental diseases.

The *Fourth Class* upon the practice of medicine, surgery, obstetrics, gynecology, diseases of infancy and childhood, laryngology and physical diagnosis, ophthalmology and otology, animal parasites, toxicology, hygiene, state medicine, mental diseases, and dermatology.

A second examination for those who have been found deficient in the work of the previous year will be held immediately before the opening of the following session.

The standing of a student in any branch will be determined by combining the record of his recitations, his examinations (both written and oral), and his laboratory and clinical work.

Students of the first year will not be permitted to advance to the second unless their standing shall be satisfactory in three out of the five subjects of that year. They must make good their deficiencies in all the branches of the first year before being admitted to the examinations held at the end of the second year.

Students of the second year will not be permitted to advance to the third unless their standing shall be satisfactory in the branches of the first year and in the branches of anatomy, chemistry, and physiology of the second year. Deficiencies in therapeutics, embryology, pathology, and minor surgery must be made up before the student will be admitted to the examinations held at the end of the third year.

Students of the third year will not be permitted to advance to the fourth unless their standing shall be satisfactory in the branches of the second year and in the branches of therapeutics, urinalysis, general and special pathology, and bacteriology of the third year. Deficiencies in practice, surgery, obstetrics, gynecology, diseases of infancy and childhood, and hygiene must be made up betore the student will be admitted to the examinations held at the end of the fourth year.

Students of the fourth year will not be permitted to gruduate unless their standing is satisfactory in the branches of the previous years and in practice, surgery, obstetrics, gynecology, ophthalmology and otology, physical diagnosis and diseases of infancy and childhood of the fourth year. Failure in the supplementary branches taught during this year may also be considered a sufficient cause for the rejection of a student at the discretion of the faculty.

REQUIREMENTS FOR GRADUATION.

The candidate must be of good moral character and at least twenty-one years of age. He must have studied medicine not less than four years, during which he must have attended four full courses of instruction, delivered in some recognized medical school, the last of which shall have been delivered in this institution. He must have attended at least two courses of practical anatomy, laboratory courses in physiology, chemistry, histology, pathology, and bacteriology, and the clinical courses of instruction.

FEES.

Matriculation (payable but once)	$5 00
Tuition, each year	100 00
Charge for breakage, use of instruments and material in the several laboratories, each year	5 00
Anatomical material, each part*	1 00

FEES FOR SPECIAL STUDENTS.

Didactic lectures from each of the seven chairs of (1) Anatomy, (2) Materia Medica and Therapeutics, (3) Obstetrics and Gynecology, (4) Physics and Chemistry, (5) Physiology, (6) Practice of Medicine, (7) Surgery	$20 00
Dissection	10 00
Anatomical material, per part*	1 00
Practical chemistry, including chemicals and breakage, per course	25 00
Didactic and laboratory course in normal histology, pathology and pathological histology or bacteriology, including materials, each	25 00
Operative surgery on the cadaver, including material, per course	20 00

No extra charge for Demonstrators' fees.

No graduation fee is required.

Payment of not less than one-fourth of the fees is required at the commencement of the session, the balance by January 1st, ensuing.

Good board, at reasonable rates, can be obtained in the immediate vicinity of the College.

*This fee is intended to cover merely the expense of handling and preparing the material.

TEXT-BOOKS.

The following works are recommended by the Faculty as text-books and for collateral reading. The latest editions should always be procured.

Practice of Medicine.—Osler's, Loomis' or Strümpell's Practice; Da Costa's Medical Diagnosis; Pepper's American Text-Book of Theory and Practice.

Surgery.—American Text-Book of Surgery; Senn, Tillman, Treves; Treves' Operative Surgery; Warren's Surgical Pathology.

Obstetrics.—Lusk, Parvin, Reynolds.

Gynecology.—Thomas or Skene; Mundé's Minor Surgical; American System of Gynecology; Greig Smith's Abdominal Surgery.

Anatomy.—Gray, Morris or Quain; Heath's Dissector; Treves' Applied Anatomy.

Physiology.—Landois, Foster, Kirk or Yeo, Foster and Langley.

Chemistry.—Barker, Roscoe or Fownes; Smith's Chemical Tables; Kedzie's Hand-Book; Tyson or Whipple on Urine.

Materia Medica and Therapeutics.—H. C. Wood; Hare, Biddle, Shoemaker, Sayre's Organic, U. S. Pharmacopœia, National Dispensatory,

Medical Jurisprudence.—Reese, Taylor, Tidy.

Hygiene.—Parkes, Rohe, Richardson's Preventive Medicine.

Ophthalmology.—Noyes; Norris and Oliver; de Schweinitz; Landolt (translated by Dr. Burnett); Astigmatism, Swan M. Burnett.

Otology.—Politzer; C. H. Burnett.

Laryngology.—Bosworth, Mackenzie, Browne on the Throat; Wagner on the Nose.

Physical Diagnosis.—Loomis, Vierordt.

ANNOUNCEMENT FOR 1896 7.

The next term of this institution opens on Wednesday evening, October 7, 1896, at 6.30 o'clock, in the Georgetown University Law Building, 506 and 508 E Street N. W., in the city of Washington. All persons interested are invited to attend the introductory lecture, which will then be delivered. The collegiate year closes on the first of June.

ADVANTAGES.

Of the great advantages offered by a Law School over the unassisted reading of a student in a law office there can be no question. Here, however, the experiment has been successfully made of uniting the advantages of the two. The lectures are held in the evening, and, so far as practicable, students who put themselves into timely communication with the Secretary are connected with the offices of the ablest lawyers of the city, where they are allowed to familiarize themselves with the conduct of business and the practical duties of the profession.

The holding of the lectures and other exercises in the evening also enables clerks in the various departments of the Government, and other persons who are engaged during the day, to avail themselves of the privileges of the School.

The site of the institution, at the Capital of the Nation, presents advantages for the study of American jurisprudence which are unequaled elsewhere, and must always remain so.

The Law Library at the United States Capitol contains over 50,000 volumes, embracing all the noted treatises, reports and periodicals, ancient and modern, American, English and of the nations of Continental Europe. By the operation of the copyright law and the outlay of an annual appropriation it is constantly enriched with new acquisitions, and is believed to be kept in a state of completeness unrivaled among the law libraries of the world. This magnificent collection is freely open to students for seven hours daily.

Congress, the Court of Claims and the Supreme Court of the United States are in session during several months of each school year, and, with the Executive Departments, especially the Patent, Pension and General Land Offices, furnish advantages for professional study nowhere else enjoyed.

The Supreme Court of the District of Columbia has the common law, equity, criminal and probate jurisdiction of a State Court in the States, besides that of the Circuit and District Courts of the United States. Its sessions afford the student opportunities for hearing forensic arguments and forming the acquaintance of the leaders of the American Bar from all parts of the Union, besides thoroughly familiarizing himself with the practice of these various courts.

There is in the District of Columbia, no " Code " of either substantive law or procedure, and no very extensive statutory provisions. This obviates the tendency observable at so many law schools towards consuming the time and loading the memory of the student with merely local enactments, which will be of worse than no service to him when he returns to his home or removes to another locality after graduation. The jurisprudence of the District remains almost intact that of Maryland on the day of orginal cession, February 27, 1801, and is, therefore, as close an approximation to the simplicity of the Common Law, so constantly referred to in the text-books, as can be found in the Union.

COST OF BOARDING, ETC.

There is no boarding department connected with the Law School. The majority of the law students board in Washington City, where the Law School is located, and where the cost of comfortable lodging, board, fuel and gas, varies from $20 to $30 per month, according to the location and appointments selected. Satisfactory accommodation can easily be had at $25 per month, and there are every year students who provide for themselves comfortably at a cost of $20 per month, and even less. Tuition is $80 per annum, with no incidental charges except a diploma fee of $10 upon graduation. Cost of text-books is about $30 per annum. The Law School session is from the first Wednesday in October to the first Wednesday in June —about eight months. The necessary expense for board, lodging, tuition, books, etc., per annum, is, therefore, about $300, exclusive, of course, of clothing and general incidental expenses.

ADMISSION.

Students desiring to become members of the School enter their names upon the Secretary's register, at or before the opening of the term in October.

Candidates for advanced standing—*i. e.*, those desiring to complete the course in one year—must, at the time of entry, present certificates of at least one year's previous study at some approved Law School, or under the direction of a reputable practitioner.

Those desiring to enter the Postgraduate Course should exhibit their diplomas, or certificates of equivalent study.

COURSE OF STUDY.

The regular curriculum covers a period of two years, divided into a Junior and Senior Course.

The Postgraduate Course covers an additional period of one year.

Students in the Senior Course are required to attend the Lectures, and to be examined upon Part 2 of the studies, of the Junior Course, as indicated below ; and students in the Postgraduate Course are, in like manner, required to attend the lectures, and be examined upon the studies, of Part 2 of the Senior Course.

Regular and punctual attendance on the part of the student is required, as also preparation for thorough recitations in class daily, *and delinquency in either particular will be deemed a sufficient cause for refusing to grant a degree.*

Candidates for a degree must have been in regular attendance for at least one year, and must pass a satisfactory examination on the entire year's course of study.

The following is the course of study pursued in the Law School :

JUNIOR COURSE :—Part 1. *Personal Property, Torts, Domestic Relations, and Criminal Law.*

Part 2. *Real Estate, Contracts and Bills and Notes.*

SENIOR COURSE :—Part 1. *Subjects of Part 2 of the Junior Course.*

Part 2. *Pleading, Practice, Evidence, Equity, Moot Court.*

POSTGRADUATE COURSE :—Part 1. *Subjects of Part 2 of the Senior Course.*

Part 2. *Corporations, Common Law Practice, Equity Pleading and Practice, Testamentary Law, Constitutional and International Law, and Comparative Jurisprudence, Civil Law, Conveyancing, Office Practice, etc.*

SPECIAL LECTURES :—*Admiralty Jurisprudence, Statutory Law and Natural Law.*

TEXT-BOOKS.

JUNIOR COURSE :—*Blackstone's Commentaries ; Darlington on Personal Property; Bishop on Contracts; Byles on Bills; Pollock on Torts; Browne's Domestic Relations.*

SENIOR COURSE :—*Stephen on Pleading; Greenleaf on Evidence, Vol.* 1; *Adams on Equity; Shepard's Selected Cases in Equity.*

POSTGRADUATE COURSE :—*Cooley's Principles of Constitutional Law; Story on Partnership; Taylor on Corporations; Burton's Suit in Equity; Ames' Cases in Pleading; Hadley's Roman Law; Shepard's Selected Cases in Corporations.*

BOOK OF REFERENCE :—*Williams on Real Property; Sedgwick's Statutory and Constitutional Law; Paschal's Annotated Constitution.*

LECTURES.

JUNIOR COURSE :—*Monday, Tuesday, Wednesday, Thursday,* (except during First Term), *Friday* and *Saturday* evenings, at 6.30 o'clock.

SENIOR COURSE : Part 1. *Monday, Wednesday,* and *Friday* evenings, at 6.30 o'clock.

Part 2. *Tuesday, Thursday* and *Saturday* evenings, at 6.30 o'clock.

POSTGRADUATE COURSE :—Part 1. *Tuesday, Thursday* and *Saturday* evenings, at 6.30 o'clock.

Part 2. *Monday, Wednesday* and *Friday* evenings, at 6.30 o'clock.

SPECIAL LECTURES :

FIRST TERM :—*Monday* evenings, at 7.30 o'clock.

SECOND TERM :—*Wednesday* evenings, at 6.30 o'clock.

TABULAR VIEW OF EXERCISES.

For the arrangement of studies the school-year is divided into three terms: the first term ends December 23, 1896; the second, March 13, 1897, and the third, May 22, 1897.

The following tabular statement will show the assignment during each of these terms:

First Term, Ending December 23, 1896.

Personal Property	Tuesdays and Saturdays.
Real Estate	Mondays, Wednesdays and Fridays.
Pleading	Tuesdays, Thursdays and Saturdays.
Common Law Practice	Mondays and Fridays.
Moot Court	Thursdays.
Civil Law	Wednesdays.
Admiralty	Mondays and Fridays.

Second Term, Ending March 13, 1897.

Torts	Tuesdays and Saturdays.
Contracts	Mondays, Wednesdays and Fridays.
Equity	Tuesdays, Thursdays and Saturdays.
Common Law Practice	Fridays.
Constitutional Law	Mondays.
Natural Law	Wednesdays.
Moot Court	Thursdays.

Third Term, Ending May 22, 1897.

Criminal Law Domestic Relations	Tuesdays, Thursdays, and Saturdays.
Notes and Bills	Mondays, Wednesdays, and Fridays.
Evidence	Tuesdays and Saturdays.
Practice (Senior Class)	Thursdays.
Corporations	Wednesdays and Fridays.
Equity Pleading and Practice	Mondays and Thursdays.
Moot Court	Thursdays.

EXAMINATIONS.

No examination is required on entering the School, or at the beginning of the Course.

Each text-book in the course of study is made the subject of a carefully written examination, upon, or shortly after, its completion. Students passing satisfactorily upon the subjects of these examinations will not be required to stand a second examination upon them during the year; while those who fall below the standard required *may, at the discretion of the Faculty, if they have been regular in their attendance upon lectures and quizzes*, have an opportunity of making up the deficiency before its close.

This system has been found to promote more careful study, and, at the same time, to admit of more thorough examination, with less tax upon the student's endurance, than a general examination at the close of the Course.

POST-GRADUATE COURSE.

As will be seen by reference to the curriculum, the course of study for the Junior and Senior Classes embraces quite as much as can be acquired with thoroughness in two years, and a diploma, conferring the degree of Bachelor of Laws, is granted to students successfully completing this course. In the District of Columbia, however, and in many of the States, three years' study is an indispensable prerequisite to admission to the Bar; and it was to meet this exaction or demand for a higher standard of legal acquirements that the Postgraduate Course was added. It has been a source of no slight gratification to the Faculty, and a most favorable omen for the Bar of the future, to observe that many gentlemen who propose to practice in jurisdictions where the requirements are less rigorous, and some, indeed, who had been previously admitted to the Bar, have, nevertheless, diligently pursued the Postgraduate Course of Study, taking the degree of Master of Laws.

The degree of Master of Laws is conferred upon those who successfully complete the Postgraduate Course of Study, and the holder thereof is entitled to participate in the studies and exercises of the School thereafter, without additional charge.

THE MOOT COURT.

Especial, painstaking effort has been devoted, with gratifying results, to perfecting such an organization of the Moot Court as would render that adjunct of the School not merely a forum for the argument of mooted questions of law, but a useful and efficient training-school for the practical duties of the profession.

As now organized, the Court is divided into a Circuit Court and a Court of Appeals.

The Circuit Court holds two sessions weekly, known as the Special and Regular Term. At the Special Term motions, demurrers, pleas in equity and all proceedings of an interlocutory or preliminary nature which, in actual practice, ordinarily precede the final hearing upon the merits of the case, are heard and disposed of, while at the Regular Term such proceedings are had as usually characterize the final hearing of causes in courts of the first instance. The practice conforms to that of the Supreme Court of the District of Columbia, with pleadings as at common law.

The Court of Appeals, to which causes may be removed from the Circuit Court by writ of error or appeal conformably to the practice of the United States Supreme Court, is held by Messrs. Tallmadge A. Lambert, Job Barnard and Henry Wise Garnett, and sits monthly, or oftener, as the work before it may require.

While the students in the Postgraduate Course are expected to take the leading part in the exercises of the Moot Court. it will continue to be the endeavor of the Faculty to make the Court, as in the past, a training-school for all the students, as their progress warrants, in pleading, practice and forensic debate.

LIBRARY AND READING ROOMS.

A carefully selected Library, comprising the latest editions of the standard text-books, and the leading reports, has been provided for the accommodation and convenience of students, in a well-lighted and suitably appointed suite of rooms in the Law Building set apart exclusively for the purpose. These rooms are open to students and alumni of the School at all hours of the day and evening.

PRIZES.

The following prizes are offered for the competition of the students in the several classes :

1st. A cash prize of $50 to the member of the Junior Class maintaining the best average in recitations and examinations during the year.

2d. A cash prize of $25 to the member of the Junior Class maintaining the second best average in recitations and examinations during the year.

3d. A cash prize of $100 to the member of the Senior Class maintaining the best average in recitations and examinations during the year.

4th. A cash prize of $50 to the member of the Senior Class maintaining the second best average in recitations and examinations during the year.

5th. A cash prize of $50 to the member of the Postgraduate Class maintaining the best average in recitations and examinations during the year.

6th. A cash prize of $25 to the member of the Postgraduate Class maintaining the second best average in recitations and examinations during the year.

7th. A cash prize of $40 to the author of the best essay upon any legal subject, among the members of the Senior Class.

8th. A cash prize of $40 to the author of the best essay upon any legal subject, among the members of the Postgraduate Class.

LECTURE-STUDENTS.

Those who wish to avail themselves of the lectures delivered at this School without being subject to the recitations or being candidates for a degree may do so upon payment of one-half of the regular charge for tuition.

Less than two years' attendance as a lecture-student will not entitle one to admission to the Senior Class of the year following.

SYSTEM OF INSTRUCTION.

The system of instruction adopted by the Georgetown Law School is the following: A lesson, averaging from thirty to forty pages of the text-book, is assigned in advance, which the student is expected to master as thoroughly as he can before the recitation hour. The lecturer then goes over the ground covered by the text; explaining what is obscure or difficult, pointing out the application in practice of the principles treated of, and illustrating, by examples, their application in actual cases. Then follows the "Quiz," in which the lesson is gone entirely over again in the shape of questions, requiring the students to reproduce in their own language all that it contains, with practical applications of the doctrines learned to supposed cases put by the lecturer. The student thus has three opportunities of becoming familiar, theoretically and practically, with each topic treated of in the course: *once* by careful study of the text, *a second time* by the discussion of it in the lecture, *and once again* by himself reproducing and practically applying the principles thus taught, in his answers to the "Quiz." This system has been found, after careful and painstaking tests, most satisfactory to both teacher and student, and productive of the highest standard of proficiency in study. It is believed to be absolutely the best.

FEES.

The charge for attendance is *Eighty Dollars* per annum. As far as payment of tuition is concerned, the collegiate year is regarded as divided into two equal terms, beginning on the first Wednesday in October and February, respectively, and one-half the annual charge becomes due and payable on the following day, Thursday. For the accommodation of students, the Secretary will, when requested, receive monthly payments of $10 each, *strictly in advance.*

Persons enrolling their names as students will be considered as having entered the school for not less than one term, unless an express agreement to the contrary is made. Payment will not be received for less than one full month, nor can any deduction be made for absence.

For the *Postgraduate Course* the charge is *Fifty Dollars,* payable in two equal installments in advance, or monthly in advance, by special arrangement with the Secretary.

For attendance on Lectures, as hereinbefore stated, the charge is *Forty Dollars* per annum, payable in monthly installments in advance.

The fee for graduation, which is additional to the yearly charge for attendance, *and which includes all expenses of the annual commencement,* is *Ten Dollars.*

Some changes in, and additions to, the Course of Study and Faculty hereinbefore specified, are in contemplation, and will be hereafter announced.
